

- Preface p. iii
- Contributors p. vii
- Part 1 Design Principles
- 1 Basic Principles Henry W. Stoll p. 1
- 2 Risk-Based Metallurgical Design Mario Solari p. 35
- Part 2 Alloy Design
- 3 Designing with Carbon-, Low-, and Medium-Alloy Steels Guoxun Liu p. 73
- 4 Designing with Tool Steel Lin-Jiang Yang and David N. Collins p. 169
- 5 Designing with High-Strength Low-Alloy Steels Lin Li and Luoping Xu p. 249
- 6 Designing with Microalloyed and Interstitial-Free Steels David V. Edmonds p. 321
- 7 Designing with Stainless Steel Joseph Ki Leuk Lai p. 355
- 8 Cast Iron Design: Processes, Alloys, and Properties Magnus Wessen and Ingvar L. Svensson p. 393
- 9 Designing with Aluminum Alloys Nack J. Kim p. 441
- 10 Designing with Magnesium: Alloys, Properties, and Casting Processes Trevor B. Abbott and Mark A. Easton and Carlos H. Caceres p. 487
- 11 Designing with Titanium Alloys Michelle L. McCann and John Fanning p. 539
- 12 Designing with Ni-Base Alloys Gerhard E. Fuchs and David U. Furrer p. 585
- 13 Designing with Copper Alloys Morris E. Fine and Junji Miyake p. 619
- 14 Designing with Powder Metallurgy Alloys Joseph W. Newkirk and Ronald A. Kohser p. 641
- 15 Designing with Metal-Matrix Composites Veikko K. Lindroos and J. T. Hellman and D. Lou and R. Nowak and E. Pagounis and X. W. Liu and I. M. Penttinen p. 667
- Index p. 729
