

Table of contents

- **Preface** (p. ix)
- **1 Structural analysis**
- 1.1 **Introduction** (p. 1)
- 1.2 **Axial loading** (p. 1)
- 1.3 **Axially loaded members** (p. 4)
- 1.4 **Poisson's ratio** (p. 8)
- 1.5 **Temperature stresses** (p. 9)
- **Problems** (p. 14)
- **2 Bending**
- 2.1 **Introduction** (p. 16)
- 2.2 **Shear force and bending moment** (p. 17)
- 2.3 **Bending stresses** (p. 24)
- **Problems** (p. 33)
- **3 Torsion**
- 3.1 **Introduction** (p. 35)
- 3.2 **Torsion of circular shafts** (p. 37)
- 3.3 **Transmission of power** (p. 42)
- **Problems** (p. 43)
- **4 Linear and angular motion**
- 4.1 **Introduction** (p. 46)
- 4.2 **Linear motion** (p. 46)
- 4.3 **Two and three-dimensional linear motion** (p. 52)
- 4.4 **Angular motion** (p. 56)
- 4.5 **Force and linear motion** (p. 62)
- 4.6 **Torque and angular motion** (p. 67)
- 4.7 **Linear and angular kinetic energy** (p. 75)
- **Problems** (p. 78)
- **5 Mechanical oscillations**
- 5.1 **Introduction** (p. 84)
- 5.2 **Simple harmonic motion** (p. 85)
- 5.3 **Undamped oscillations** (p. 90)
- 5.4 **Damped oscillations** (p. 95)
- 5.5 **Forced oscillations** (p. 97)
- **Problems** (p. 99)
- **6 Heat transfer**
- 6.1 **Introduction** (p. 102)
- 6.2 **Conduction** (p. 103)
- 6.3 **Convection** (p. 112)
- 6.4 **Radiation** (p. 115)
- **Problems** (p. 118)
- **7 Fluid flow**
- 7.1 **Introduction** (p. 121)
- 7.2 **Viscosity** (p. 121)
- 7.3 **Power loss with bearings** (p. 124)

- **7.4 Laminar and turbulent flow** (p. 127)
- **7.5 Energy loss with fluids flowing through pipes** (p. 128)
- **Problems** (p. 134)
- **8 Single phase a.c. theory**
- **8.1 Introduction** (p. 136)
- **8.2 Reactance and susceptance** (p. 139)
- **8.3 Phasor relationships for pure components** (p. 139)
- **8.4 Impedance and admittance** (p. 141)
- **8.5 Series a.c. circuits** (p. 142)
- **8.6 Parallel circuits** (p. 147)
- **8.7 Power** (p. 152)
- **8.8 Circuit analysis using PSpice** (p. 159)
- **Problems** (p. 164)
- **9 Complex numbers**
- **9.1 Introduction** (p. 167)
- **9.2 Complex numbers** (p. 167)
- **9.3 Representing phasors by complex numbers** (p. 176)
- **9.4 Impedance** (p. 179)
- **Problems** (p. 188)
- **10 Resonant circuits**
- **10.1 Introduction** (p. 192)
- **10.2 Resonance with series circuits** (p. 192)
- **10.3 Resonance with parallel circuits** (p. 197)
- **Problems** (p. 203)
- **11 Complex waveforms**
- **11.1 Introduction** (p. 204)
- **11.2 The Fourier series** (p. 204)
- **11.3 Circuit analysis with complex waveforms** (p. 210)
- **11.4 Production of harmonics** (p. 216)
- **Problems** (p. 220)
- **12 Systems**
- **12.1 Introduction** (p. 222)
- **12.2 Basic principles** (p. 222)
- **12.3 Mathematical models** (p. 223)
- **12.4 Information and signals** (p. 224)
- **12.5 Signal processing** (p. 226)
- **12.6 Examples of electronic systems** (p. 238)
- **Problems** (p. 242)
- **13 Control systems**
- **13.1 Introduction** (p. 244)
- **13.2 Basic principles** (p. 244)
- **13.3 Measurement systems** (p. 250)
- **13.4 Electrical switching** (p. 253)
- **13.5 Speed control of motors** (p. 256)
- **Problems** (p. 260)
- **Answers** (p. 261)

- **Index** (p. 273)
