

- Section A Introduction Notes
- 1 Absorbable/Biodegradable Polymers: Technology Evolution Shalaby W. Shalaby and Karen J.L. Burg p. 3
- Section B Development and Application of New Systems
- 2 Segmented Copolyesters with Prolonged Strength Retention Profiles Shalaby W. Shalaby p. 15
- 3 Polyaxial Crystalline Fiber-Forming Copolyester Shalaby W. Shalaby p. 25
- 4 Polyethylene Glycol-Based Copolyesters Shalaby W. Shalaby and Marc Shalaby p. 39
- 5 Cyanoacrylate-Based Systems as Tissue Adhesives Shalaby W. Shalaby and Waleed S. W. Shalaby p. 59
- 6 Chitosan-Based Systems Shalaby W. Shalaby and John A. DuBose and Marc Shalaby p. 77
- 7 Hyaluronic Acid-Based Systems Shalaby W. Shalaby and Waleed S. W. Shalaby p. 91
- Section C Developments in Preparative, Processing, and Evaluation Methods
- 8 New Approaches to the Synthesis of Crystalline Fiber-Forming Aliphatic Copolyesters Shalaby W. Shalaby and Kimberly A. Carpenter and Bruce L. Anneaux p. 103
- 9 Advances in Morphological Development to Tailor the Performance of Medical Absorbable Devices Sasa Andjelic and Benjamin D. Fitz and Dennis D. Jamiolkowski p. 113
- 10 Polymer Biocompatibility and Toxicity Karen J.L. Burg and Shalaby W. Shalaby and Griet G. Atkins p. 143
- Section D Growing and Newly Sought Applications
- 11 Tissue Engineering Systems Chuck B. Thomas and Karen J.L. Burg p. 159
- 12 Synthetic Vascular Constructs Shalaby W. Shalaby and Waleed S.W. Shalaby p. 175
- 13 Postoperative Adhesion Prevention Waleed S.W. Shalaby and Shalaby W. Shalaby p. 191
- 14 Implantable Insulin Controlled Release Systems for Treating Diabetes Mellitus Marc Shalaby and Shalaby W. Shalaby p. 205
- 15 Absorbable Delivery Systems for Cancer Therapy Waleed S.W. Shalaby p. 227
- 16 Tumor Immunotherapeutic Systems Waleed S.W. Shalaby and Shalaby W. Shalaby p. 257
- Index p. 275
