

- 1 Mathematical background
- 2 Introduction to the finite element method
- 3 Finite elements for large deformation
- 4 Typical finite elements
- 5 Classification of finite element formulations
- 6 Auxiliary equations: contact, friction, incompressibility
- 7 Thermo-mechanical principles
- 8 Sheet metal formability tests
- 9 Steady state forming problems
- 10 Forging analysis
- 11 Sheet forming analysis
- 12 Recent research topics
