

- Section I Fundamentals
- 1 Earthquakes: A Historical Perspective Charles Scawthorn p. 1
  - 1.1 Introduction p. 1
  - 1.2 Review of Historical Earthquakes p. 6
- 2 Earthquake Risk Management: An Overview Charles Scawthorn p. 1
  - 2.1 Introduction p. 1
  - 2.2 Overview of Earthquake Risk p. 2
  - 2.3 Identifying the Assets at Risk p. 2
  - 2.4 Earthquake Hazard p. 3
  - 2.5 Earthquake Damage and Loss p. 4
  - 2.6 Mitigation Alternatives p. 7
  - 2.7 Earthquake Risk Management Decision-Making p. 9
  - 2.8 Earthquake Risk Management Program p. 13
  - 2.9 Summary p. 14
- 3 Dynamics of Structures Jorma K. Arros p. 1
  - 3.1 Introduction p. 1
  - 3.2 Single-Degree-of-Freedom System p. 2
  - 3.3 Multidegree-of-Freedom Systems p. 23
- Section II Geoscience Aspects
- 4 Earthquakes: Seismogenesis, Measurement, and Distribution Charles Scawthorn p. 1
  - 4.1 Introduction p. 1
  - 4.2 Causes of Earthquakes and Faulting p. 2
  - 4.3 Measurement of Earthquakes p. 6
  - 4.4 Global Distribution of Earthquakes p. 21
  - 4.5 Characterization of Seismicity p. 44
- 5 Engineering Models of Strong Ground Motion Kenneth W. Campbell p. 1
  - 5.1 Introduction p. 1
  - 5.2 The Attenuation Relation p. 2
  - 5.3 Model Parameters p. 4
  - 5.4 Statistical Methods p. 14
  - 5.5 Theoretical Methods p. 18
  - 5.6 Engineering Models p. 23
  - 5.7 Engineering Evaluation p. 60
- 6 Simulation Modeling of Strong Ground Motion Mustafa Erdik and Eser Durukal p. 1
  - 6.1 Introduction p. 1
  - 6.2 Earthquake Source Models p. 3
  - 6.3 Time Domain Characteristics of Strong Ground Motion p. 13
  - 6.4 Frequency Domain Characteristics of Strong Ground Motion p. 17
  - 6.5 Radiation Pattern and Directivity p. 21
  - 6.6 Simulation of Strong Ground Motion p. 26
- 7 Geotechnical and Foundation Aspects Horst G. Brandes p. 1
  - 7.1 Introduction p. 1
  - 7.2 Seismic Hazards p. 2
  - 7.3 Strong Ground Motion p. 12
  - 7.4 Dynamic Soil Behavior p. 27
  - 7.5 Liquefaction p. 31

- 7.6 Seismic Analysis of Slopes and Dams p. 43
- 7.7 Earthquake-Resistant Design of Retaining Walls p. 47
- 7.8 Soil Remediation Techniques for Mitigation of Seismic Hazards p. 53
- 8 Seismic Hazard Analysis Paul C. Thenhaus and Kenneth W. Campbell p. 1
- 8.1 Introduction p. 2
- 8.2 Probabilistic Seismic Hazard Methodology p. 2
- 8.3 Constituent Models of the Probabilistic Seismic Hazard Methodology p. 4
- 8.4 Definition of Seismic Sources p. 6
- 8.5 Earthquake Frequency Assessments p. 10
- 8.6 Maximum Magnitude Assessments p. 19
- 8.7 Ground Motion Attenuation Relationships p. 23
- 8.8 Accounting for Uncertainties p. 24
- 8.9 Typical Engineering Products of PSHA p. 26
- 8.10 PSHA Disaggregation p. 28
- 8.11 PSHA Case Study p. 31
- 8.12 The Owen Fracture Zone-Murray Ridge Complex p. 35
- 8.13 Makran Subduction Zone p. 37
- 8.14 Southwestern India and Southern Pakistan p. 38
- 8.15 Southeastern Arabian Peninsula and Northern Arabian Sea p. 39
- 8.16 Ground Motion Models p. 40
- 8.17 Soil Amplification Factors p. 42
- 8.18 Results p. 42
- 8.19 Conclusions p. 42
- 8.20 PSHA Computer Codes p. 43
- 9 Tsunami and Seiche Costas Synolakis p. 1
- 9.1 Introduction p. 1
- 9.2 Tsunamis vs. Wind Waves p. 2
- 9.3 Tectonic Tsunami Sources p. 13
- 9.4 Initial Waves Generated by Submarine Landslides p. 19
- 9.5 Exact Solutions of the Shallow-Water (SW) Equations p. 25
- 9.6 Numerical Solutions for Calculating Tsunami Inundation p. 46
- 9.7 Harbor and Basin Oscillations p. 53
- 9.8 Tsunami Forces p. 67
- 9.9 Producing Inundation Maps p. 79
- 10 Soil-Structure Interaction James J. Johnson p. 1
- 10.1 Soil-Structure Interaction: Statement of the Problem p. 1
- 10.2 Specification of the Free-Field Ground Motion p. 4
- 10.3 Modeling of the Soil p. 19
- 10.4 Soil-Structure Interaction Analysis p. 22
- 10.5 Soil-Structure Interaction Response p. 28
- Section III Structural Aspects
- 11 Building Code Provisions for Seismic Resistance Ronald O. Hamburger p. 1
- 11.1 Introduction p. 1
- 11.2 Historical Development p. 2
- 11.3 2000 NEHRP Recommended Provisions p. 11
- 11.4 Performance-Based Design Codes p. 25

- 12 Seismic Design of Steel Structures Ronald O. Hamburger and Niaz A. Nazir p. 1
- 12.1 Introduction p. 1
- 12.2 Historic Development and Performance of Steel Structures p. 2
- 12.3 Steel Making and Steel Material p. 8
- 12.4 Structural Systems p. 21
- 12.5 Unbraced Frames p. 29
- Appendix A Design Procedure for a Typical Reduced Beam Section-Type Connection p. 41
- 13 Reinforced Concrete Structures Y. L. Mo p. 1
- 13.1 Introduction p. 1
- 13.2 Basic Concepts p. 2
- 13.3 Seismic Behavior p. 5
- 13.4 Analytical Models p. 12
- 13.5 Seismic Design p. 25
- 13.6 Seismic Retrofit p. 40
- 14 Precast and Tilt-Up Buildings Charles Scawthorn and David L. McCormick p. 1
- 14.1 Introduction p. 1
- 14.2 Precast and Tilt-Up Buildings p. 2
- 14.3 Performance of Precast and Tilt-Up Buildings in Earthquakes p. 7
- 14.4 Code Provisions for Precast and Tilt-Up Buildings p. 10
- 14.5 Seismic Evaluation and Rehabilitation of Tilt-Up Buildings p. 15
- 15 Wood Structures J. Daniel Dolan p. 1
- 15.1 Introduction p. 1
- 15.2 Wood As a Material p. 6
- 15.3 Seismic Performance of Wood Buildings p. 8
- 15.4 Design Considerations p. 12
- 15.5 Resistance Determination p. 13
- 15.6 Diaphragms p. 21
- 15.7 Shear Walls p. 25
- 15.8 Connections p. 35
- 16 Seismic Behavior, Design, and Retrofitting of Masonry Richard E. Klingner p. 1
- 16.1 Introduction p. 1
- 16.2 Masonry in the United States p. 2
- 16.3 Performance of Masonry in U.S. Earthquakes p. 8
- 16.7 Seismic Retrofitting of Historical Masonry in the United States p. 29
- 16.4 Fundamental Basis for Seismic Design of Masonry in the United States p. 16
- 16.5 Masonry Design Codes Used in the United States p. 19
- 16.6 Analysis Approaches for Modern U.S. Masonry p. 25
- 17 Base Isolation Yeong-Bin Yang and Kuo-Chun Chang and Jong-Dar Yau p. 1
- 17.1 Introduction p. 1
- 17.2 Philosophy behind Seismic Isolation Systems p. 4
- 17.3 Basic Requirements of Seismic Isolation Systems p. 7
- 17.4 Design Criteria for Isolation Devices p. 9
- 17.5 Design of High Damping Rubber Bearings p. 9
- 17.6 Design of Lead Rubber Bearings p. 15
- 17.7 Design of Friction Pendulum Systems p. 18

- 17.8 Design Examples p. 19
- 17.9 Concluding Remarks p. 30
- 18 Bridges Lian Duan and Wai-Fah Chen p. 1
- 18.1 Introduction p. 1
- 18.2 Earthquake Damages to Bridges p. 1
- 18.3 Seismic Design Philosophies p. 2
- 18.4 Seismic Conceptual Design p. 5
- 18.5 Seismic Performance Criteria p. 9
- 18.6 Seismic Design Approaches p. 15
- 18.7 Seismic Analysis and Modeling p. 31
- 18.8 Seismic Detailing Requirements p. 37
- 19 Structural Control Hirokazu Iemura and Mulyo Harris Pradono p. 1
- 19.1 Introduction p. 1
- 19.2 Structural Control Concepts p. 5
- 19.3 Structural Control Hardware and Software p. 7
- 19.4 Examples of the Application of Semiactive Control p. 13
- 19.5 Concluding Remarks p. 26
- 20 Equipment and Systems Gayle S. Johnson p. 1
- 20.4 Design Practices p. 14
- 20.1 Introduction p. 1
- 20.2 Importance of Equipment Seismic Functionality p. 2
- 20.3 Historical Performance p. 3
- 20.5 Code Provisions p. 17
- 20.6 Assessment of Existing Facilities p. 23
- 20.7 Nonstructural Damage p. 45
- 21 Seismic Vulnerability Keith A. Porter p. 1
- 21.1 Introduction p. 1
- 21.2 Method 1: Statistical Approach p. 6
- 21.3 Method 2: Expert Opinion p. 14
- 21.4 Analytical Methods: General p. 17
- 21.5 Validation of Vulnerability Functions p. 30
- 21.6 Catalog of Vulnerability Functions p. 31
- 21.7 Uses of Vulnerability Functions p. 39
- 21.8 Closing Remarks p. 41
- Section IV Infrastructure Aspects
- 22 Lifeline Seismic Risk Ronald T. Eguchi p. 1
- 22.1 Introduction p. 1
- 22.2 Brief History of Lifeline Earthquake Engineering in the United States p. 2
- 22.3 Nonlinearity of Earthquakes p. 4
- 22.4 Indirect Economic Losses p. 6
- 22.5 Cost-Effective Mitigation Strategies p. 7
- 22.6 Federal and Industry Lifeline Initiatives p. 8
- 22.7 Lifeline Seismic Risk p. 8
- 23 Buried Pipelines Michael J. O'Rourke p. 1
- 23.1 Introduction p. 1
- 23.2 Pipeline Performance in Past Earthquakes p. 2

- 23.3 PGD Hazard Quantification p. 6
- 23.4 Wave Propagation Hazard Quantification p. 11
- 23.5 Pipe Failure Modes and Failure Criterion p. 14
- 23.6 Pipeline Response to Faulting p. 17
- 23.7 Pipeline Response to Longitudinal PGD p. 21
- 23.8 Pipeline Response to Transverse PGD p. 24
- 23.9 Pipeline Response to Wave Propagation p. 28
- 23.10 Countermeasures to Mitigate Seismic Damage p. 33
- 24.3 Analysis Overview p. 6
- 24 Water and Wastewater Systems Donald B. Ballantyne p. 1
- 24.1 Introduction p. 1
- 24.2 Performance Objectives p. 5
- 24.4 Hazards p. 7
- 24.5 Pipe Vulnerability and Damage Algorithms p. 11
- 24.6 System Component Vulnerability p. 18
- 24.7 System Assessment p. 22
- 24.8 Mitigation Alternatives p. 23
- 24.9 Summary and Conclusions p. 34
- 25.1 Introduction p. 1
- 25.2 Historical Response of Electrical Power Systems to Earthquakes p. 7
- 25.3 Code Provision, Standards and Guidelines for Electrical Systems p. 10
- 25.4 Earthquake Preparedness p. 10
- 25.5 Earthquake Hazard and System Vulnerability Evaluation p. 11
- 25.6 Earthquake Preparedness--Disaster-Response Planning p. 13
- 25.7 Earthquake Preparedness--Earthquake Mitigation p. 14
- 25.8 Earthquake Preparedness--Mitigation p. 17
- 25.9 Closing Remarks p. 23
- 26 Dams and Appurtenant Facilities Gilles J. Bureau p. 1
- 26.1 Introduction p. 1
- 26.2 Dams and Earthquakes p. 2
- 26.3 Seismic Vulnerability of Existing Dams p. 9
- 26.4 Seismic Evaluation of Dams p. 12
- 26.5 Seismic Upgrade of Existing Dams p. 35
- 26.6 Seismic Design of New Dams p. 36
- 26.7 Seismic Instrumentation of Dams p. 38
- 27 Port Structures Susumu Iai p. 1
- 27.1 Introduction p. 1
- 27.2 Seismic Response of Port Structures p. 1
- 27.3 Current Seismic Provisions for Port Structures p. 13
- 27.4 Seismic Performance-Based Design p. 15
- 27.5 Seismic Performance Evaluation and Analysis p. 17
- 27.6 Methods for Analysis of Retaining/Earth Structures p. 19
- 27.7 Analysis Methods for Open Pile/Frame Structures p. 20
- 28.3 A Standardized Earthquake Injury Classification Scheme p. 7
- 25 Electrical Power Systems Anshel J. Schiff p. 1
- Section V Special Topics

- 28 Human Impacts of Earthquakes Hope A. Seligson and Kimberley I. Shoaf p. 1
- 28.1 Introduction p. 1
- 28.2 Casualties in Historic Earthquakes p. 2
- 28.4 Casualty Estimation Methodology p. 11
- 28.5 Casualty Mitigation and Prevention p. 19
- 28.6 Public Health Impacts p. 20
- 28.7 Shelter Requirements p. 23
- 28.8 Closing Remarks p. 25
- 29 Fire Following Earthquakes Charles Scawthorn p. 1
- 29.1 Introduction p. 1
- 29.2 Fires following Selected Earthquakes p. 3
- 29.3 Analysis p. 31
- 29.4 Mitigation p. 46
- 29.5 Conclusion p. 59
- 30 Hazardous Materials: Earthquake-Caused Incidents and Mitigation Approaches Guna Selvaduray p. 1
- 30.1 Introduction and Significance of Earthquake-Caused Hazardous Materials Incidents p. 2
- 30.2 The Loma Prieta Earthquake p. 5
- 30.3 The Northridge Earthquake p. 8
- 30.4 The Hanshin-Awaji Earthquake p. 10
- 30.5 Earthquake-Caused HAZMAT Incidents at Educational Institutions and Laboratories p. 12
- 30.6 Damage and Corrective Actions at Japanese Petroleum Facilities p. 18
- 30.7 Lessons Learned p. 20
- 30.8 Mitigation Approaches p. 24
- 30.9 Problem Areas That Must Be Addressed p. 27
- 30.10 Conclusions p. 27
- 31 Loss Estimation Mahmoud Khater and Charles Scawthorn and James J. Johnson p. 1
- 31.1 Introduction and Overview p. 1
- 31.2 Why Do We Need Loss Estimation? p. 2
- 31.3 History of Loss Estimation p. 4
- 31.4 Loss Modeling p. 4
- 31.5 The Hazard Module p. 9
- 31.6 Seismic Vulnerability Models p. 12
- 31.7 Damage and Loss Estimation p. 13
- 31.8 HAZUS Earthquake Loss Estimation Software p. 16
- 31.9 Applications of Loss Estimation p. 18
- 32 Insurance and Financial Risk Transfer Charles Scawthorn and Howard Kunreuther and Richard Roth, Jr. p. 1
- 32.1 Introduction p. 1
- 32.2 Insurance and the Insurance Industry p. 2
- 32.3 Earthquake Insurance p. 8
- 32.4 Earthquake Insurance Risk Assessment p. 11
- 32.5 Government Earthquake Insurance Pools p. 20
- 32.6 Alternative Risk Transfer p. 26

- 32.7 Summary p. 29
- 33 Emergency Planning Charles Scawthorn p. 1
- 33.1 Introduction p. 1
- 33.2 Planning for Emergencies p. 3
- 33.3 Writing the Emergency Plan p. 10
- 33.4 The Emergency Operations Center (EOC) p. 24
- 33.5 Training and Maintenance of the Emergency Plan p. 25
- 33.6 Summary: Developing an Emergency Plan p. 27
- Appendix A p. 29
- Appendix B p. 35
- 34 Developing an Earthquake Mitigation Program Charles Scawthorn p. 1
- 34.1 Introduction p. 1
- 34.2 Overview of an Earthquake Mitigation Program p. 2
- 34.3 Phase 0: Pre-Program Activities p. 2
- 34.4 Phase 1: Assessing the Problem p. 4
- 34.5 Phase 2: Developing the Program p. 7
- 34.6 Phase 3: Implementing the Program p. 12
- 34.7 Maintaining the Program p. 19
- Index p. 1
