

Table of Contents

- Preface p. vii
- Section I Theory and Concepts p. 1
- Chapter 1 History of Radiobiology p. 3
 - Radiobiology History p. 4
 - Law of Bergonie and Tribondeau p. 4
 - Ancel and Vitemberger p. 5
 - Fractionation Theory p. 5
 - Mutagenesis p. 5
 - Effects of Oxygen p. 6
 - Reproductive Failure p. 6
 - Roentgen p. 6
 - Rad p. 6
 - Rem p. 6
 - SI Units p. 7
 - Regulation p. 7
- Chapter 2 Cellular Anatomy and Physiology p. 11
 - Cell Biology p. 12
 - Chemical Configuration of Cells p. 12
 - Cell Structure p. 14
 - Cell Growth and Division p. 20
 - Mitosis p. 20
 - Meiosis p. 23
- Chapter 3 Cellular Effects of Radiation p. 27
 - Radiosensitivity of Cells p. 28
 - Physical and Biologic Factors p. 28
 - Direct and Indirect Effects of Radiation p. 32
 - Interactions with Radiation p. 33
 - Radiolysis of Water p. 33
 - Irradiation of Macromolecules p. 34
 - Single-hit Chromosome Aberrations p. 36
 - Multi-hit Chromosome Aberrations p. 38
 - Reciprocal Translocations p. 39
 - Dose-Response Relationships p. 39
 - Linear Dose-Response Relationships p. 40
 - Linear Quadratic Dose-Response Curves p. 40
 - Target Theory p. 41
 - Cell Survival Curves p. 43
 - Section Review p. 46
- Section II Biological Effects of Radiation Exposure p. 47
- Chapter 4 Effects of Initial Exposure to Radiation p. 49
 - Acute Radiation Syndromes p. 50
 - Response Stages p. 53
 - Bone Marrow Syndrome p. 54
 - Gastrointestinal Syndrome p. 55

- Central Nervous System Syndrome p. 55
- Local Tissue Damage p. 56
- Skin p. 56
- Eyes p. 60
- Gonads p. 60
- Hematologic Effects p. 62
- Hemopoietic System p. 62
- Cytogenic Effects p. 64
- Chapter 5 Effects of Long-term Exposure to Radiation p. 69
- Epidemiology p. 70
- Dose-Response Curves p. 70
- Relative Versus Absolute Risk p. 71
- Radiation-Induced Malignancies p. 78
- Leukemia p. 79
- Skin Carcinoma p. 80
- Thyroid Cancer p. 81
- Breast Cancer p. 81
- Osteosarcoma p. 82
- Lung Cancer p. 82
- Life-Span Shortening p. 84
- Genetic Damage p. 84
- Irradiation of the Fetus p. 89
- Pre-implantation Stage p. 90
- Fetal Growth Stage p. 92
- Stochastic and Nonstochastic Effects p. 96
- Section Review p. 98
- Section III Radiation Protection p. 99
- Chapter 6 Protection of Personnel p. 101
- Rationale for Radiation Protection p. 102
- Monitoring of Personnel p. 102
- Film Badges p. 102
- Thermoluminescent Dosimeters p. 103
- Pocket Dosimeters p. 104
- Dosimetry Report p. 105
- Dose-limiting Recommendations p. 106
- Principles of Personnel Radiation Exposure p. 111
- Time p. 112
- Distance p. 112
- Shielding p. 112
- Structural Shielding Construction p. 112
- Use of Protective Garments p. 114
- Mobile Exam Considerations p. 115
- Fluoroscopic Exam Considerations p. 117
- Inverse Square Law p. 119
- Patient Immobilization Considerations p. 121
- Chapter 7 Protection of Patients p. 125

- Immobilization p. 126
- Beam Restriction p. 127
- Kilovoltage p. 127
- Irradiated Material p. 128
- Beam Limiting Devices p. 128
- Aperture Diaphragms p. 128
- Cones p. 129
- Collimators p. 129
- X-Ray Beam Filtration p. 131
- Gonadal Shielding p. 133
- Flat Contact Shields p. 134
- Shadow Shields p. 134
- Shaped Contact Shields p. 134
- Exposure and Technique Factors p. 134
- Kilovoltage Range p. 136
- Milliamperage and Time p. 136
- Film-Screen Considerations p. 136
- Radiographic Film p. 137
- Intensifying Screens p. 137
- Patient Positioning p. 138
- Grids p. 138
- The Pregnant Patient p. 138
- Repeat Radiographs p. 138
- Fluoroscopic Procedures p. 138
- Image Intensification Fluoroscopy p. 138
- Section Review p. 141
- Bibliography p. 143
- Glossary p. 145
- Index p. 151
