

- Contributors p. xi
- 1. Overview of Polymer Blends Characterization Charles C. Han p. 1
- 2. Application of Differential Scanning Calorimetry to Analysis of Polymer Blends Robert A. Shanks and Gandara Amarasinghe p. 22
- 3. Dynamic Mechanical Analysis Kazuo Nakayama p. 68
- 4. Dielectric Relaxation and Thermal Stimulated Currents George P. Simon and Andreas Schonhals p. 96
- 5. Polarized Light Optical Microscopy Rosario Elida Suman Bretas p. 131
- 6. Infrared Analysis Michael M. Coleman and Paul C. Painter p. 155
- 7. Fracture Behavior of Polymer Blends Shing-Chung Wong and Yiu-Wing Mai and Xiaohong Chen p. 191
- 8. Thermogravimetry Giovanni Camino and Paola Sandrucci p. 235
- 9. Tensile Properties, Creep, and Stress Relaxation Bela Pukanszky and Karoly Belina p. 263
- 10. Gas Permeability in Polymer Blends Lloyd M. Robeson p. 288
- 11. Light and X-ray Scatterings Hiromu Saito and Takashi Inoue p. 313
- 12. Small-Angle Neutron Scattering in Polymer Blends Dietmar Schwahn p. 346
- 13. Characterization of Polymer Blends Using Rheological Methods Abdellah Ajji p. 370
- 14. Positron Annihilation Lifetime Spectroscopy Anita J. Hill p. 401
- 15. Electron Microscopy of Polymer Blends David C. Bassett and Alun S. Vaughan p. 436
- 16. Nuclear Magnetic Resonance Studies of Polymer Blends Andrew K. Whittaker p. 461
- Index p. 505
