

- Chapter 1 Lithography p. 1
- Introduction p. 1
- Historical Note: Lithography's Origins p. 1
- Photolithography Overview p. 2
- Critical Dimension, Overall Resolution, Line Width p. 14
- Lithographic Sensitivity and Intrinsic Resist Sensitivity (Photochemical Quantum Efficiency) p. 14
- Resist Profiles p. 16
- Contrast and Experimental Determination of Lithographic Sensitivity p. 19
- Resolution in Photolithography p. 21
- Photolithography Resolution Enhancement Technology p. 32
- Beyond Moore's Law p. 44
- Next-Generation Lithographies p. 48
- Emerging Lithography Technologies p. 58
- Examples p. 68
- Problems p. 70
- References p. 71
- Chapter 2 Pattern Transfer with Dry Etching Techniques p. 77
- Introduction p. 77
- Dry Etching: Definitions and Jargon p. 78
- Plasmas or Discharges p. 79
- Physical Etching: Ion Etching or Sputtering and Ion-Beam Milling p. 88
- Plasma Etching (Radical Etching) p. 93
- Physical/Chemical Etching p. 97
- Deep Reactive Ion Etching (DRIE) p. 104
- Vapor-Phase Etching without Plasma (XeF_2) p. 107
- Dry Etching Models--In Situ Monitoring p. 108
- Comparing Wet and Dry Etching p. 110
- Examples p. 110
- Problems p. 116
- References p. 118
- Chapter 3 Pattern Transfer with Additive Techniques p. 123
- Introduction p. 123
- Silicon Growth p. 125
- Doping of Si p. 127
- Oxidation of Silicon p. 131
- Physical Vapor Deposition p. 134
- Chemical Vapor Deposition p. 144
- Silk-Screening or Screen Printing p. 154
- Sol-Gel Deposition Technique p. 156
- Doctor's Blade or Tape Casting p. 157
- Plasma Spraying p. 157
- Deposition and Arraying Methods of Organic Layers in BIOMEMS p. 159
- Thin vs. Thick Film Deposition p. 168
- Selection Criteria for Deposition Method p. 170
- Examples p. 170

- Problems p. 174
- References p. 178
- Chapter 4 Wet Bulk Micromachining p. 183
 - Introduction p. 183
 - Historical Note p. 184
 - Silicon Crystallography p. 185
 - Silicon as Substrate p. 193
 - Silicon as a Mechanical Element in MEMS p. 195
 - Other Si Sensor Properties p. 204
 - Wet Isotropic and Anisotropic Etching p. 206
 - Etching with Bias and/or Illumination of the Semiconductor p. 228
 - Etch-Stop Techniques p. 232
 - Issues in Wet Bulk Micromachining p. 239
 - Computer Simulation Software p. 245
 - Examples p. 245
 - Problems p. 250
 - References p. 251
- Chapter 5 Surface Micromachining p. 259
 - Introduction p. 259
 - Historical Note p. 260
 - Mechanical Properties of Thin Films p. 261
 - Surface Micromachining Processes p. 272
 - Poly-Si Surface Micromachining Modifications p. 283
 - Surface Micromachining Modifications Not Involving Polysilicon p. 287
 - Comparison of Bulk Micromachining with Surface Micromachining p. 292
 - Materials Case Studies p. 293
 - Examples p. 306
 - Problems p. 313
 - References p. 315
- Chapter 6 Liga and Micromolding p. 325
 - Introduction p. 325
 - Liga--Background p. 325
 - Liga and Liga-Like Process Steps p. 330
 - Examples p. 369
 - Problems p. 371
 - References p. 373
- Chapter 7 A Comparison of Miniaturization Techniques: Top-Down and Bottom-Up Manufacturing p. 379
 - Introduction p. 379
 - Absolute and Relative Tolerance in Manufacturing p. 380
 - Historical Note: Human Manufacturing p. 381
 - Section I Top-Down Manufacturing Methods p. 385
 - Section II Bottom-Up Approaches p. 423
 - Examples p. 456
 - Problems p. 458
 - References p. 460

- Chapter 8 Modeling, Brains, Packaging, Sample Preparation, and Substrate Choice p. 467
 - Introduction p. 467
 - Modeling p. 468
 - Brains in MEMS p. 473
 - Packaging p. 478
 - Sample Preparation in Molecular Diagnostics p. 512
 - Substrate Choice p. 518
 - Examples p. 522
 - Problems p. 523
 - References p. 524
- Chapter 9 Scaling, Actuators, and Power in Miniaturized Systems p. 535
 - Introduction p. 535
 - Scaling p. 536
 - Actuators p. 547
 - Fluidics p. 579
 - Thermal Actuators p. 587
 - Scaling in Analytical Separation Equipment p. 593
 - Other Actuators p. 600
 - Power in MEMS p. 600
 - Examples p. 602
 - Problems p. 605
 - References p. 606
- Chapter 10 Miniaturization Applications p. 615
 - Introduction p. 615
 - Definitions and Classification Method p. 616
 - Decision Tree p. 621
 - Overall Market for Micromachines p. 624
 - MEMS in the Automotive Market p. 630
 - MEMS in Medical and Biomedical Markets p. 639
 - Environmental Monitoring p. 650
 - Industrial/Automation p. 655
 - IT/Peripheral p. 658
 - Telecommunications p. 661
 - Problems p. 664
 - References p. 666
- Appendix A Metrology Techniques for MEMS p. 669
- Appendix B Living Book p. 671
- Appendix C Si and SiO₂ Etch Rates in KOH p. 673
- Appendix D Genetics p. 675
 - The 20 Amino Acids Found in Biological Systems p. 675
 - The Genetic Code p. 677
- Appendix E Suggested Further Reading p. 679
 - Books on Top-Down and Bottom-Up Miniaturization p. 679
 - Journals and Periodicals on Micromachining and Sensors p. 682
 - Series on Micromachining and Sensors p. 682

- Market Studies on Micromachining and Sensors p. 683
- Important Proceedings/Conferences on Micromachining and Sensors p. 683
- Appendix F MEMS Companies p. 685
- Appendix G Glossary p. 687
- Index p. 703
