

- Preface p. xiii
- 1 Introduction to Communications Systems p. 1
- 1.1 Introduction p. 3
- 1.2 Elements of a Communication System p. 3
- 1.3 Time and Frequency Domains p. 8
- 1.4 Noise and Communications p. 16
- 1.5 Spectrum Analysis p. 30
- 2 Radio-Frequency Circuits p. 43
- 2.1 Introduction p. 44
- 2.2 High-Frequency Effects p. 44
- 2.3 Radio-Frequency Amplifiers p. 48
- 2.4 Radio-Frequency Oscillators p. 60
- 2.5 Mixers p. 74
- 2.6 Frequency Synthesizers p. 83
- 3 Amplitude Modulation p. 101
- 3.1 Introduction p. 102
- 3.2 Full-Carrier AM: Time Domain p. 105
- 3.3 Full-Carrier AM: Frequency Domain p. 110
- 3.4 Quadrature AM and AM Stereo p. 118
- 3.5 Suppressed-Carrier AM p. 120
- 4 Angle Modulation p. 135
- 4.1 Introduction p. 136
- 4.2 Frequency Modulation p. 137
- 4.3 Phase Modulation p. 141
- 4.4 The Angle Modulation Spectrum p. 145
- 4.5 FM and Noise p. 155
- 4.6 FM Stereo p. 161
- 4.7 FM Measurements p. 163
- 5 Transmitters p. 171
- 5.1 Introduction p. 172
- 5.2 Transmitter Requirements p. 172
- 5.3 Transmitter Topologies p. 175
- 5.4 Full-Carrier AM Transmitters p. 177
- 5.5 Single-Sideband AM Transmitters p. 191
- 5.6 FM Transmitters p. 200
- 5.7 Transmitter Power Measurements p. 212
- 6 Receivers p. 223
- 6.1 Introduction p. 224
- 6.2 Receiver Topologies p. 225
- 6.3 Receiver Characteristics p. 230
- 6.4 Demodulators p. 240
- 6.5 Receiver Variations p. 252
- 6.6 Communications Receivers p. 263
- 6.7 Transceivers p. 266

- 6.8 Receiver Measurements p. 266
- 7 Digital Communication p. 279
- 7.1 Introduction p. 280
- 7.2 Pulse Modulation p. 286
- 7.3 Pulse-Code Modulation p. 291
- 7.4 Delta Modulation p. 298
- 7.5 Line Codes p. 299
- 7.6 Time-Division Multiplexing p. 300
- 7.7 Vocoders and Data Compression p. 302
- 8 The Telephone System p. 311
- 8.1 Introduction p. 312
- 8.2 Public Switched Telephone Network p. 312
- 8.3 The Local Loop p. 315
- 8.4 Signals and Noise in the Telephone System p. 322
- 8.5 Frequency-Division Multiplexing p. 324
- 8.6 Digital Transmission p. 328
- 8.7 Telephone-Network Signaling p. 331
- 8.8 Digital Local Loops p. 333
- 9 Data Transmission p. 341
- 9.1 Introduction p. 342
- 9.2 Data Coding p. 342
- 9.3 Asynchronous Transmission p. 348
- 9.4 Synchronous Transmission p. 351
- 9.5 Error Detection and Correction p. 354
- 9.6 Data Compression and Encryption p. 359
- 10 Local-Area Networks p. 367
- 10.1 Introduction p. 368
- 10.2 Local-Area Network Topologies p. 368
- 10.3 IBM Token-Ring System p. 371
- 10.4 Ethernet p. 373
- 10.5 Ethernet Wiring p. 376
- 10.6 Broadband Networks p. 379
- 10.7 LAN Software p. 380
- 11 Wide-Area Networks and the Internet p. 385
- 11.1 Introduction p. 386
- 11.2 Network Structures p. 386
- 11.3 Network Protocols p. 388
- 11.4 Connecting LANs to WANs p. 390
- 11.5 TCP-IP Networks p. 392
- 11.6 The Internet and Intranets p. 394
- 11.7 Convergence of Voice and Data Networks p. 396
- 12 Digital Modulation and Modems p. 403
- 12.1 Introduction p. 404
- 12.2 Frequency-Shift Keying p. 408

- 12.3 Phase-Shift Keying p. 411
- 12.4 Quadrature Amplitude Modulation p. 412
- 12.5 Telephone Modems p. 413
- 12.6 Modem-to-Computer Connections p. 418
- 12.7 Cable Modems and Digital Subscriber Lines p. 423
- 13 Multiplexing and Multiple-Access Techniques p. 435
- 13.1 Introduction p. 436
- 13.2 Frequency-Division Multiplexing and Multiple Access (FDM/FDMA) p. 437
- 13.3 Time-Division Multiplexing and Multiple Access (TDM/TDMA) p. 438
- 13.4 Spread-Spectrum Systems p. 443
- 13.5 Code-Division Multiple Access (CDMA) p. 448
- 14 Transmission Lines p. 455
- 14.1 Introduction p. 456
- 14.2 Electrical Model of a Transmission Line p. 458
- 14.3 Step and Pulse Response of Lines p. 459
- 14.4 Wave Propagation on Lines p. 470
- 14.5 Transmission Line Losses p. 482
- 14.6 Impedance Matching p. 484
- 14.7 Transmission-Line Measurements p. 499
- 15 Radio-Wave Propagation p. 513
- 15.1 Introduction p. 514
- 15.2 Electromagnetic Waves p. 516
- 15.3 Free-Space Propagation p. 520
- 15.4 Reflection, Refraction, and Diffraction p. 527
- 15.5 Ground-Wave Propagation p. 533
- 15.6 Ionospheric Propagation p. 534
- 15.7 Line-of-Sight Propagation p. 538
- 15.8 Propagation in a Mobile/Portable Environment p. 542
- 15.9 Repeaters and Cellular Systems p. 546
- 15.10 Other Propagation Modes p. 552
- 16 Antennas p. 561
- 16.1 Introduction p. 562
- 16.2 Simple Antennas p. 562
- 16.3 Antenna Characteristics p. 566
- 16.4 Other Simple Antennas p. 576
- 16.5 Antenna Matching p. 584
- 16.6 Antenna Arrays p. 587
- 16.7 Reflectors p. 596
- 16.8 Cellular and PCS Antennas p. 600
- 16.9 Test Equipment: The Anechoic Chamber p. 607
- 17 Microwave Devices p. 617
- 17.1 Introduction p. 618
- 17.2 Waveguides p. 618
- 17.3 Passive Components p. 632

- 17.4 Microwave Solid-State Devices p. 639
- 17.5 Microwave Tubes p. 646
- 17.6 Microwave Antennas p. 651
- 17.7 Radar p. 656
- 18 Terrestrial Microwave Communication Systems p. 673
- 18.1 Introduction p. 674
- 18.2 Terminal and Repeater Siting p. 675
- 18.3 Path Calculations p. 678
- 18.4 Fixed Microwave Links p. 685
- 18.5 Local Microwave Distribution Systems p. 692
- 19 Television p. 699
- 19.1 Introduction p. 700
- 19.2 NTSC Analog Video Signal p. 701
- 19.3 Terrestrial Analog Television Broadcasting p. 710
- 19.4 Analog Television Receivers p. 715
- 19.5 Cable Television p. 727
- 19.6 Test Equipment and Signals p. 732
- 19.7 Television Receiver Troubleshooting p. 734
- 19.8 Digital and High-Definition Television p. 736
- 20 Satellite Communication p. 749
- 20.1 Introduction p. 750
- 20.2 Satellite Orbits p. 753
- 20.3 Geostationary Satellites p. 756
- 20.4 Applications of Geostationary Satellites p. 770
- 20.5 Satellites in Low- and Medium-Earth Orbits p. 779
- 20.6 Satellite Telephone Systems Using LEO and MEO Satellites p. 780
- 21 Cellular Radio p. 791
- 21.1 Introduction p. 792
- 21.2 The Advanced Mobile Phone System (AMPS) p. 793
- 21.3 AMPS Control System p. 796
- 21.4 Security and Privacy p. 800
- 21.5 Cellular Telephone Specifications and Operation p. 801
- 21.6 Cell Site Equipment p. 803
- 21.7 Fax and Data Communication Using Cellular Phones p. 811
- 21.8 Digital Cellular Systems p. 813
- 22 Personal Communication Systems p. 825
- 22.1 Introduction p. 826
- 22.2 Differences Between Cellular and PCS Systems p. 827
- 22.3 IS-136 (TDMA) PCS p. 830
- 22.4 GSM p. 832
- 22.5 IS-95 CDMA PCS p. 835
- 22.6 Comparison of PCS Schemes p. 843
- 22.7 Data Communication with PCS p. 845
- 22.8 Testing Cellular Systems and PCS p. 848

- 22.9 Third Generation PCS Systems p. 850
- 23 Paging and Wireless Data Networking p. 859
- 23.1 Introduction p. 860
- 23.2 Paging and Messaging Systems p. 860
- 23.3 Wireless Local-Area Networks p. 865
- 23.4 Wireless Packet-Data Services p. 875
- 24 Fiber Optics p. 881
- 24.1 Introduction p. 882
- 24.2 Optical Fiber p. 883
- 24.3 Fiber-Optic Cables p. 894
- 24.4 Splices and Connectors p. 895
- 24.5 Optical Couplers and Switches p. 898
- 24.6 Optical Emitters p. 901
- 24.7 Optical Detectors p. 908
- 25 Fiber-Optic Systems p. 917
- 25.1 Introduction p. 918
- 25.2 Basic Fiber-Optic Systems p. 918
- 25.3 Repeaters and Optical Amplifiers p. 925
- 25.4 Wavelength-Division Multiplexing p. 928
- 25.5 Submarine Cables p. 929
- 25.6 The Synchronous Optical Network (SONET) p. 931
- 25.7 Fiber in Local-Area Networks p. 933
- 25.8 Local Telephone Applications p. 935
- 25.9 Cable-Television Applications p. 937
- 25.10 Experimental Techniques p. 938
- 25.11 Optical Time-Domain Reflectometry p. 939
- Appendices
- Appendix A Decibels p. 945
- A.1 Review of Logarithms
- A.2 Decibels
- Appendix B CB Channel Frequencies p. 951
- Appendix C Television Channel Frequencies p. 952
- Appendix D Cable-Television Frequencies p. 953
- Appendix E Waveguide Table p. 955
- Appendix F Cellular and PCS Frequencies p. 956
- Appendix G Answers to Odd-Numbered Problems p. 957
- Index p. 971
