

- Preface p. vii
- Publisher's Acknowledgements p. xv
- Part I Artificial Intelligence: Its Roots and Scope p. 1
- 1 AI: History and Applications p. 3
- 1.1 From Eden to ENIAC: Attitudes toward Intelligence, Knowledge, and Human Artifice p. 3
- 1.2 Overview of AI Application Areas p. 17
- 1.3 Artificial Intelligence--A Summary p. 28
- 1.4 Epilogue and References p. 29
- 1.5 Exercises p. 31
- Part II Artificial Intelligence as Representation and Search p. 33
- 2 The Predicate Calculus p. 47
- 2.0 Introduction p. 47
- 2.1 The Propositional Calculus p. 47
- 2.2 The Predicate Calculus p. 52
- 2.3 Using Inference Rules to Produce Predicate Calculus Expressions p. 64
- 2.4 Application: A Logic-Based Financial Advisor p. 75
- 2.5 Epilogue and References p. 79
- 2.6 Exercises p. 79
- 3 Structures and Strategies for State Space Search p. 81
- 3.0 Introduction p. 81
- 3.1 Graph Theory p. 84
- 3.2 Strategies for State Space Search p. 93
- 3.3 Using the State Space to Represent Reasoning with the Predicate Calculus p. 107
- 3.4 Epilogue and References p. 121
- 3.5 Exercises p. 121
- 4 Heuristic Search p. 123
- 4.0 Introduction p. 123
- 4.1 An Algorithm for Heuristic Search p. 127
- 4.2 Admissibility, Monotonicity, and Informedness p. 139
- 4.3 Using Heuristics in Games p. 144
- 4.4 Complexity Issues p. 152
- 4.5 Epilogue and References p. 156
- 4.6 Exercises p. 156
- 5 Control and Implementation of State Space Search p. 159
- 5.0 Introduction p. 159
- 5.1 Recursion-Based Search p. 160
- 5.2 Pattern-Directed Search p. 164
- 5.3 Production Systems p. 171
- 5.4 The Blackboard Architecture for Problem Solving p. 187
- 5.5 Epilogue and References p. 189
- 5.7 Exercises p. 190
- Part III Representation and Intelligence: The AI Challenge p. 193
- 6 Knowledge Representation p. 197

- 6.0 Issues in Knowledge Representation p. 197
- 6.1 A Brief History of AI Representational Systems p. 198
- 6.2 Conceptual Graphs: A Network Language p. 218
- 6.3 Alternatives to Explicit Representation p. 228
- 6.4 Agent Based and Distributed Problem Solving p. 235
- 6.5 Epilogue and References p. 240
- 6.6 Exercises p. 243
- 7 Strong Method Problem Solving p. 247
- 7.0 Introduction p. 247
- 7.1 Overview of Expert System Technology p. 249
- 7.2 Rule-Based Expert Systems p. 256
- 7.3 Model-Based, Case Based, and Hybrid Systems p. 268
- 7.4 Planning p. 284
- 7.5 Epilogue and References p. 299
- 7.6 Exercises p. 301
- 8 Reasoning in Uncertain Situations p. 303
- 8.0 Introduction p. 303
- 8.1 Logic-Based Abductive Inference p. 305
- 8.2 Abduction: Alternatives to Logic p. 320
- 8.3 The Stochastic Approach to Uncertainty p. 333
- 8.4 Epilogue and References p. 344
- 8.5 Exercises p. 346
- Part IV Machine Learning p. 349
- 9 Machine Learning: Symbol-based p. 351
- 9.0 Introduction p. 603
- 9.1 A Framework for Symbol-based Learning p. 354
- 9.2 Version Space Search p. 360
- 9.3 The ID3 Decision Tree Induction Algorithm p. 372
- 9.4 Inductive Bias and Learnability p. 381
- 9.5 Knowledge and Learning p. 386
- 9.6 Unsupervised Learning p. 397
- 9.7 Reinforcement Learning p. 406
- 9.8 Epilogue and References p. 413
- 9.9 Exercises p. 414
- 10 Machine Learning: Connectionist p. 417
- 10.0 Introduction p. 417
- 10.1 Foundations for Connectionist Networks p. 419
- 10.2 Perceptron Learning p. 422
- 10.3 Backpropagation Learning p. 431
- 10.4 Competitive Learning p. 438
- 10.5 Hebbian Coincidence Learning p. 446
- 10.6 Attractor Networks or "Memories" p. 457
- 10.7 Epilogue and References p. 467
- 10.8 Exercises p. 468

- 11 Machine Learning: Social and Emergent p. 469
- 11.0 Social and Emergent Models of Learning p. 469
- 11.1 The Genetic Algorithm p. 471
- 11.2 Classifier Systems and Genetic Programming p. 481
- 11.3 Artificial Life and Society-Based Learning p. 492
- 11.4 Epilogue and References p. 503
- 11.5 Exercises p. 504
- Part V Advanced Topics for AI Problem Solving p. 507
- 12 Automated Reasoning p. 509
- 12.0 Introduction to Weak Methods in Theorem Proving p. 509
- 12.1 The General Problem Solver and Difference Tables p. 510
- 12.2 Resolution Theorem Proving p. 516
- 12.3 PROLOG and Automated Reasoning p. 537
- 12.4 Further Issues in Automated Reasoning p. 543
- 12.5 Epilogue and References p. 550
- 12.6 Exercises p. 551
- 13 Understanding Natural Language p. 553
- 13.0 Role of Knowledge in Language Understanding p. 553
- 13.1 Deconstructing Language: A Symbolic Analysis p. 556
- 13.2 Syntax p. 559
- 13.3 Syntax and Knowledge with ATN Parsers p. 568
- 13.4 Stochastic Tools for Language Analysis p. 578
- 13.5 Natural Language Applications p. 585
- 13.6 Epilogue and References p. 592
- 13.7 Exercises p. 557
- Part VI Languages and Programming Techniques for Artificial Intelligence p. 597
- 14 An Introduction to Prolog p. 603
- 14.0 Introduction p. 603
- 14.1 Syntax for Predicate Calculus Programming p. 604
- 14.2 Abstract Data Types (ADTs) in PROLOG p. 616
- 14.3 A Production System Example in PROLOG p. 620
- 14.4 Designing Alternative Search Strategies p. 625
- 14.5 A PROLOG Planner p. 630
- 14.6 PROLOG: Meta-Predicates, Types, and Unification p. 633
- 14.7 Meta-Interpreters in PROLOG p. 641
- 14.8 Learning Algorithms in PROLOG p. 656
- 14.9 Natural Language Processing in PROLOG p. 666
- 14.10 Epilogue and References p. 673
- 14.11 Exercises p. 676
- 15 An Introduction to LISP p. 679
- 15.0 Introduction p. 679
- 15.1 LISP: A Brief Overview p. 680
- 15.2 Search in LISP: A Functional Approach to the Farmer, Wolf, Goat, and Cabbage Problem p. 702

- 15.3 Higher-Order Functions and Procedural Abstraction p. 707
- 15.4 Search Strategies in LISP p. 711
- 15.5 Pattern Matching in LISP p. 715
- 15.6 A Recursive Unification Function p. 717
- 15.7 Interpreters and Embedded Languages p. 721
- 15.8 Logic Programming in LISP p. 723
- 15.9 Streams and Delayed Evaluation p. 732
- 15.10 An Expert System Shell in LISP p. 736
- 15.11 Semantic Networks and Inheritance in LISP p. 743
- 15.12 Object-Oriented Programming Using CLOS p. 747
- 15.13 Learning in LISP: The ID3 Algorithm p. 759
- 15.14 Epilogue and References p. 771
- 15.15 Exercises p. 772
- Part VII Epilogue p. 777
- 16 Artificial Intelligence as Empirical Enquiry p. 779
- 16.0 Introduction p. 779
- 16.1 Artificial Intelligence: A Revised Definition p. 781
- 16.2 The Science of Intelligent Systems p. 792
- 16.3 AI: Current Issues and Future Directions p. 803
- 16.4 Epilogue and References p. 807
- Bibliography p. 809
- Author Index p. 837
- Subject Index p. 843
