

- Chapter 1 Introduction to Materials Applications p. 1
- 1.1 Classes of Materials p. 1
- 1.2 Structural Applications p. 4
- 1.3 Electronic Applications p. 6
- 1.4 Thermal Applications p. 8
- 1.5 Electrochemical Applications p. 9
- 1.6 Environmental Applications p. 11
- 1.7 Biomedical Applications p. 12
- Bibliography p. 13
- Chapter 2 Materials for Thermal Conduction p. 15
- 2.1 Introduction p. 15
- 2.2 Materials of High Thermal Conductivity p. 16
- 2.2.1 Metals, Diamond, and Ceramics p. 16
- 2.2.2 Metal-Matrix Composites p. 17
- 2.2.2.1 Aluminum-Matrix Composites p. 17
- 2.2.2.2 Copper-Matrix Composites p. 19
- 2.2.2.3 Beryllium-Matrix Composites p. 20
- 2.2.3 Carbon-Matrix Composites p. 20
- 2.2.4 Carbon and Graphite p. 21
- 2.2.5 Ceramic-Matrix Composites p. 21
- 2.3 Thermal Interface Materials p. 22
- 2.4 Conclusion p. 24
- References p. 25
- Chapter 3 Polymer-Matrix Composites for Microelectronics p. 29
- 3.1 Introduction p. 29
- 3.2 Applications in Microelectronics p. 30
- 3.3 Polymer-Matrix Composites p. 33
- 3.3.1 Polymer-Matrix Composites with Continuous Fillers p. 34
- 3.3.2 Polymer-Matrix Composites with Discontinuous Fillers p. 35
- 3.4 Summary p. 39
- References p. 39
- Chapter 4 Materials for Electromagnetic Interference Shielding p. 43
- 4.1 Introduction p. 43
- 4.2 Mechanisms of Shielding p. 44
- 4.3 Composite Materials for Shielding p. 45
- 4.4 Emerging Materials for Shielding p. 47
- 4.5 Conclusion p. 48
- References p. 48
- Chapter 5 Cement-Based Electronics p. 53
- 5.1 Introduction p. 53
- 5.2 Background on Cement-Matrix Composites p. 54
- 5.3 Cement-Based Electrical Circuit Elements p. 56
- 5.3.1 Conductor p. 56
- 5.3.2 Diode p. 56
- 5.4 Cement-Based Sensors p. 58
- 5.4.1 Strain Sensor p. 58

- 5.4.2 Damage Sensor p. 63
- 5.4.3 Thermistor p. 67
- 5.5 Cement-Based Thermoelectric Device p. 68
- 5.6 Conclusion p. 72
- References p. 72
- Chapter 6 Self-Sensing of Carbon Fiber Polymer-Matrix Structural Composites p. 75
- 6.1 Introduction p. 75
- 6.2 Background p. 76
- 6.3 Sensing Strain p. 79
- 6.4 Sensing Damage p. 80
- 6.5 Sensing Temperature p. 83
- 6.6 Sensing Bond Degradation p. 88
- 6.7 Sensing Structural Transitions p. 90
- 6.7.1 DSC Analysis p. 91
- 6.7.2 DC Electrical Resistance Analysis p. 92
- 6.8 Sensing Composite Fabrication Process p. 95
- 6.9 Conclusion p. 96
- References p. 97
- Chapter 7 Structural Health Monitoring by Electrical Resistance Measurement p. 99
- 7.1 Introduction p. 99
- 7.2 Carbon Fiber Polymer-Matrix Structural Composites p. 100
- 7.3 Cement-Matrix Composites p. 101
- 7.4 Joints p. 101
- 7.4.1 Joints Involving Composite and Concrete by Adhesion p. 101
- 7.4.2 Joints Involving Composites by Adhesion p. 102
- 7.4.3 Joints Involving Steels by Fastening p. 104
- 7.4.4 Joints Involving Concrete by Pressure Application p. 105
- 7.4.5 Joints Involving Composites by Fastening p. 106
- 7.5 Conclusion p. 106
- References p. 107
- Chapter 8 Modification of the Surface of Carbon Fibers for Use as a Reinforcement in Composite Materials p. 109
- 8.1 Introduction to Surface Modification p. 109
- 8.2 Introduction to Carbon Fiber Composites p. 110
- 8.3 Surface Modification of Carbon Fibers for Polymer-Matrix Composites p. 113
- 8.4 Surface Modification of Carbon Fibers for Metal-Matrix Composites p. 121
- References p. 125
- Chapter 9 Corrosion Control of Steel-Reinforced Concrete p. 131
- 9.1 Introduction p. 131
- 9.2 Steel Surface Treatment p. 132
- 9.3 Admixtures In Concrete p. 132
- 9.4 Surface Coating on Concrete p. 134
- 9.5 Cathodic Protection p. 134
- 9.6 Steel Replacement p. 135
- 9.7 Conclusion p. 135
- Acknowledgment p. 135

- References p. 135
- Chapter 10 Applications of Submicron-Diameter Carbon Filaments p. 139
- 10.1 Introduction p. 140
- 10.2 Structural Applications p. 141
- 10.3 Electromagnetic Interference Shielding, Electromagnetic Reflection, and Surface Electrical Conduction p. 143
- 10.4 DC Electrical Conduction p. 144
- 10.5 Field Emission p. 144
- 10.6 Electrochemical Application p. 145
- 10.7 Thermal Conduction p. 146
- 10.8 Strain Sensors p. 146
- 10.9 Porous Carbons p. 147
- 10.10 Catalyst Support p. 148
- 10.11 Conclusion p. 149
- Acknowledgment p. 149
- References p. 149
- Chapter 11 Improving Cement-Based Materials by Using Silica Fume p. 155
- 11.1 Introduction p. 156
- 11.2 Workability p. 156
- 11.3 Mechanical Properties p. 157
- 11.4 Vibration Damping Capacity p. 158
- 11.5 Sound Absorption p. 160
- 11.6 Freeze-Thaw Durability p. 160
- 11.7 Abrasion Resistance p. 160
- 11.8 Shrinkage p. 160
- 11.9 Air Void Content and Density p. 161
- 11.10 Permeability p. 161
- 11.11 Steel Rebar Corrosion Resistance p. 162
- 11.12 Alkali-Silica Reactivity Reduction p. 162
- 11.13 Chemical Attack Resistance p. 162
- 11.14 Bond Strength to Steel Rebar p. 162
- 11.15 Creep Rate p. 163
- 11.16 Coefficient of Thermal Expansion p. 163
- 11.17 Specific Heat p. 163
- 11.18 Thermal Conductivity p. 163
- 11.19 Fiber Dispersion p. 164
- 11.20 Conclusion p. 164
