

- Foreword Paul Hyett p. vii
- Preface p. xii
- Acknowledgements p. xiii
- 1 Homes for the future from the past p. 1
 - The house condition survey p. 3
 - Priorities p. 4
- 2 Insulation options p. 7
 - The range of options p. 7
 - Main points p. 10
- 3 The building fabric - roofs and lofts p. 11
 - Insulants for lofts p. 13
 - Spray applied insulation p. 14
 - Flat roofs p. 15
 - Main points p. 15
- 4 The building fabric - external walls and floors p. 17
 - Cavity walls p. 17
 - Solid walls p. 19
 - Floors p. 25
 - Windows and doors p. 26
 - Helplines p. 28
 - Main points p. 28
- 5 Draught proofing and ventilation p. 30
 - From diagnosis to remedy p. 31
 - The external environment p. 36
 - Main points p. 37
- 6 Heating p. 39
 - Central heating p. 39
 - The conservatory p. 41
 - Main points p. 42
- 7 Alternatives to conventional heating p. 43
 - Micro-CHP p. 43
 - Heat pumps p. 48
 - Evaporative cooling p. 52
 - Fuel cells p. 53
 - Main points p. 56
- 8 Domestic hot water (DHW) p. 57
 - Solar thermal energy p. 58
 - Solar thermal hybrids p. 65
 - Economics p. 67
 - Main points p. 67
- 9 Lighting p. 68
 - Artificial light p. 68
 - The future p. 70
 - Main points p. 71
- 10 The home as micro-power station p. 72
 - Photovoltaic cells (PVs) p. 73

- Solar shingles p. 76
- Sunslates p. 78
- Glass laminates p. 79
- Sunstation p. 79
- Prospects for PVs in the developed countries p. 82
- Wind power p. 84
- Grants p. 90
- Main points p. 91
- 11 Water and energy conservation in appliances p. 92
- Reducing consumption p. 92
- Domestic appliances p. 94
- Main points p. 96
- 12 Materials p. 97
- Paints p. 97
- Materials for the near future p. 99
- Timber p. 100
- Main points p. 101
- 13 Waste disposal and recycling p. 102
- Recycling p. 103
- Further sources of information p. 105
- Main points p. 106
- Note p. 107
- References p. 120
- 14 The wider context p. 108
- Appendix Case Study: Ecological refurbishment of a house in Oxford, UK p. 114
- Units of measurement of electricity and energy p. 119
- Index p. 121
