

- Preface p. v
- Preface to the Romanian Edition p. vii
- Part I Thermal Conversion Processes
- 1 Thermodynamic Analysis of Technological Processes p. 1
- 1.1 Calculation of the Overall Thermal Effect p. 1
- 1.2 Equilibrium Calculations for a Wide Range of Process Conditions p. 7
- References p. 12
- 2 Theoretical Background of Thermal Processes p. 13
- 2.1 Thermodynamics of Thermal Processes p. 13
- 2.2 Reaction Mechanisms p. 21
- 2.3 Kinetics of Thermal Processes p. 51
- 2.4 Influence of Operating Conditions p. 96
- References p. 121
- 3 Reaction Systems p. 125
- 3.1 Selection of Reactor Type p. 125
- 3.2 Reaction Systems p. 129
- References p. 135
- 4 Industrial Implementation of Thermal Processes p. 137
- 4.1 Thermal Cracking at High Pressures and Moderate Temperatures p. 137
- 4.2 Coking p. 163
- 4.3 Pyrolysis p. 190
- References p. 228
- 5 Elements of Reactor Design p. 233
- 5.1 Design of the Reaction Section of Tubular Furnaces p. 233
- 5.2 Design of Soakers, Coke Drums, and Reaction Chambers p. 258
- 5.3 Systems Using Solid Heat Carrier p. 259
- References p. 274
- Part II Processes on Acid Catalysts
- 6 Theoretical Basis of Catalytic Cracking p. 275
- 6.1 Process Thermodynamics p. 275
- 6.2 Cracking Catalysts p. 293
- 6.3 Reaction Mechanisms p. 311
- 6.4 Kinetics of Catalytic Cracking p. 327
- 6.5 Effect of Process Conditions p. 369
- 6.6 Catalyst Regeneration p. 403
- References p. 415
- 7 Industrial Catalytic Cracking p. 423
- 7.1 Feed Selection and Pretreatment p. 423
- 7.2 Process History, Types of Units p. 434
- 7.3 Characteristic Equipment p. 458
- 7.4 Operation Aspects p. 476
- 7.5 Catalyst Demetallation p. 482
- 7.6 Yield Estimation p. 484
- 7.7 Economic Data p. 486
- References p. 492
- 8 Design Elements for the Reactor-Regenerator System p. 495

- 8.1 Some Fluidization Problems p. 495
- 8.2 Fluidization with Solids Circulation p. 513
- 8.3 Reaction Systems p. 516
- 8.4 Catalyst Regeneration p. 526
- 8.5 Catalyst Entrainment p. 529
- 8.6 Catalyst Circulation, Transport Lines p. 533
- References p. 537
- 9 Other Processes on Acid Catalysts p. 539
- 9.1 Oligomerization p. 540
- 9.2 Isoparaffin-Olefin Alkylation p. 556
- References p. 582
- Part III Processes on Metallic Catalysts
- 10 Hydrofining and Hydrotreating p. 587
- 10.1 Process Thermodynamics p. 588
- 10.2 Catalysts p. 595
- 10.3 Reaction Mechanisms p. 598
- 10.4 Process Kinetics p. 608
- 10.5 Effect of Process Parameters p. 618
- 10.6 Industrial Hydrofining p. 623
- 10.7 Industrial Hydrotreating p. 628
- 10.8 Design Elements for the Reactor System p. 643
- References p. 645
- Part IV Processes Using Bifunctional Catalysts
- 11 Hydroisomerization of Alkanes p. 649
- 11.1 Thermodynamics of Hydroisomerization p. 649
- 11.2 Hydroisomerization Catalysts p. 651
- 11.3 Reaction Mechanism p. 653
- 11.4 Kinetics of Isomerization p. 655
- 11.5 Influence of Operating Parameters p. 662
- 11.6 Industrial Hydroisomerization of Lower Alkanes p. 665
- 11.7 Hydroisomerization of Lube Oils and Medium Fractions p. 674
- References p. 678
- 12 Hydrocracking p. 681
- 12.1 Thermodynamics of Hydrocracking p. 682
- 12.2 Catalysts p. 690
- 12.3 Reaction Mechanisms p. 694
- 12.4 Kinetics of Hydrocracking p. 698
- 12.5 Effect of Process Parameters p. 717
- 12.6 Commercial Hydrocracking of Distillates p. 725
- 12.7 Residue Hydrocracking p. 735
- 12.8 Processes Using Slurry Phase Reactors p. 739
- 12.9 Production of High Grade Oils by Hydrocracking p. 741
- References p. 746
- 13 Catalytic Reforming p. 749
- 13.1 Thermodynamics p. 750
- 13.2 Catalysts p. 757

- 13.3 Reaction Mechanisms p. 765
- 13.4 The Kinetics of Catalytic Reforming p. 771
- 13.5 The Effect of Process Parameters p. 786
- 13.6 Catalyst Regeneration p. 805
- 13.7 Commercial Processes p. 808
- 13.8 Elements of Design and Modeling p. 823
- 13.9 Production of Aromatics p. 833
- 13.10 Dehydropolymerization of Lower Alkanes p. 862
- References p. 872
- 14 Process Combinations and Complex Processing Schemes p. 879
- 14.1 Definition of Objectives p. 879
- 14.2 Evolution of the Range and Specifications of Products p. 881
- 14.3 Additional Resources p. 890
- 14.4 Initial Data for the Selection of Refinery Configuration p. 895
- 14.5 Approach for Establishing the Configuration of a Modern Refinery p. 899
- References p. 909
- Appendix Influence of the n/i-Alkanes Ratio in the Pyrolysis Feed on the Ethene/Propene Ratio in the Products p. 913
- Index p. 917
