

- Preface p. ix
- Acknowledgments p. xi
- Fundamentals
- 1. Introduction to Modeling p. 3
- 1.1 What is Modeling? p. 3
- 1.2 Mathematical Modeling p. 6
- 1.3 Environmental Modeling p. 10
- 1.4 Objectives of This Book p. 13
- Appendix 1.1 p. 16
- Appendix 1.2 p. 17
- 2. Fundamentals of Mathematical Modeling p. 19
- 2.1 Definitions and Terminology in Mathematical Modeling p. 19
- 2.2 Steps in Developing Mathematical Models p. 21
- 2.3 Application of the Steps in Mathematical Modeling p. 29
- 3. Primer on Mathematics p. 39
- 3.1 Mathematical Formulations p. 39
- 3.2 Mathematical Analysis p. 41
- 3.3 Examples of Analytical and Computational Methods p. 42
- 3.4 Closure p. 63
- 4. Fundamentals of Environmental Processes p. 67
- 4.1 Introduction p. 67
- 4.2 Material Content p. 68
- 4.3 Phase Equilibrium p. 72
- 4.4 Environmental Transport Processes p. 80
- 4.5 Interphase Mass Transport p. 83
- 4.6 Environmental Nonreactive Processes p. 85
- 4.7 Environmental Reactive Processes p. 91
- 4.8 Material Balance p. 98
- Appendix 4.1 p. 104
- 5. Fundamentals of Engineered Environmental Systems p. 105
- 5.1 Introduction p. 105
- 5.2 Classifications of Reactors p. 106
- 5.3 Modeling of Homogeneous Reactors p. 108
- 5.4 Modeling of Heterogeneous Reactors p. 116
- 6. Fundamentals of Natural Environmental Systems p. 129
- 6.1 Introduction p. 129
- 6.2 Fundamentals of Modeling Soil Systems p. 130
- 6.3 Fundamentals of Modeling Aquatic Systems p. 149
- Appendix 6.1 p. 161
- 7. Software for Developing Mathematical Models p. 163
- 7.1 Introduction p. 163
- 7.2 Spreadsheet-Based Software p. 165
- 7.3 Equation Solver-Based Software p. 166
- 7.4 Dynamic Simulation-Based Software p. 171
- 7.5 Common Example Problem: Water Quality Modeling in Lakes p. 174
- 7.6 Closure p. 189

- Appendix 7.1 p. 193
- Appendix 7.2 p. 194
- Applications
- 8. Modeling of Engineered Environmental Systems p. 197
  - 8.1 Introduction p. 197
  - 8.2 Modeling Example: Transients in Sequencing Batch Reactors p. 197
  - 8.3 Modeling Example: CMFRs in Series for Toxicity Management p. 204
  - 8.4 Modeling Example: Municipal Wastewater Treatment p. 213
  - 8.5 Modeling Example: Chemical Oxidation p. 217
  - 8.6 Modeling Example: Analysis of Catalytic Bed Reactor p. 224
  - 8.7 Modeling Example: Waste Management p. 228
  - 8.8 Modeling Example: Activated Carbon Treatment p. 228
  - 8.9 Modeling Example: Bioregeneration of Activated Carbon p. 231
  - 8.10 Modeling Example: Pipe Flow Analysis p. 236
  - 8.11 Modeling Example: Oxygen/Nitrogen Transfer in Packed Columns p. 240
  - 8.12 Modeling Example: Groundwater Flow Management p. 243
  - 8.13 Modeling Example: Diffusion through Porous Media p. 247
- 9. Modeling of Natural Environmental Systems p. 253
  - 9.1 Introduction p. 253
  - 9.2 Modeling Example: Lakes in Series p. 253
  - 9.3 Modeling Example: Radionuclides in Lake Sediments p. 259
  - 9.4 Modeling Example: Algal Growth in Lakes p. 263
  - 9.5 Modeling Example: Contaminant Transport Visualization p. 270
  - 9.6 Modeling Example: Methane Emissions from Rice Fields p. 273
  - 9.7 Modeling Example: Chemical Equilibrium p. 275
  - 9.8 Modeling Example: Toxicological Exposure Evaluation p. 279
  - 9.9 Modeling Example: Visualization of Groundwater Flow p. 282
  - 9.10 Modeling Example: Air Pollution--Puff Model p. 286
  - 9.11 Modeling Example: Air Pollution--Plume Model p. 289
  - 9.12 Modeling Example: Fugacity-Based Modeling p. 293
  - 9.13 Modeling Example: Well Placement and Water Quality Management p. 297
- Bibliography p. 305
- Index p. 309
