

- Preface to the thirteenth edition p. vii
- Units and abbreviations p. ix
- Part 1 The Engine
- 1 General principles of heat engines p. 3
- 2 Engine balance p. 25
- 3 Constructional details of the engine p. 47
- 4 Six-, eight- and twelve-cylinder engines p. 137
- 5 Sleeve valve and special engines p. 177
- 6 Diesel injection equipment and systems p. 186
- 7 Distributor type injection pumps p. 252
- 8 Some representative diesel engines p. 311
- 9 The two-stroke engine p. 326
- 10 Fundamentals of carburation p. 349
- 11 Some representative carburettors p. 385
- 12 Petrol injection systems p. 424
- 13 Induction manifold design p. 479
- 14 Emission control p. 516
- 15 Fuel pumps and engine intake air conditioning p. 549
- 16 Turbocharging and supercharging p. 556
- 17 Fuels and their combustion p. 590
- 18 Friction, lubricants and lubrication p. 619
- 19 Engine cooling p. 641
- 20 Electric propulsion p. 655
- 21 Alternative power units p. 669
- 22 Bearings, gearing, chains and belt drives p. 698
- Part 2 Transmission
- 23 Transmission requirements p. 709
- 24 Clutches p. 720
- 25 Why is a gearbox necessary? p. 750
- 26 Constructional arrangements of gearboxes p. 760
- 27 Epicyclic and pre-selector gearboxes p. 792
- 28 Torque converters and automatic gearboxes p. 806
- 29 Semi-automatic gearboxes and continuously variable transmissions p. 841
- 30 Universal joints and driving steered wheels p. 864
- 31 The differential p. 876
- 32 The back axle p. 892
- 33 Axle constructions p. 900
- 34 The double reduction axle p. 907
- Part 3 The Carriage Unit
- 35 The basic structure p. 915
- 36 Vehicle safety p. 924
- 37 Brakes p. 956
- 38 Servo, power operated, and regenerative braking systems p. 983
- 39 Anti-lock brakes and traction control p. 1015

- 40 Front axle and steering mechanism p. 1043
- 41 Wheels and tyres p. 1085
- 42 Suspension principles p. 1109
- 43 Suspension systems p. 1144
- 44 Six-wheel vehicles p. 1177
- Index p. 1191
