

# Table of contents

- Preface
- Basics
- Chapter 1 What Is C?
- Chapter 2 Basics of Program Writing
- Chapter 3 Style
- Chapter 4 Basic Declarations and Expressions
- Chapter 5 Arrays, Qualifiers, and Reading Numbers
- Chapter 6 Decision and Control Statements
- Chapter 7 Programming Process
- Simple Programming
- Chapter 8 More Control Statements
- Chapter 9 Variable Scope and Functions
- Chapter 10 C Preprocessor
- Chapter 11 Bit Operations
- Chapter 13 Simple Pointers
- Chapter 14 File Input/Output
- Chapter 15 Debugging and Optimization
- Chapter 16 Floating Point
- Advanced Programming Concepts
- Chapter 17 Advanced Pointers
- Chapter 18 Modular Programming
- Chapter 19 Ancient Compilers
- Chapter 20 Portability Problems
- Chapter 21 C's Dustier Corners
- Chapter 22 Putting It All Together
- Chapter 23 Programming Adages
- Other Language Features
- Ranges and Parameter Passing Conversions
- Colophon
- Glossary
- Chapter 12 Advanced Types
- ASCII Table
- Operator Precedence Rules
- A Program to Compute a Sine Using a Power Series
