

- **Preface**
- **Part I Mitochondrial Disease Models**
- **1 Mitochondria-Based Model for Fetal Origin of Adult Disease and Insulin Resistance**
- **2 Evolutional Analysis in Determining Pathogenic versus Nonpathogenic Mutations of ATPase 6 in Human Mitochondriopathy: Chin-Yuan Tzen and Tsu-Yen Wu**
- **3 Restoration of Mitochondrial Function in Cells with Complex I Deficiency**
- **4 Hearing Loss in Mitochondrial Disorders**
- **5 Brain Single Photon Emission Computed Tomography in Patients with A3243G Mutation in Mitochondrial DNA tRNA**
- **6 Upregulation of Matrix Metalloproteinase 1 and Disruption of Mitochondrial Network in Skin Fibroblasts of Patients with MERRF Syndrome**
- **7 Increased Oxidative Damage with Altered Antioxidative Status in Type 2 Diabetic Patients Harboring the 16189 T to C Variant of Mitochondrial DNA**
- **8 Alteration of the Copy Number of Mitochondrial DNA in Leukocytes of Patients with Hyperlipidemia**
- **9 A New Noninvasive Test to Detect Mitochondrial Dysfunction of Skeletal Muscles in Progressive Supranuclear Palsy**
- **10 High Prevalence of the COII/tRNALys Intergenic 9-bp Deletion in Mitochondrial DNA of Taiwanese Patients with MELAS or MERRF Syndrome**
- **Part II Mitochondrial Genome**
- **11 Analysis of Proteome Bound to D-Loop Region of Mitochondrial DNA by DNA-Linked Affinity Chromatography and Reverse-Phase Liquid Chromatography/Tandem Mass Spectrometry**
- **12 Mitochondrial Transcription Factor A in the Maintenance of Mitochondrial DNA: Overview of Its Multiple Roles**
- **13 Mitochondrial Genome Instability and mtDNA Depletion in Human Cancers**
By Hsin-Chen Lee
- **14 Frequent Occurrence of Mitochondrial Microsatellite Instability in the D-Loop Region of Human Cancers**
- **15 Analysis of Heteroplasmy in Hypervariable Region II of Mitochondrial DNA in Maternally Related Individuals**
- **16 Deleted Mitochondrial DNA in Human Luteinized Granulosa Cells**
- **17 Identification of Human-Specific Adaptation Sites of ATP6**
- **Part III Mitochondrial Function**
- **18 Repeated Ovarian Stimulations Induce Oxidative Damage and Mitochondrial DNA Mutations in Mouse Ovaries**
- **19 Calcium Stimulates Mitochondrial Biogenesis in Human Granulosa Cells**
- **20 Dynamics of Mitochondria and Mitochondrial Ca²⁺ near the Plasma Membrane of PC12 Cells: A Study by Multimode Microscopy**
