

- **Preface** (p. v)
- **1 Introduction** (p. 1)
- **Typical Measurement Systems** (p. 1)
- **Transducers** (p. 3)
- **Further Study: The Transducer** (p. 4)
- **Analog Signal Processing** (p. 5)
- **Sources of Variability: Noise** (p. 7)
- **Electronic Noise** (p. 10)
- **Signal-to-Noise Ratio** (p. 11)
- **Analog Filters: Filter Basics** (p. 12)
- **Filter Types** (p. 13)
- **Filter Bandwidth** (p. 14)
- **Filter Order** (p. 15)
- **Filter Initial Sharpness** (p. 16)
- **Analog-to-Digital Conversion: Basic Concepts** (p. 18)
- **Analog-to-Digital Conversion Techniques** (p. 19)
- **Quantization Error** (p. 20)
- **Further Study: Successive Approximation** (p. 21)
- **Time Sampling: Basics** (p. 24)
- **Further Study: Buffering and Real-Time Data Processing** (p. 27)
- **Data Banks** (p. 28)
- **Problems** (p. 28)
- **2 Basic Concepts** (p. 31)
- **Noise** (p. 31)
- **Ensemble Averaging** (p. 34)
- **MATLAB Implementation** (p. 35)
- **Data Functions and Transforms** (p. 37)
- **Convolution, Correlation, and Covariance** (p. 43)
- **Convolution and the Impulse Response** (p. 43)
- **Covariance and Correlation** (p. 46)
- **MATLAB Implementation** (p. 49)
- **Sampling Theory and Finite Data Considerations** (p. 53)
- **Edge Effects** (p. 57)
- **Problems** (p. 58)
- **3 Spectral Analysis: Classical Methods** (p. 61)
- **Introduction** (p. 61)
- **The Fourier Transform: Fourier Series Analysis** (p. 64)
- **Periodic Functions** (p. 64)
- **Symmetry** (p. 67)
- **Discrete Time Fourier Analysis** (p. 67)
- **Aperiodic Functions** (p. 69)
- **Frequency Resolution** (p. 71)
- **Truncated Fourier Analysis: Data Windowing** (p. 71)
- **Power Spectrum** (p. 74)
- **MATLAB Implementation** (p. 77)
- **Direct FFT and Windowing** (p. 77)

- **The Welch Method for Power Spectral Density Determination** (p. 80)
- **Widow Functions** (p. 82)
- **Problems** (p. 84)
- **4 Digital Filters** (p. 87)
- **The Z-Transform** (p. 87)
- **Digital Transfer Function** (p. 88)
- **MATLAB Implementation** (p. 90)
- **Finite Impulse Response (FIR) Filters** (p. 93)
- **FIR Filter Design** (p. 94)
- **Derivative Operation: The Two-Point Central Difference Algorithm** (p. 97)
- **MATLAB Implementation** (p. 101)
- **Infinite Impulse Response (IIR) Filters** (p. 106)
- **Filter Design and Application Using the MATLAB Signal Processing Toolbox** (p. 108)
- **FIR Filters** (p. 108)
- **Two-Stage FIR Filter Design** (p. 109)
- **Three-Stage Filter Design** (p. 111)
- **IIR Filters** (p. 117)
- **Two-Stage IIR Filter Design** (p. 118)
- **Three-Stage IIR Filter Design: Analog Style Filters** (p. 119)
- **Problems** (p. 123)
- **5 Spectral Analysis: Modern Techniques** (p. 125)
- **Parametric Model-Based Methods** (p. 125)
- **MATLAB Implementation** (p. 131)
- **Non-Parametric Eigenanalysis Frequency Estimation** (p. 136)
- **MATLAB Implementation** (p. 138)
- **Problems** (p. 144)
- **6 Time-Frequency Methods** (p. 147)
- **Basic Approaches** (p. 147)
- **Short-Term Fourier Transform: The Spectrogram** (p. 148)
- **Wigner-Ville Distribution: A Special Case of Cohen's Class** (p. 149)
- **Choi-Williams and Other Distributions** (p. 154)
- **Analytic Signal** (p. 155)
- **MATLAB Implementation** (p. 156)
- **The Short-Term Fourier Transform** (p. 156)
- **Wigner-Ville Distribution** (p. 162)
- **Choi-Williams and Other Distributions** (p. 167)
- **Problems** (p. 172)
- **7 The Wavelet Transform** (p. 177)
- **Introduction** (p. 177)
- **The Continuous Wavelet Transform** (p. 178)
- **Wavelet Time--Frequency Characteristics** (p. 180)
- **MATLAB Implementation** (p. 183)
- **The Discrete Wavelet Transform** (p. 186)
- **Filter Banks** (p. 188)
- **The Relationship Between Analytical Expressions and Filter Banks** (p. 192)

- **MATLAB Implementation** (p. 194)
- **Denoising** (p. 200)
- **Discontinuity Detection** (p. 203)
- **Feature Detection: Wavelet Packets** (p. 206)
- **Problems** (p. 210)
- **8 Advanced Signal Processing Techniques: Optimal and Adaptive Filters** (p. 213)
- **Optimal Signal Processing: Wiener Filters** (p. 213)
- **MATLAB Implementation** (p. 216)
- **Adaptive Signal Processing** (p. 222)
- **Adaptive Noise Cancellation** (p. 226)
- **MATLAB Implementation** (p. 227)
- **Phase Sensitive Detection** (p. 233)
- **AM Modulation** (p. 234)
- **Phase Sensitive Detectors** (p. 236)
- **MATLAB Implementation** (p. 238)
- **Problems** (p. 241)
- **9 Multivariate Analyses: Principal Component Analysis and Independent Component Analysis** (p. 243)
- **Introduction** (p. 243)
- **Principal Component Analysis** (p. 246)
- **Order Selection** (p. 251)
- **MATLAB Implementation** (p. 251)
- **Data Rotation** (p. 251)
- **Principal Component Analysis Evaluation** (p. 254)
- **Independent Component Analysis** (p. 259)
- **MATLAB Implementation** (p. 265)
- **Problems** (p. 270)
- **10 Fundamentals of Image Processing: MATLAB Image Processing Toolbox** (p. 271)
- **Image Processing Basics: MATLAB Image Formats** (p. 271)
- **General Image Formats: Image Array Indexing** (p. 271)
- **Data Classes: Intensity Coding Schemes** (p. 273)
- **Data Formats** (p. 275)
- **Data Conversions** (p. 275)
- **Image Display** (p. 278)
- **Image Storage and Retrieval** (p. 284)
- **Basic Arithmetic Operations** (p. 285)
- **Advanced Protocols: Block Processing** (p. 292)
- **Sliding Neighborhood Operations** (p. 293)
- **Distinct Block Operations** (p. 298)
- **Problems** (p. 301)
- **11 Image Processing: Filters, Transformations, and Registration** (p. 303)
- **Spectral Analysis: The Fourier Transform** (p. 303)
- **MATLAB Implementation** (p. 305)
- **Linear Filtering** (p. 308)
- **MATLAB Implementation** (p. 310)

- **Filter Design** (p. 311)
- **Spatial Transformations** (p. 320)
- **MATLAB Implementation** (p. 322)
- **Affine Transformations** (p. 321)
- **General Affine Transformations** (p. 324)
- **Projective Transformations** (p. 326)
- **Image Registration** (p. 331)
- **Unaided Image Registration** (p. 333)
- **Interactive Image Registration** (p. 337)
- **Problems** (p. 339)
- **12 Image Segmentation** (p. 343)
- **Pixel-Based Methods** (p. 343)
- **Threshold Level Adjustment** (p. 344)
- **MATLAB Implementation** (p. 349)
- **Continuity-Based Methods** (p. 352)
- **MATLAB Implementation** (p. 353)
- **Multi-Thresholding** (p. 360)
- **Morphological Operations** (p. 362)
- **MATLAB Implementation** (p. 364)
- **Edge-Based Segmentation** (p. 368)
- **MATLAB Implementation** (p. 371)
- **Problems** (p. 372)
- **13 Image Reconstruction** (p. 375)
- **CT, PET, and SPECT** (p. 376)
- **Fan Beam Geometry** (p. 382)
- **MATLAB Implementation** (p. 383)
- **Radon Transform** (p. 383)
- **Inverse Radon Transform: Parallel Beam Geometry** (p. 385)
- **Radon and Inverse Radon Transform: Fan Beam Geometry** (p. 388)
- **Magnetic Resonance Imaging** (p. 390)
- **Basic Principles** (p. 390)
- **Data Acquisition: Pulse Sequences** (p. 394)
- **Functional MRI** (p. 396)
- **MATLAB Implementation** (p. 398)
- **Principal Component and Independent Component Analysis** (p. 402)
- **Problems** (p. 407)
- **Annotated Bibliography** (p. 409)
- **Index** (p. 413)
