

- 1 Introduction Patrick Fay p. 1
- 2 Microwave and RF Product Applications
 - 2.1 Cellular Mobile Telephony Paul G. Flikkema p. 2
 - 2.2 Nomadic Communications Andy D. Kucar p. 17
 - 2.3 Broadband Wireless Access: High Rate, Point to Multipoint, Fixed Antenna Systems Brian Petry p. 41
 - 2.4 Digital European Cordless Telephone Saf Asghar p. 51
 - 2.5 Wireless Local Area Networks (WLAN) Jim Paviol and Carl Andren and John Fakatselis p. 61
 - 2.6 Wireless Personal Area Network Communications: An Application Overview Thomas M. Siep and Ian C. Gifford p. 80
 - 2.7 Satellite Communications Systems Ramesh K. Gupta p. 91
 - 2.8 Satellite-Based Cellular Communications Nils V. Jespersen p. 108
 - 2.9 Electronic Navigation Systems Benjamin B. Peterson p. 136
 - 2.10 Avionics James L. Bartlett p. 167
 - 2.11 Radar
 - 2.11.1 Continuous Wave Radar James C. Wiltse p. 172
 - 2.11.2 Pulse Radar Melvin L. Belcher, Jr. and Josh T. Nessmith p. 182
 - 2.12 Electronic Warfare and Countermeasures Robert D. Hayes p. 196
 - 2.13 Automotive Radar Madhu S. Gupta p. 216
 - 2.14 New Frontiers for RF/Microwaves in Therapeutic Medicine Arye Rosen and Harel D. Rosen and Stuart D. Edwards p. 225
- 3 Systems Considerations
 - 3.1 Thermal Analysis and Design of Electronic Systems Avram Bar-Cohen and Karl J. Geisler and Allan D. Krauss p. 1
 - 3.2 Safety and Environmental Issues John M. Osepchuk and Ronald C. Petersen p. 28
 - 3.3 Signal Characterization and Modulation Theory John F. Sevic p. 43
 - 3.4 Cost Modeling Leland M. Farrer p. 62
 - 3.5 Power Supply Management Brent A. McDonald and George K. Schoneman and Daniel E. Jenkins p. 66
 - 3.6 Low Voltage/Low Power Microwave Electronics Mike Golio p. 78
 - 3.7 Productivity Initiatives Mike Golio p. 90
 - 3.8 Electronic Hardware Reliability Arun Ramakrishnan and Toby Syrus and Michael Pecht p. 102
- 4 Microwave Measurements
 - 4.1 Linear Measurements R.E. Ham p. 1
 - 4.2 Network Analyzer Calibration Joseph Staudinger p. 17
 - 4.3 Noise Measurements Alf Riddle p. 24
 - 4.4 Nonlinear Microwave Measurement and Characterization J. Stevenson Kenney p. 33
 - 4.5 Theory of High-Power Load-Pull Characterization for RF and Microwave Transistors John F. Sevic p. 53
 - 4.6 Pulsed Measurements Anthony E. Parker and James G. Rathmell and Jonathan B. Scott p. 68
 - 4.7 Microwave On-Wafer Test Jeane-Pierre Lanteri and Christopher Jones and John R. Mahon p. 95

- 4.8 High Volume Microwave Test Jeane-Pierre Lanteri and Christopher Jones and John R. Mahon p. 110
- 5 Circuits
 - 5.1 Receivers Warren L. Seely p. 2
 - 5.2 Transmitters Warren L. Seely p. 14
 - 5.3 Low Noise Amplifier Design Jakub Kucera and Urs Lott p. 23
 - 5.4 Microwave Mixer Design Anthony M. Pavio p. 46
 - 5.5 Modulation and Demodulation Circuitry Charles Nelson p. 53
 - 5.6 Power Amplifier Circuits Mark Bloom p. 71
 - 5.7 Oscillator Circuits Alfie Riddle p. 85
 - 5.8 Phase Locked Loop Design Robert Newgard p. 101
 - 5.9 Filters and Multiplexers Richard V. Snyder p. 125
 - 5.10 RF Switches Robert J. Trew p. 138
- 6 Passive Technologies
 - 6.1 Passive Lumped Components Alfie Riddle p. 2
 - 6.2 Passive Microwave Devices Michael B. Steer p. 13
 - 6.3 Dielectric Resonators S. Jerry Fiedziuszko p. 23
 - 6.4 RF MEMS Karl R. Varian p. 39
 - 6.5 Surface Acoustic Wave (SAW) Filters Donald C. Malocha p. 70
 - 6.6 RF Coaxial Cable Michael E. Majerus p. 83
 - 6.7 Coaxial Connectors David Anderson p. 92
 - 6.8 Antenna Technology James B. West p. 112
 - 6.9 Phased Array Antenna Technology James B. West p. 156
 - 6.10 RF Package Design and Development Jeanne S. Pavio p. 179
- 7 Active Device Technologies
 - 7.1 Semiconductor Diodes
 - 7.1.1 Varactors Jan Stake p. 1
 - 7.1.2 Schottky Diode Frequency Multipliers Jack East p. 14
 - 7.1.3 Transit Time Microwave Devices Robert J. Trew p. 23
 - 7.2 Transistors
 - 7.2.1 Bipolar Junction Transistors (BJTs) John C. Cowles p. 33
 - 7.2.2 Heterostructure Bipolar Transistors (HBTs) William Liu p. 52
 - 7.2.3 Metal-Oxide-Semiconductor Field-Effect Transistors (MOSFETs) Leonard MacEachern and Tajinder Manku p. 75
 - 7.2.4 Metal Semiconductor Field Effect Transistors (MESFETs) Michael S. Shur p. 103
 - 7.2.5 High Electron Mobility Transistors (HEMTs) Prashant Chavarkar and Umesh Mishra p. 126
 - 7.2.6 RF Power Transistors from Wide Bandgap Materials Karen E. Moore p. 155
- 7.3 Tubes Jerry C. Whitaker p. 169
- 7.4 Monolithic Microwave IC Technology Lawrence P. Dunleavy p. 184
- 8 CAD, Simulation, and Modeling
 - 8.1 System Simulation Joseph Staudinger p. 2
 - 8.2 Numerical Techniques for the Analysis and Design of RF/Microwave Structures Manos M. Tentzeris p. 13
 - 8.3 Computer Aided Design of Passive Components Daniel G. Swanson, Jr. p. 34

- 8.4 Nonlinear RF and Microwave Circuit Analysis Michael B. Steer and John F. Sevic p. 45
- 8.5 Time Domain Computer-Aided Circuit Simulation Michael Lightner p. 66
- 8.6 Computer Aided Design of Microwave Circuitry Ron Kilmeyer p. 86
- 8.7 Nonlinear Transistor Modeling for Circuit Simulation Walter R. Curtice p. 91
- 8.8 Technology Computer Aided Design Peter A. Blakey p. 110
- 9 Underlying Physics
- 9.1 Maxwell's Equations Nicholas E. Buris p. 1
- 9.2 Wave Propagation in Free Space Matthew Sadiku p. 13
- 9.3 Guided Wave Propagation and Transmission Lines W.R. Deal and V. Radisic and Y. Qian and T. Itoh p. 27
- 9.4 Effects of Multipath Fading in Wireless Communication Systems Wayne E. Stark p. 44
- 9.5 Electromagnetic Interference (EMI) Alfie Riddle p. 61
- 9.6 Materials Properties
- 9.6.1 Metals Mike Golio p. 66
- 9.6.2 Dielectrics K.F. Etzold p. 70
- 9.6.3 Ferroelectric and Piezoelectric Materials K.F. Etzold p. 78
- 9.6.4 Semiconductors Mike Harris p. 91
- Appendix A Mathematics, Symbols, and Physical Constants p. 1
- Appendix B Microwave Engineering Appendix John P. Wendler p. 1
- Index p. 1
