

Table of Contents

- 1 Mechanics of Hard Tissue J. Lawrence Katz p. 1
- 2 Musculoskeletal Soft Tissue Mechanics Richard L. Lieber and Thomas J. Burkholder p. 2
- 3 Joint-Articulating Surface Motion Kenton R. Kaufman and Kai-Nan An p. 3
- 4 Joint Lubrication Michael J. Furey p. 4
- 5 Analysis of Gait Roy B. Davis, III and Sylvia Ounpuu and Peter A. DeLuca p. 5
- 6 Mechanics of Head/Neck Albert I. King and David C. Viano p. 6
- 7 Biomechanics of Chest and Abdomen Impact David C. Viano and Albert I. King p. 7
- 8 Cardiac Biomechanics Andrew D. McCulloch p. 8
- 9 Heart Valve Dynamics Ajit P. Yoganathan and Jack D. Lemmon and Jeffrey T. Ellis p. 9
- 10 Arterial Macrocirculatory Hemodynamics Baruch B. Lieber p. 10
- 11 Mechanics of Blood Vessels Thomas R. Canfield and Philip B. Dobrin p. 11
- 12 The Venous System Artin A. Shoukas and Carl F. Rothe p. 12
- 13 Mechanics, Molecular Transport, and Regulation in the Microcirculation Aleksander S. Popel and Roland N. Pittman p. 13
- 14 Mechanics and Deformability of Hematocytes Richard E. Waugh and Robert M. Hochmuth p. 14
- 15 Mechanics of Tissue/Lymphatic Transport Geert W. Schmid-Schonbein and Alan R. Hargens p. 15
- 16 Modeling in Cellular Biomechanics Alexander A. Spector and Roger Tran-Son-Tay p. 16
- 17 Cochlear Mechanics Charles R. Steele and Gary J. Baker and Jason A. Tolomeo and Deborah E. Zetes-Tolomeo p. 17
- 18 Vestibular Mechanics Wallace Grant p. 18
- 19 Exercise Physiology Arthur T. Johnson and Cathryn R. Dooly p. 19
- 20 Factors Affecting Mechanical Work in Humans Ben F. Hurley and Arthur T. Johnson p. 20
