

- Part I
- Chapter 1 Introduction p. 3
- 1.1 Why this book is needed p. 3
- 1.2 Features of the book p. 5
- 1.3 Why intelligent data warehousing p. 5
- 1.4 Organization of the book p. 6
- 1.5 How to use this book p. 7
- References p. 8
- Chapter 2 Enterprise intelligence and artificial intelligence p. 11
- 2.1 Overview p. 11
- 2.2 Data warehousing and enterprise intelligence p. 11
- 2.3 Historical development of data warehousing p. 12
- 2.4 Basic elements of data warehousing p. 14
- 2.5 Databases and the Web p. 15
- 2.6 Basics of artificial intelligence and machine learning p. 21
- 2.7 Data warehousing with intelligent agents p. 26
- 2.8 Data mining, CRM, Web mining, and clickstream p. 29
- 2.9 The future of data warehouses p. 34
- 2.10 Summary p. 35
- References p. 36
- Chapter 3 From DBMS to data warehousing p. 39
- 3.1 Overview p. 39
- 3.2 An overview of database management systems p. 39
- 3.3 Advances in DBMS p. 46
- 3.4 Architecture and design of data warehouses p. 52
- 3.5 Data Marts p. 55
- 3.6 Metadata p. 58
- 3.7 Data warehousing and materialized views p. 60
- 3.8 Data warehouse performance p. 64
- 3.9 Data warehousing and OLAP p. 66
- 3.10 Summary p. 68
- References p. 68
- Part II
- Chapter 4 Data preparation and preprocessing p. 73
- 4.1 Overview p. 73
- 4.2 Schema and data integration p. 73
- 4.3 Data pumping p. 75
- 4.4 Middleware p. 76
- 4.5 Data quality p. 77
- 4.6 Data cleansing p. 78
- 4.7 Dealing with data inconsistency in multidatabase systems p. 83
- 4.8 Data reduction p. 84
- 4.9 Case study: data preparation for stock food chain analysis p. 85
- 4.10 Web log file preparation p. 93
- 4.11 Summary p. 96
- References p. 96

- Chapter 5 Building data warehouses p. 97
- 5.1 Overview p. 97
- 5.2 Conceptual data modeling p. 97
- 5.3 Data warehouse design using ER approach p. 100
- 5.4 Aspects of building data warehouses p. 105
- 5.5 Data cubes p. 111
- 5.6 Summary p. 113
- References p. 113
- Chapter 6 Basics of materialized views p. 117
- 6.1 Overview p. 117
- 6.2 Data cubes p. 118
- 6.3 Using a simple optimization algorithm to select views p. 125
- 6.4 Aggregate calculation using preconstructed data structures in data cubes p. 127
- 6.5 Case study: view selection for a human service data warehouse p. 130
- 6.6 Summary p. 145
- References p. 145
- Chapter 7 Advances in materialized views p. 147
- 7.1 Overview p. 147
- 7.2 Data warehouse design through materialized views p. 148
- 7.3 Maintenance of materialized views p. 151
- 7.4 Consistency in view maintenance p. 157
- 7.5 Integrity constraints and active databases p. 163
- 7.6 Dynamic warehouse design p. 165
- 7.7 Implementation issues and online updates p. 168
- 7.8 Data cubes p. 169
- 7.9 Materialized views in advanced database systems p. 173
- 7.10 Relationship with mobile databases p. 175
- 7.11 Other issues p. 175
- 7.12 Summary p. 177
- References p. 177
- Part III
- Chapter 8 Intelligent data analysis p. 187
- 8.1 Overview p. 187
- 8.2 Basics of data mining p. 188
- 8.3 Case study: stock food chain analysis p. 192
- 8.4 Case study: rough set data analysis p. 195
- 8.5 Recent progress of data mining p. 204
- 8.6 Summary p. 206
- References p. 206
- Chapter 9 Toward integrated OLAP and data mining p. 209
- 9.1 Overview p. 209
- 9.2 Integration of OLAP and data mining p. 209
- 9.3 Influential association rules p. 210
- 9.4 Significance of influential association rules p. 212
- 9.5 Reviews of algorithms for discovery of conventional association rules p. 214
- 9.6 Discovery of influential association rules p. 216

- 9.7 Bitmap indexing and influential association rules p. 220
- 9.8 Mining influential association rules using bitmap indexing (IARMBM) p. 223
- 9.9 Summary p. 226
- References p. 226
- Index p. 229
