

- Preface p. iii
- Contributors p. ix
- Environmental Engineering at the Interface: An Overview p. xiii
- Part I. NO_x/SO_x Abatement
- 1. Zeolite-Based Catalysts for the Abatement of NO_x and N₂O Emissions from Man-Made Activities Gerard Delahay and Dorothee Berthomieu and Annick Goursot and Bernard Coq p. 1
- 2. Transient In Situ IR Study of Selective Catalytic Reduction of NO on Cu-ZSM-5 Xihai Kang and Steven S. C. Chuang p. 25
- 3. Comparison of Catalytic Reduction of NO by Propene on Zeolite-Based and Clay-Based Catalysts Ion-Exchanged by Cu Jose L. Valverde and Fernando Dorado and Paula Sanchez and Isaac Asencio and Amaya Romero p. 39
- 4. Chemistry of Sulfur Oxides on Transition Metal Surfaces Xi Lin and Bernhardt L. Trout p. 55
- 5. Studies on Catalysts/Additives for Gasoline Desulfurization via Catalytic Cracking C. Y. Li and H. H. Shan and Q. M. Yuan and C. H. Yang and J. S. Zheng and B. Y. Zhao and J. F. Zhang p. 69
- Part II. Water Treatment: Heavy Metal and Organic Removal
- 6. Removal of Heavy Metals from Aqueous Media by Ion Exchange with Y Zeolites Mark A. Keane p. 93
- 7. Design and Synthesis of New Materials for Heavy Element Waste Remediation Lisa Dysleski and Sarah E. Frank and Steven H. Strauss and Peter K. Dorhout p. 111
- 8. Chemical Methods of Heavy Metal Binding Matthew Matlock and David Atwood p. 127
- 9. Interaction of Oil Residues in Patagonian Soil Norma S. Nudelman and Stella Maris Rios p. 139
- 10. Effectiveness of Carbon Nanofibers in the Removal of Phenol-Based Organics from Aqueous Media Colin Park and Mark A. Keane p. 165
- 11. Effective Acidity-Constant Behavior Near Zero-Charge Conditions Nicholas T. Loux p. 193
- Part III. Catalytic Approaches to Organic Pollutant Remediation
- 12. The Activity, Mechanism, and Effect of Water as a Promoter of Uranium Oxide Catalysts for Destruction of Volatile Organic Compounds Stuart H. Taylor and Richard H. Harris and Graham J. Hutchings and Ian D. Hudson p. 215
- 13. Detoxification of Concentrated Halogenated Gas Streams Using Solid Supported Nickel Catalysts Mark A. Keane p. 231
- 14. TiO₂ Nanoparticles for Photocatalysis Heather A. Bullen and Simon J. Garrett p. 255
- 15. Use of a Pt and Rh Aerosol Catalyst for Improved Combustion and Reduced Emissions Trevor R. Griffiths p. 275
- Part IV. Waste Minimization: Recycle of Waste Plastics
- 16. Polymer Waste Recycling over "Used" Catalysts Salmiaton Ali and Arthur Garforth and David H. Harris and Ron A. Shigeishi p. 295
- 17. Catalytic Dehalogenation of Plastic-Derived Oil Azhar Uddin and Yusaku Sakata p. 329
- Index p. 353
