

- Acknowledgments p. vii
- Preface p. ix
- I Combustion and Fuel-Injection Processes in the Diesel Engine p. 1
- 1.1 Diesel-Engine Fuel Injection and Spray Combustion p. 2
- 1.1.1 Kinetically and Diffusion-Controlled Combustion Phenomena in the Diesel Engine p. 2
- 1.1.2 Diesel-Engine Fuel-Injection Process p. 3
- 1.1.3 Spray Combustion in the Diesel Engine p. 6
- 1.2 DI Diesel-Engine Combustion Process p. 7
- 1.2.1 General Combustion Process p. 7
- 1.2.2 Ignition Delay Period p. 8
- 1.2.3 Kinetic or Premixed Burning Period p. 9
- 1.2.4 Diffusion Burning Period p. 9
- 1.2.5 After Burning Period p. 10
- References p. 10
- II Heat Release and Its Effect on Engine Performance p. 13
- 2.1 Calculating Heat Release p. 13
- 2.1.1 Heat-Release Calculation Basics p. 15
- 2.1.2 Cylinder-Charge Molar Change during Combustion p. 17
- 2.1.3 Cylinder-Pressure Data Smoothing and Calculation Interval p. 19
- 2.2 Heat Release, Relative Cycle Efficiency, and Peak Cylinder Pressure p. 21
- 2.2.1 Air-Cycle Analysis p. 21
- 2.2.2 Case of Combustion before Top Dead Center (TDC) p. 22
- 2.2.3 Case of Combustion after TDC p. 24
- 2.2.4 Relative Cycle Efficiency and Peak Cylinder-Firing Pressure p. 26
- 2.3 Pressure Data Collection for Heat-Release Calculation p. 30
- 2.3.1 Synchronization of Cylinder Pressure and Volume (TDC Correction) p. 30
- 2.3.2 Flush-Mounting the Pressure Transducer p. 33
- 2.3.3 Some Other Aspects Associated with Cylinder-Pressure Measurements p. 35
- References p. 37
- III Combustion Analysis Associated with Fuel Efficiency and Smoke p. 39
- 3.1 Fuel-Injection Related p. 39
- 3.1.1 Injector Hole Length versus Diameter (L/D) Ratio p. 39
- 3.1.2 Fuel-Injection Pressure p. 42
- 3.1.3 Injector-Flow Rate p. 45
- 3.1.4 Secondary Injection p. 47
- 3.1.5 Injector-Sac Volume p. 50
- 3.2 Combustion-Chamber Related p. 53
- 3.2.1 Combustion-Chamber Bowl Shape p. 53
- 3.2.2 Injector-Spray Position p. 56
- 3.2.3 Combustion-Chamber Insulation p. 58
- References p. 60
- IV Combustion Analysis Associated with NO_x and Roughness p. 61
- 4.1 NO_x Emissions p. 61
- 4.1.1 NO_x Formation p. 61
- 4.1.2 Injection-Timing Retard p. 64

- 4.1.3 Lower Inlet Air Temperature p. 69
- 4.1.4 Higher Compression Ratio, Lower Inlet Air Temperature, and Injection-Timing Retard p. 73
- 4.1.5 Water-Emulsified Diesel-Fuel Combustion p. 77
- 4.1.6 Higher Fuel-Injection Pressure p. 80
- 4.2 Combustion Roughness (Noise Emissions) p. 85
- 4.2.1 Origin of Combustion Roughness p. 85
- 4.2.2 Measurement of Combustion Roughness p. 86
- 4.2.3 Sample of Combustion Roughness Comparison p. 88
- References p. 91
- V Combustion Analysis of Various Operation Conditions p. 93
- 5.1 Effects of Fuel p. 93
- 5.1.1 Fuel Temperature Effect p. 93
- 5.1.2 Fuel Composition Effect p. 98
- 5.2 Effects of Inlet Air Manifold Condition p. 105
- 5.2.1 Inlet Manifold Air Temperature (MAT) Effect p. 105
- 5.2.2 Inlet Manifold Air Pressure (MAP) Effect p. 108
- References p. 110
- VI Alternate Fuels Combustion Analysis p. 113
- 6.1 The High-Pressure-Injection Natural-Gas-Fueled Diesel Engine p. 113
- 6.2 "H-Process" Natural-Gas Dual-Fueled Diesel-Engine Combustion p. 116
- 6.3 Coal-Water-Slurry-Fueled Diesel-Engine Combustion p. 123
- 6.3.1 CWS Ignition p. 125
- 6.3.2 CWS Combustion p. 127
- 6.3.3 Emissions of Coal-Fueled Engine Combustion p. 129
- 6.3.4 CWS Fuel Spray and Wall Impingement p. 129
- 6.3.5 Conclusions p. 130
- References p. 131
- Index p. 135
- About the Author p. 147
