

- Preface p. v
- 1. Introduction p. 1
- 1.1 Structure of This Book p. 1
- 2.1 Difference Between Groove Rolling and Flat Rolling p. 9
- 1.2 Evolution of Rod and Bar Rolling Processes p. 4
- References p. 8
- 2. Bar and Rod Rolling Processes p. 9
- 2.2 Mill Stands and Equipment p. 15
- 2.3 The Three-Roll Rolling Technology p. 25
- References p. 27
- 3. Fundamentals of Deformation and Heat Transfer p. 29
- 3.1 Introduction p. 29
- 3.2 Microstructure of Metal p. 31
- 3.3 Deformation Mechanism p. 36
- 3.4 Description of Deformation Procedure p. 38
- 3.5 Elements of Elasticity Theory p. 40
- 3.6 Elements of Plasticity Theory p. 47
- 3.7 Heat Transfer p. 59
- References p. 72
- 4. Experiments p. 75
- 4.1 Introduction p. 75
- 4.2 Reverse Rolling p. 76
- 4.3 Continuous Rolling p. 82
- 4.4 Experimental Data p. 88
- References p. 106
- 5. Theories of Rod and Bar Rolling p. 109
- 5.1 Introduction p. 109
- 5.2 Theories of Flat Rolling p. 113
- 5.3 Prediction of Stress-Free Surface Profile of the Workpiece p. 120
- 5.4 Effective Roll Diameter and Rolling Speed p. 157
- 5.5 Calculation of Strain and Strain Rate p. 172
- 5.6 Constitutive Equation of Carbon Steels Subjected to High Temperature and High Strain Rate p. 195
- 5.7 Roll Force and Torque p. 221
- 5.8 Analysis of Interstand Tension p. 245
- 5.9 Analysis of Forward and Backward Slip p. 262
- References p. 274
- 6. Applications to Rolling p. 279
- 6.1 Introduction p. 279
- 6.2 Exit Cross-Sectional Shape (Two-Roll Rolling System) p. 281
- 6.3 Exit Cross-Sectional Shape (Three-Roll Rolling System) p. 292
- 6.4 Temperature Prediction of Stock During Rolling and Precooling p. 305
- 6.5 Roll Wear p. 325
- References p. 352
- 7. Application to Thermomechanical Controlled Processing p. 357
- 7.1 Introduction p. 357

- 7.5 Microstructure Analysis Using the Finite Element Method p. 437
- 7.2 Fundamentals of Recrystallization p. 361
- 7.3 Procedures to Obtain the Equations for Recrystallization Behavior and AGS Evolution, and Their Applications p. 384
- 7.4 Integrated Rod Process Simulation System p. 415
- References p. 456
- Index p. 461
