

- Introduction
- Who Should Use This Book? How to Use This Book
- I Creating High-Availability Applications
- 1 Understanding High Availability
 - High Availability Explained
 - How Do I Tell My Server Load? The High-Availability Plan: Six Must-Haves for Building High-Availability Solutions
 - Some Truths About Web Hosting
 - Active Site Monitoring
 - The Quality of Service Guarantee
- 2 Monitoring System Performance
 - Understanding Performance
 - Monitoring Your ColdFusion Server
 - Setting Up a Default Probe to Verify Content
 - Understanding Performance
 - Why Monitor Performance? Monitoring Performance on Unix and Linux Servers
 - Deciding What to Do Next
 - Using SNMP
- 3 Different Ways to Scale
 - Part 1 Understanding Scaling Issues
 - Part 2 Choosing a Load-Balancing Solution
- 4 Software-Based Load Balancing
 - Understanding ClusterCATS
- 5 Hardware-Based Load Balancing
 - Why Invest in Hardware-Based Load Balancing? Two Types of Hardware Load Balancers
 - How Hardware Load Balancing Works
 - More About Algorithms
 - Integrating LocalDirector Within ColdFusion
 - Managing Web Server Traffic with ColdFusion Administrator
 - Using ClusterCATS Explorer to Manage Your LocalDirector
 - The Great Megaproxy Headache for Network Engineers
 - Implementing Other Hardware Load-Balancing Solutions
 - Using Load Balancing for Business Continuity
- 6 Managing Session State in Clusters
 - What Is Client State? Information Embedded in the URL or in a FORM Post
 - Cookies
 - The Scenario
- II Ensuring Security
- 7 Understanding Security
 - Security Risks
 - ColdFusion and Security
 - Enabling SSL on a Server
 - Authentication and Authorization
 - Access Control

- Summary
- 8 ColdFusion Security Options
 - Basic Versus Advanced Security
 - Relying on the Web Server or OS
- 9 Implementing Advanced Security
 - Do You Need Advanced Security? What Is SiteMinder? Defining the Security Context
 - Creating Rules
 - User Directories Options
 - Creating Policies
 - Applying Advanced Security to an Extranet Scenario
 - Authenticating a User Against a Defined User Directory with CFAUTHENTICATE
 - Integrating
- 10 Security in Shared and Hosted Environments
 - Security Risks
 - Sandbox
 - Securing Remote Development Services
 - DSNless Database Connections
 - Other Issues
- III Advanced Application Development
 - 11 ColdFusion Scripting
 - Understanding CFSCRIPT
 - Using Cfscrip
 - Unsupported Tags and Functions
 - Common Errors and Resolutions
 - Creating Your Own Functions
 - 12 Using Regular Expressions
 - Understanding Regular Expressions
 - Using the RE Functions
 - RegEx Basics
 - Real-World Usage
 - 13 Creating Intelligent Agents
 - Overview
 - CFHTTP
 - Putting the CFHTTP Tag to Use
 - Creating Intelligent Agents with CFHTTP
 - CFFTP
 - Putting the CFFTP Tag to Use
 - 14 XML Development
 - XML Overview
 - XML Documents
 - Validating XML Documents
 - Leveraging XML in Your Applications
 - ColdFusion with XML

- 15 Using WDDX
 - Introducing WDDX
 - The WDDX Format: It's XML! WDDX and ColdFusion
 - WDDX and JavaScript
- 16 Advanced WDDX Integration
 - Macromedia's WDDX Interface for COM
 - Macromedia's WDDX Interface for COM
 - Macromedia's WDDX Interface for COM
 - Integrating with Active Server Pages
 - Integrating with Visual Basic
 - Integrating with Office Applications
 - Fetching WDDX Packets Directly with JavaScript
 - Additional Resources Available in the WDDX SDK
- 17 Interacting with Directory Services
 - Understanding LDAP
 - Using CFLDAP
 - Querying Public LDAP Servers
 - Interacting with Directories
- 18 Internationalization and Localization
 - Why Internationalization and Localization?
 - What Are the Main Issues?
 - What's Internationalization?
 - What's Localization?
 - What's Involved in Localization/Internationalization? UNICODE
 - Database Issues
 - Verity Issues
 - Locale Functions
 - What to Do If Your Locale's Not Supported by ColdFusion
 - Creating a Multilanguage Application
- IV Extending Coldfusion
- 19 Creating Advanced Custom Tags
 - Reviewing Simple CFML Custom Tags
 - Understanding Nested Custom Tags
 - Using the ThisTag Scope
 - Creating Tag Families
 - Introducing Cffunction
 - Making Nested Custom Tags Flexible
 - Dynamically Populating the Custom Tag
 - Wrapping Up Cf_Calendar
 - Securing Your Tags
- 20 Creating User-Defined Functions
 - Understanding UDFs
 - Creating UDFs
 - UDF Syntax
 - Passing Functions as Arguments
 - UDF Limitations

- Do's and Donts of UDFs
- 21 Extending ColdFusion with COM
 - Understanding COM
 - CFOBJECT
 - Overview
 - Using COM
 - Integrating with Popular Applications
- 22 Extending ColdFusion with CORBA
 - Introduction to CORBA
 - How CORBA Works
 - Configuring ColdFusion to Work with CORBA
 - Working with CORBA in ColdFusion
- 23 Extending ColdFusion with Java
 - ColdFusion and Java
 - Introducing Java
 - Basic Java Concepts
 - Administering Java Settings in the ColdFusion Administrator
 - Calling Java Servlets with the CFHTTP
 - Tag
 - Calling JRun Servlets with the CFSERVLET
 - Tag
 - Calling Java Objects
 - Calling Enterprise JavaBeans with the CFOBJECT
 - Tag
- 24 Extending ColdFusion with CFX
 - What Are CFX Tags? Using the C++ API
 - Building Your First C++ CFX Tag: CFX_ListRemoveDuplicates
 - Shortening Your Source Code with the "Macros" on the CD-ROM
 - Building Your Second CFX Tag: CFX_QueryAddColumn
 - Using the Java API
 - Creating Your First Java CFX Tag: CFX_JavaRemoveDup
 - Editing a Tag Setting in the ColdFusion Administrator
- 25 Writing ColdFusion Studio Tag Extensions
 - About VTML
 - Creating Tag Definitions
 - Creating Tag Definitions
 - Creating Tag Editor Dialog Boxes
 - Creating Wizards
 - Resources to Speed VTML Development
- 26 Scripting ColdFusion Studio
 - About Studio and Scripting
 - Writing VTOM Scripts
 - Scripting Beyond the VTOM
- V Appendixes
 - Appendix A VTML and WIZML Language Reference
 - Using VTML and WIZML

- `Attrib`, `/Attrib`
- `Attribcategories`, `Attribgroup`, `/Attribcategories`
- `Attriboption`
- `Attributes`, `/Attributes`
- `Cat`, `/Cat`
- `Container`, `/Container`
- `Control`, `/Control`
- `E`
- `Editorlayout`, `/Editorlayout`
- `Input`
- `Item`
- `Nextpage`
- `Page`, `/Page`
- `Param`
- `Tag`, `/Tag`
- `Tagdescription`, `/Tagdescription`
- `Taglayout`, `/Taglayout`
- `Template`
- `Vtinclude`
- `Wizard`, `/Wizard`
- `Wizif`, `Wizelseif`, `Wizelse`, `/Wizif`
- `Wizinclude`
- `Wizloop`, `Wizbreak`, `Wizcontinue`, `/Wizloop`
- `Wizset`
- Appendix B ColdFusion Studio Object Model Reference
 - The `ActiveDocument` Object
 - The `Application` Object
 - The `DeploymentManager` Object
 - The `DocumentCache` Object
 - The `HTTPProvider` Object
 - The `ZipProvider` Object
- Appendix C The WDDX DTD
- Index
