

Table of contents

- **Foreword** (p. ix)
- **Preface** (p. xi)
- **Acknowledgements** (p. xvii)
- **Chapter 1. Introduction** (p. 1)
- **1.1 Sensors and Their Characteristics** (p. 1)
- **1.2 Integrated and Smart Sensors: Up-to-Date Requirements** (p. 5)
- **1.3 Special Requirements of Biomedical Applications** (p. 6)
- **1.4 References and Supplementary Reading** (p. 9)
- **Chapter 2. Sensor Technologies** (p. 11)
- **2.1 Monolithic Semiconductor Technologies** (p. 11)
- **2.2 Ceramics** (p. 18)
- **2.3 Thin- and Thick-Film Technologies** (p. 20)
- **2.4 Processing of Polymer Films** (p. 26)
- **2.5 Optical-Fiber Technologies** (p. 30)
- **2.6 References** (p. 33)
- **Chapter 3. Basic Sensor Structures** (p. 35)
- **3.1 Impedance-Type Structures** (p. 36)
- **3.2 Semiconductor Devices as Sensors** (p. 36)
- **3.3 Sensors Based on Acoustic-Wave Propagation** (p. 40)
- **3.4 Calorimetric Sensors** (p. 45)
- **3.5 Electrochemical Cells as Sensors** (p. 47)
- **3.6 Sensors with Optical Waveguides** (p. 55)
- **3.7 References** (p. 61)
- **Chapter 4. Sensing Effects** (p. 65)
- **4.1 Thermoresistive Effects** (p. 65)
- **4.2 Thermoelectric Effect** (p. 68)
- **4.3 Other Thermoeffects Used in Sensors** (p. 69)
- **4.4 Piezoelectric Effect** (p. 70)
- **4.5 Electrets in Capacitive Transducers** (p. 72)
- **4.6 Pyroelectric Effect** (p. 73)
- **4.7 Piezoresistive Effect** (p. 75)
- **4.8 Hall Effect** (p. 76)
- **4.9 Further Methods of Sensing Magnetic Fields** (p. 77)
- **4.10 Superconducting Quantum Interference Device (SQUID)** (p. 77)
- **4.11 Radiation Induced Effects and Related Sensor Structures** (p. 79)
- **4.12 Adsorption and Absorption of Chemical Species** (p. 85)
- **4.13 Selective Molecular Receptors** (p. 87)
- **4.14 Permeation through Membranes** (p. 88)
- **4.15 Ion-Selective Membranes** (p. 90)
- **4.16 Chemical-Optical Transduction Effects** (p. 91)
- **4.17 References and Supplementary Reading** (p. 96)
- **Chapter 5. Physical Sensors and Their Applications in Biomedicine** (p. 99)
- **5.1 Measuring Temperature** (p. 99)
- **5.2 Other Applications of Temperature Sensors** (p. 108)

- **5.3 Mechanical Sensors in Biomedicine** (p. 112)
- **5.4 Sensors in Ultrasound Imaging** (p. 124)
- **5.5 Detectors in Radiology** (p. 132)
- **5.6 Biomedical Applications of Magnetic Field Sensors** (p. 144)
- **5.7 Further Applications of Physical Sensors** (p. 151)
- **5.8 References** (p. 162)
- **Chapter 6. Sensors for Measuring Chemical Quantities in Biomedicine** (p. 169)
- **6.1 Sensors for Monitoring Blood Gases and pH** (p. 169)
- **6.2 Optical Oximetry** (p. 198)
- **6.3 Other Applications of Chemical Sensors** (p. 208)
- **6.4 References** (p. 219)
- **Chapter 7. Biosensors** (p. 223)
- **7.1 Enzymatic Biosensors** (p. 226)
- **7.2 Affinity Biosensors** (p. 261)
- **7.3 Living Biosensors** (p. 281)
- **7.4 Direct Methods for Monitoring Bioactive Compounds** (p. 292)
- **7.5 References** (p. 298)
- **Chapter 8. Biocompatibility of Sensors** (p. 307)
- **8.1 References** (p. 310)
- **Chapter 9. Summary and Future Trends** (p. 313)
- **9.1 References** (p. 321)
- **Appendix 1** (p. 323)
- **Appendix 2** (p. 325)
- **Appendix 3** (p. 327)
- **Appendix 4** (p. 329)
- **Appendix 5** (p. 331)
- **Appendix 6** (p. 333)
- **Glossary** (p. 337)
- **Index** (p. 341)
- **About the Author** (p. 349)
