

- **Part I Images as Multidimensional Signals** (p. 1)
- **Chapter 1 Analogue (Continuous-Space) Image Representation** (p. 3)
- **1.1 Multidimensional Signals as Image Representation** (p. 3)
- **1.2 Two-Dimensional Fourier Transform** (p. 9)
- **1.3 Two-Dimensional Continuous-Space Systems** (p. 19)
- **1.4 Concept of Stochastic Images** (p. 33)
- **Chapter 2 Digital Image Representation** (p. 55)
- **2.1 Digital Image Representation** (p. 55)
- **2.2 Discrete Two-Dimensional Operators** (p. 67)
- **2.3 Discrete Two-Dimensional Linear Transforms** (p. 89)
- **2.4 Discrete Stochastic Images** (p. 125)
- **References for Part I** (p. 133)
- **Part II Imaging Systems as Data Sources** (p. 135)
- **Chapter 3 Planar X-Ray Imaging** (p. 137)
- **3.1 X-Ray Projection Radiography** (p. 137)
- **3.2 Subtractive Angiography** (p. 152)
- **Chapter 4 X-Ray Computed Tomography** (p. 155)
- **4.1 Imaging Principle and Geometry** (p. 155)
- **4.2 Measuring Considerations** (p. 164)
- **4.3 Imaging Properties** (p. 166)
- **4.4 Postmeasurement Data Processing in Computed Tomography** (p. 172)
- **Chapter 5 Magnetic Resonance Imaging** (p. 177)
- **5.1 Magnetic Resonance Phenomena** (p. 178)
- **5.2 Response Measurement and Interpretation** (p. 188)
- **5.3 Basic MRI Arrangement** (p. 198)
- **5.4 Localization and Reconstruction of Image Data** (p. 201)
- **5.5 Image Quality and Artifacts** (p. 231)
- **5.6 Postmeasurement Data Processing in MRI** (p. 239)
- **Chapter 6 Nuclear Imaging** (p. 245)
- **6.1 Planar Gamma Imaging** (p. 247)
- **6.2 Single-Photon Emission Tomography** (p. 258)
- **6.3 Positron Emission Tomography** (p. 265)
- **Chapter 7 Ultrasonography** (p. 283)
- **7.1 Two-Dimensional Echo Imaging** (p. 285)
- **7.2 Flow Imaging** (p. 313)
- **7.3 Three-Dimensional Ultrasonography** (p. 325)
- **Chapter 8 Other Modalities** (p. 335)
- **8.1 Optical and Infrared Imaging** (p. 335)
- **8.2 Electron Microscopy** (p. 341)
- **8.3 Electrical Impedance Tomography** (p. 350)
- **References for Part II** (p. 355)
- **Part III Image Processing and Analysis** (p. 361)
- **Chapter 9 Reconstructing Tomographic Images** (p. 365)
- **9.1 Reconstruction from Near-Ideal Projections** (p. 366)
- **9.2 Reconstruction from Nonideal Projections** (p. 398)
- **9.3 Other Approaches to Tomographic Reconstruction** (p. 409)

- **Chapter 10 Image Fusion** (p. 417)
- **10.1 Ways to Consistency** (p. 419)
- **10.2 Disparity Analysis** (p. 460)
- **10.3 Image Registration** (p. 470)
- **10.4 Image Fusion** (p. 481)
- **Chapter 11 Image Enhancement** (p. 495)
- **11.1 Contrast Enhancement** (p. 496)
- **11.2 Sharpening and Edge Enhancement** (p. 510)
- **11.3 Noise Suppression** (p. 525)
- **11.4 Geometrical Distortion Correction** (p. 538)
- **Chapter 12 Image Restoration** (p. 539)
- **12.1 Correction of Intensity Distortions** (p. 541)
- **12.2 Geometrical Restitution** (p. 545)
- **12.3 Inverse Filtering** (p. 546)
- **12.4 Restoration Methods Based on Optimization** (p. 559)
- **12.5 Homomorphic Filtering and Deconvolution** (p. 590)
- **Chapter 13 Image Analysis** (p. 593)
- **13.1 Local Feature Analysis** (p. 594)
- **13.2 Image Segmentation** (p. 615)
- **13.3 Generalized Morphological Transforms** (p. 652)
- **Chapter 14 Medical Image Processing Environment** (p. 675)
- **14.1 Hardware and Software Features** (p. 676)
- **14.2 Principles of Image Compression for Archiving and Communication** (p. 685)
- **14.3 Present Trends in Medical Image Processing** (p. 701)
- **References for Part III** (p. 705)
- **Index** (p. 711)
