

Table of Contents

- Preface p. iii
- Appendix Diffusion Coefficients for Binary Gas Mixtures p. ix
- 1. Homogeneous Kinetics p. 1
 - Definitions and Review of Kinetics for Homogeneous Reactions p. 1
 - Scaleup and Design Procedures p. 11
 - Interpretation of Kinetic Data p. 14
 - Complex Kinetics p. 25
 - Nomenclature p. 35
 - Problems p. 36
 - References p. 40
- 2. Kinetic Models for Heterogeneous Reactions p. 41
 - Basic Steps for Solid-Catalyzed Reactions p. 42
 - External Mass Transfer Control p. 42
 - Models for Surface Reaction p. 43
 - Rate of Adsorption Controlling p. 58
 - Allowing for Two Slow Steps p. 58
 - Desorption Control p. 61
 - Changes in Catalyst Structure p. 64
 - Catalyst Decay p. 70
 - Nomenclature p. 73
 - Problems p. 74
 - References p. 78
- 3. Ideal Reactors p. 81
 - Batch Reactor Design p. 82
 - Continuous-Flow Reactors p. 89
 - Plug-Flow Reactors p. 99
 - References p. 125
 - Pressure Drop in Packed Beds p. 120
 - Nomenclature p. 121
 - Problems p. 122
- 4. Diffusion and Reaction in Porous Catalysts p. 127
 - Catalyst Structure and Properties p. 127
 - Random Capillary Model p. 129
 - Diffusion of Gases in Small Pores p. 130
 - Effective Diffusivity p. 133
 - Pore Size Distribution p. 137
 - Diffusion of Liquids in Catalysts p. 142
 - Effect of Pore Diffusion on Reaction Rate p. 143
 - Optimum Pore Size Distribution p. 163
 - Nomenclature p. 168
 - Problems p. 169
 - References p. 173
- 5. Heat and Mass Transfer in Reactors p. 175
 - Stirred-Tank Reactor p. 176

- Reactor Stability p. 178
- Packed-Bed Tubular Reactors p. 188
- Radial Heat Transfer in Packed Beds p. 201
- Alternate Models p. 214
- Nomenclature p. 217
- Problems p. 219
- References p. 223
- 6. Nonideal Flow p. 225
 - Mixing Times p. 225
 - Pipeline Reactors p. 237
 - Packed-Bed Reactors p. 243
 - Nomenclature p. 253
 - Problems p. 254
 - References p. 255
- 7. Gas-Liquid Reactions p. 257
 - Consecutive Mass Transfer and Reaction p. 258
 - Simultaneous Mass Transfer and Reaction p. 265
 - Instantaneous Reaction p. 270
 - Penetration Theory p. 272
 - Gas-Film Control p. 276
 - Effect of Mass Transfer on Selectivity p. 277
 - Summary of Possible Controlling Steps p. 280
 - Types of Gas-Liquid Reactors p. 282
 - Bubble Columns p. 282
 - Stirred-Tank Reactors p. 296
 - Packed-Bed Reactors p. 308
 - Nomenclature p. 308
 - Problems p. 310
 - References p. 313
- 8. Multiphase Reactors p. 315
 - Slurry Reactors p. 315
 - Fixed-Bed Reactors p. 333
 - Nomenclature p. 351
 - Problems p. 352
 - References p. 356
- 9. Fluidized-Bed Reactors p. 359
 - Minimum Fluidization Velocity p. 360
 - Types of Fluidization p. 362
 - Reactor Models p. 366
 - The Two-Phase Model p. 369
 - The Interchange Parameter K p. 374
 - Model V: Some Reaction in Bubbles p. 379
 - Axial Dispersion p. 380
 - Selectivity p. 383
 - Heat Transfer p. 384
 - Commercial Applications p. 386

- Nomenclature p. 392
- Problems p. 393
- References p. 395
- 10. Novel Reactors p. 397
- Riser Reactors p. 397
- Monolithic Catalysts p. 403
- Wire-Screen Catalysts p. 411
- Reactive Distillation p. 417
- Nomenclature p. 421
- Index p. 425
- Problems p. 422
- References p. 423
