

Table of Contents

- Introduction
- Step-Growth Polymerization
- Free-Radical
- Ionic Polymerization
- Linear Copolymers and Other Architectures
- Polymer Stereochemistry
- Polymerization Reactions Initiated by Metal Catalysts and Transfer Reactions
- Polymers in Solution
- Polymer Characterization - Molar Masses
- Polymer Characterization - Chain Dimensions
- The Elastomeric State
- Structures, and Morphology
- The Crystalline State and Partially Ordered Structures
- Rheology and Mechanical Properties
- Structure-Property Relations
- Polymers for the Electronics Industry
- Index
