

- Overview p. vii
- Fracture Mechanics and Structural Integrity
- Characterizing Crack Growth in Thin Aluminum Panels Under Tension-Torsion Loading Using Three-Dimensional Digital Image Correlation J. D. Helm and M. A. Sutton and M. L. Boone p. 3
- Sensing Crack Nucleation and Growth in Hard Alpha Defects Embedded in Ti-6Al-4V Alloy P. C. McKeighan and A. E. Nicholls and L. C. Perocchi and R. C. McClung p. 15
- Use Experience with a Development General Purpose Non-Contacting Extensometer with High Resolution A. Towse and C. Setchell and S. K. Potter and A. B. Clarke and J. H. G. Macdonald and M. R. Wisnom and R. D. Adams p. 36
- Analysis of Fatigue Crack Propagation by Quantitative Fractography N. Ranganathan and N. Gerard and A. Tougui and R. Leroy and M. Benguediab and M. Mazari and Y. Nadot and J. Petit p. 52
- Damage Evolution and Measurement
- A Comparison of Macroscopic to Microstructural Strain Fields in Cortical Bone D. P. Nicoletta and A. E. Nicholls and J. Lankford and D. T. Davy p. 87
- Detection of Localized Plastic Deformation in Pipelines Using the Nonlinear Harmonics Method G. L. Burkhardt and A. E. Crouch p. 101
- Strain and Displacement Measurement Techniques
- Experimental Measurement of Strains Using Digital Volume Correlation T. S. Smith and B. K. Bay p. 117
- Measurement of Stress Distributions on Silicon IC Chips Using Piezoresistive Sensors J. C. Suhling and R. C. Jaeger p. 127
- Real-time Phase Analysis Methods for Analyzing Shape, Strain and Stress Y. Morimoto and M. Fujigaki p. 153
- Strain Gauges, Fiber Optic Versus Electric S. Chen and J. S. Sirkis p. 169
- Long-Term Measurement of Local Creep Deformation by Optical Fiber Marking and Remote Monitoring S.-T. Tu and J.-M. Gong and X. Ling and X.-Y. He p. 184
- Thermal Fracture Mechanisms in Plasma Sprayed Thermal Barrier Coatings Under Cyclic Laser Irradiation X. Q. Ma and M. Takemoto p. 193
- Panel Discussion Summary
- Current Status and Future Sensor Development: Panel Discussion Summary J. S. Ransom and P. C. McKeighan p. 211
