

- Preface p. xiii
- Introduction to Systems Engineering p. 1
- 1.1 What Is a System? p. 2
- 1.2 System Life Cycle p. 5
- 1.2.1 Acquisition Phase p. 6
- 1.2.2 Utilization Phase p. 8
- 1.3 What Is Systems Engineering? p. 9
- 1.3.1 Requirements Engineering p. 10
- 1.3.2 Top-Down Approach p. 10
- 1.3.3 Focus on Life Cycle p. 11
- 1.3.4 System Optimization and Balance p. 13
- 1.3.5 Integration of Disciplines and Specialties p. 14
- 1.3.6 Management p. 14
- 1.4 Systems Engineering Relevance p. 15
- 1.5 Systems Engineering Benefits p. 16
- 1.6 Analysis, Synthesis, and Evaluation p. 18
- 1.6.1 Analysis p. 19
- 1.6.2 Synthesis p. 20
- 1.6.3 Evaluation p. 20
- 1.7 A Systems Engineering Framework p. 21
- 1.7.1 Systems Engineering Processes p. 23
- 1.7.2 Systems Engineering Management p. 23
- 1.7.3 Systems Engineering Tools p. 23
- 1.7.4 Related Disciplines p. 24
- Endnotes p. 24
- 2 Conceptual Design p. 29
- 2.1 Introduction p. 29
- 2.2 Identify Stakeholder Requirements p. 30
- 2.2.1 Stakeholder-Requirements Document p. 30
- 2.2.2 Identify Stakeholders p. 32
- 2.2.3 Identify Project and Enterprise Constraints p. 33
- 2.2.4 Identify External Constraints p. 34
- 2.2.5 Define Need, Goals, and Objectives p. 34
- 2.2.6 Define Operational Scenarios p. 35
- 2.2.7 Define Measures of Effectiveness p. 36
- 2.2.8 Define Life-Cycle Concepts p. 36
- 2.2.9 Confirm SRD Structure p. 36
- 2.2.10 Scoping the System p. 38
- 2.2.11 Populate SRD p. 40
- 2.2.12 SRD Endorsement p. 40
- 2.2.13 Traceability p. 41
- 2.3 System-Feasibility Analysis p. 41
- 2.4 System-Requirements Analysis p. 43
- 2.4.1 Establish Requirements Framework p. 45

- 2.4.2 Define Functional Requirements p. 47
- 2.4.3 Define Performance Requirements p. 49
- 2.4.4 Define Verification Requirements p. 50
- 2.4.5 Assign Rationale p. 50
- 2.4.6 Perform Functional Analysis and Allocation p. 51
- 2.4.7 Produce Draft System Specification p. 55
- 2.4.8 Define TPMs p. 55
- 2.4.9 System-Requirements Reviews p. 58
- 2.4.10 Other System-Level Considerations p. 59
- 2.5 System-Level Synthesis p. 60
- 2.6 System-Design Review p. 63
- Endnotes p. 65
- 3 Preliminary Design p. 67
- 3.1 Introduction p. 67
- 3.2 Subsystem-Requirements Analysis p. 68
- 3.3 Requirements Allocation p. 72
- 3.4 RBS Versus WBS p. 80
- 3.5 Interface Identification and Design p. 82
- 3.6 Subsystem-Level Synthesis and Evaluation p. 85
- 3.6.1 Review Sources of Subsystem Requirements p. 85
- 3.6.2 Investigate Preliminary Design Alternatives p. 86
- 3.6.3 Make Optimal Use of Design Space p. 88
- 3.6.4 Select Preferred Solution p. 93
- 3.7 Preliminary Design Review p. 94
- Endnotes p. 96
- 4 Detailed Design and Development p. 97
- 4.1 Introduction p. 97
- 4.2 Detailed Design Requirements p. 98
- 4.3 Designing and Integrating System Elements p. 98
- 4.3.1 Detailed Design Process p. 99
- 4.3.2 Integration p. 100
- 4.3.3 Some Detailed Design Aids p. 103
- 4.4 System Prototype Development p. 104
- 4.5 Detailed Design Reviews p. 105
- 4.5.1 Equipment/Software Design Reviews p. 105
- 4.5.2 Critical Design Review p. 106
- 4.6 Construction and Production p. 108
- 4.7 Operational Use and System Support p. 112
- 4.8 Phaseout and Disposal p. 117
- Endnotes p. 119
- 5 Systems Engineering Management p. 121
- 5.1 Introduction p. 121
- 5.2 Technical Reviews and Audits p. 121
- 5.2.1 Major Reviews p. 123

- 5.2.2 Major Audits p. 125
- 5.2.3 Technical Review and Audit Management p. 126
- 5.3 System Test and Evaluation p. 127
- 5.3.1 Developmental Test and Evaluation p. 129
- 5.3.2 Acceptance Test and Evaluation p. 130
- 5.3.3 Operational Test and Evaluation p. 131
- 5.3.4 Test Management p. 132
- 5.3.5 Testing Activities and the System Life Cycle p. 132
- 5.3.6 TEMP p. 137
- 5.4 Technical Risk Management p. 139
- 5.4.1 Risk Identification p. 140
- 5.4.2 Risk Quantification p. 141
- 5.4.3 Risk-Response Development and Control p. 142
- 5.4.4 Risk-Management Documentation p. 143
- 5.5 Configuration Management p. 144
- 5.5.1 Establishing the Baselines p. 145
- 5.5.2 Configuration-Management Functions p. 145
- 5.5.3 Configuration-Management Documentation p. 151
- 5.6 Specifications and Standards p. 152
- 5.6.1 Specifications p. 153
- 5.6.2 Standards p. 156
- 5.7 Integration Management p. 157
- 5.8 Systems Engineering Management Planning p. 159
- Endnotes p. 160
- 6 Systems Engineering Management Tools p. 163
- 6.1 Standards p. 163
- 6.2 MIL-STD-499B Systems Engineering (Draft) p. 164
- 6.2.1 General Standard Content p. 164
- 6.2.2 Systems Engineering Process p. 166
- 6.2.3 Content of the MIL-STD-499B SEMP p. 166
- 6.2.4 Additional Information and Requirements p. 168
- 6.2.5 Summary p. 170
- 6.3 EIA/IS-632 Systems Engineering p. 171
- 6.3.1 General Standard Content p. 171
- 6.3.2 Systems Engineering Process p. 171
- 6.3.3 Content of the EIA/IS-632 SEMP p. 172
- 6.3.4 Other Information and Requirements p. 172
- 6.3.5 Summary p. 172
- 6.4 IEEE 1220 (Trial Use) and IEEE 1220-IEEE Standard for Application and Management of the Systems Engineering Process p. 173
- 6.4.1 General Standard Content p. 173
- 6.4.2 IEEE 1220 Life-Cycle Model p. 175
- 6.4.3 Systems Engineering Process p. 177
- 6.4.4 Content of the IEEE 1220 Engineering Plan p. 178

- 6.4.5 Additional Material and Requirements p. 179
- 6.4.6 Summary p. 179
- 6.5 ANSI/EIA-632-Processes for Engineering a System p. 179
- 6.5.1 ANSI/EIA-632 Processes p. 180
- 6.5.2 ANSI/EIA-632 Requirements p. 181
- 6.5.3 ANSI/EIA-632 Concepts p. 183
- 6.5.4 ANSI/EIA-632 Annexes p. 186
- 6.5.5 Summary p. 187
- 6.6 Other Useful Documents p. 187
- 6.6.1 Technical Reviews and Audits p. 188
- 6.6.2 Systems Engineering Standards p. 188
- 6.6.3 Configuration Management p. 188
- 6.6.4 Specification Standards p. 189
- 6.6.5 Work Breakdown Structures p. 189
- 6.7 Capability Maturity Models p. 189
- 6.8 SEI--Systems Engineering Capability Maturity Model p. 191
- 6.8.1 SE-CMM Foundation p. 192
- 6.8.2 Process Areas p. 192
- 6.8.3 Capability Levels p. 192
- 6.8.4 Summary p. 194
- 6.9 CMM Integration p. 194
- Endnotes p. 196
- 7 Systems Engineering Process Tools p. 199
- 7.1 Analysis Tools--Requirements Engineering p. 199
- 7.1.1 What Is a Requirement? p. 200
- 7.1.2 Requirements Engineering p. 200
- 7.1.3 Requirements Documentation p. 209
- 7.1.4 Automated Requirements-Management Tools p. 210
- 7.1.5 Difficulties in Developing Requirements p. 212
- 7.2 Synthesis--Various Tools p. 214
- 7.2.1 Schematic Block Diagrams p. 214
- 7.2.2 Physical Modeling p. 215
- 7.2.3 Mathematical Modeling and Simulation p. 216
- 7.3 Evaluation--Trade-off Analysis p. 217
- Endnotes p. 222
- 8 Related Disciplines p. 225
- 8.1 Introduction p. 225
- 8.2 Project Management p. 225
- 8.3 Quality Assurance p. 230
- 8.4 Logistics Support p. 231
- 8.5 Operations p. 233
- 8.6 Design Support Network p. 233
- 8.7 Software Engineering p. 234
- 8.8 Hardware Engineering p. 235

- Endnotes p. 235
- List of Acronyms p. 237
- About the Authors p. 243
- Index p. 245
