

- Preface p. xiii
- Introduction p. xv
- 1 Fundamental Concepts p. 1
  - Introduction p. 1
  - 1.1 Conceptual Representation of Adaptive Arrays p. 1
  - 1.2 The Linear Array p. 2
    - 1.2.1 Structure and Behavior of a Linear Array p. 3
    - 1.2.2 Array Radiation Formulas and Patterns p. 5
  - 1.3 The Beam Former p. 10
    - 1.3.1 The Definition and Function of a Beam Former p. 11
    - 1.3.2 Characteristics of Orthogonal Beam Formers p. 11
    - 1.3.3 Separation of Desired and Undesired Signals p. 12
    - 1.3.4 Measurement of Array Radiation Patterns p. 14
  - 1.4 The Signals p. 16
    - 1.4.1 Distribution of Signal Sources and Signals p. 16
    - 1.4.2 System with Two Transmitting Signal Sources p. 17
  - 1.5 Signal Processing Network p. 19
    - 1.5.1 Removal of Interference Signals by the Signal Processing Network p. 19
    - 1.5.2 Final Output Signal p. 20
    - 1.5.3 Final Output Power p. 20
    - 1.5.4 Cancellation of the Interference Signal p. 22
  - 1.6 Adaptive Signal Processing p. 26
- Reference p. 27
- 2 Simplified Analysis p. 29
  - Introduction p. 29
  - 2.1 The Signals p. 30
    - 2.1.1 Signals at the Input and Output Ports of a Beam Former p. 30
    - 2.1.2 Space Transfer Functions p. 31
    - 2.1.3 Signals at the Input Ports of the Beam Former p. 33
    - 2.1.4 Beam Former Transfer Functions p. 33
    - 2.1.5 Signals at the Beam Former Output Ports p. 34
    - 2.1.6 Signals at the Input Ports of the Signal Processing Network p. 37
  - 2.2 Two-Source, Two-Output System p. 38
    - 2.2.1 The Signals p. 38
    - 2.2.2 Signal Processing Network p. 39
    - 2.2.3 Final Output Power p. 45
    - 2.2.4 Cancellation of Interference Signal and the Null Depth p. 46
  - 2.3 Two-Source, Three-Output System p. 50
    - 2.3.1 The Signals p. 50
    - 2.3.2 Signal Processing Network p. 52
    - 2.3.3 Final Output Power p. 59
    - 2.3.4 Null Depth p. 59
  - 2.4 Two-Source, Multioutput System p. 63
    - 2.4.1 The Signals p. 63

- 2.4.2 Signal Processing Network p. 65
- 2.4.3 Final Output Power p. 71
- 2.4.4 Alternate Method for Estimating the Null Depth p. 72
- 2.5 Three-Source, Two-Output System p. 73
- 2.5.1 The Signals p. 73
- 2.5.2 Signal Processing Network p. 75
- 2.5.3 Final Output Power p. 78
- 2.5.4 Null Depth p. 80
- 2.6 Three-Source, Three-Output System p. 81
- 2.6.1 The Signals p. 81
- 2.6.2 Signal Processing Network p. 83
- 2.6.3 Final Output Power p. 87
- 2.6.4 Null Depth p. 88
- 2.7 Multisource, Two-Output System p. 90
- 2.7.1 The Signals p. 90
- 2.7.2 Signal Processing Network p. 92
- 2.7.3 Final Output Power p. 95
- 2.7.4 Null Depth p. 97
- 2.8 Multisource, Multioutput System p. 97
- 2.8.1 The Signals p. 98
- 2.8.2 Signal Processing Network p. 100
- 2.8.3 General Expression for Null Depth p. 103
- 2.8.4 Alternate Expressions for Null Depth p. 107
- 2.8.5 The Tradeoff p. 108
- 2.8.6 Number of Undesired Signals and the Active Output Ports p. 108
- 2.9 Leakage of the Desired Signal into the AUX Ports p. 109
- 2.9.1 The Leakage p. 109
- 2.9.2 The Signals p. 109
- 2.9.3 Signal Processing Network p. 110
- 2.9.4 Final Output Power p. 113
- 2.9.5 Null Depth p. 114
- 2.9.6 Minimization of Leakage of the Desired Signal into an AUX Port p. 116
- 2.10 Effect of Offset Voltage on System Performance p. 117
- 2.10.1 Offset Voltage p. 118
- 2.10.2 The Signals p. 118
- 2.10.3 Signal Processing Network p. 120
- 2.10.4 Final Output Power p. 123
- 2.10.5 Null Depth p. 124
- 2.10.6 Feedback Loop with Phase Detector p. 126
- 2.11 Effect of Space Noise on System Performance p. 126
- 2.11.1 The Noise p. 126
- 2.11.2 The Signals p. 126
- 2.11.3 Signal Processing Network p. 129
- 2.11.4 Final Output Power p. 131

- 2.11.5 Null Depth p. 133
- 2.11.6 Final Output Noise p. 134
- 2.12 Feedback Loop p. 136
- 2.12.1 Stability of the Feedback Loop p. 136
- 2.12.2 Closed-Loop Transfer Function of a Feedback Loop p. 137
- 2.12.3 Feedback Loop and the Convergence Time p. 139
- 2.13 Examples of Practical Beam Formers p. 153
- 2.13.1 The Signals p. 153
- 2.13.2 Typical 4 x 4 Beam Former p. 155
- 2.13.3 Typical 8 [times] 8 Beam Former p. 160
- 2.13.4 Beam Formers with Real Signals p. 162
- 2.14 Phase Shifters and Hybrids p. 170
- 2.14.1 Introduction p. 170
- 2.14.2 Phase Shifters p. 170
- 2.14.3 180[degree] Hybrids p. 187
- References p. 192
- 3 Basic Matrix Expressions p. 193
- Introduction p. 193
- 3.1 The Signals p. 194
- 3.1.1 Distribution of Signal Sources and Signals p. 194
- 3.1.2 Space Transfer Functions p. 194
- 3.1.3 Signals at the Beam Former Input Ports p. 196
- 3.1.4 Beam Former Transfer Functions p. 198
- 3.1.5 Signals at the Beam Former Output Ports p. 199
- 3.2 Signal Processing Network p. 200
- 3.2.1 Total Output Signal p. 201
- 3.2.2 Total Output Power p. 202
- 3.2.3 Cancellation of Interference Signals p. 204
- 3.3 Modal Representation of Matrix Expressions p. 206
- 3.3.1 Linear Expressions for Matrix Equations p. 206
- 3.3.2 Modal Decomposition of the Matrix Expressions p. 207
- 3.3.3 Steady-State Values of the Weighters in Modal Notation p. 210
- 3.3.4 Feedback Loop p. 214
- 3.4 Physical Significance of Eigenvalues p. 215
- 3.4.1 Signal Matrix in Terms of Signal Powers and Eigenvalues p. 216
- 3.4.2 Characteristics of the Transfer Function or Gain Matrix p. 217
- 3.4.3 Relation Between Eigenvalues and Signal Powers p. 221
- References p. 227
- Appendix A Final Output Power for a Two-Source, Two-Output System p. 229
- Appendix B Final Output Power for a Two-Source, Three-Output System p. 231
- Appendix C Final Output Power for a Three-Source, Two-Output System p. 235
- Appendix D Final Output Power for a Three-Source, Three-Output System p. 239
- Appendix E Final Output Power for a Multisource, Two-Output System p. 243
- Appendix F Final Output Power in the Presence of Leakage p. 249

- Appendix G Final Output Power in the Presence of Offset Voltage p. 251
- Appendix H Final Output Power in the Presence of Space Noise p. 253
- Appendix I Basic Matrix Relations p. 255
- Appendix J Touchstone-Generated Phase Values for Cross-Coupled Transmission Lines p. 259
- Appendix K Derivation of the Input Signal in Figure 2.21 p. 295
- About the Author p. 297
- Index p. 299
