

- 1 Introduction
- 2 Basic Structures of Polymers
- 3 Physical States and Transitions
- 4 Polymer Formation
- 5 Polymerization Processes
- 6 The Molecular Weight of Polymers
- 7 Viscous Flow
- 8 Mechanical Properties at Small Deformations
- 9 Ultimate Properties
- 10 Some General Properties of Polymer Systems
- 11 Degradation and Stabilization of Polymer Systems
- 12 Fabrication Processes
- 13 Extrusion and Molding
- 14 Recycling and Resource Recovery
- 15 Carbon Chain Molecules
- 16 Heterochain Polymers
- 17 Analysis and Identification of Polymers
- Appendix 1 List of Symbols
- Appendix 2 Harmonic motion of a Maxwell model
- Appendix 3 Selected properties of polymer systems
- Appendix 4 Major markets for selected plastics and rubber
