

- Preface p. xv
- Part I Systems Philosophy, Systems Science p. 1
- Chapter 1 The Need for, and Value of, Systems p. 3
  - The Book as a System p. 3
  - Origins of Systems Science p. 3
  - A Mechanistic World p. 3
  - Perceived Limitations in the Traditional Sciences p. 4
  - Life and the Second Law p. 5
  - Information and Entropy p. 5
  - Causality and Teleology p. 6
  - Concept of Open Systems p. 6
  - General Systems Theory p. 6
  - Identifying and Defining a System p. 8
  - Basic System Models p. 8
  - Fundamental System Constructs p. 23
  - Definitions and Justification p. 25
  - Systems Principles p. 26
  - Classifying Systems p. 27
  - Classifying Systems by Complexity p. 29
  - Classifying Systems by Morphology p. 29
  - Classifying Systems by Behavior p. 38
  - Summary p. 41
  - Assignments p. 42
- Chapter 2 Measure for Measure p. 45
  - Measuring Value p. 45
  - Measuring Properties, Capabilities, and Behaviors p. 49
  - Trade-offs p. 49
  - Limitations p. 50
  - Entropy p. 53
  - System Efficiency p. 54
  - System Effectiveness p. 56
  - Efficiency, Effectiveness, and Entropy p. 56
  - Genetic Algorithmic Methods of Adjustment p. 57
  - Optimizing Measures p. 58
  - Value for Money, and Cost Effectiveness p. 58
  - Cost Exchange Ratios p. 59
  - Casualty Exchange Ratios p. 60
  - Summary p. 60
  - Assignment p. 60
- Chapter 3 The Human Element p. 64
  - Categorization p. 64
  - Motivation, Instinct, and Inheritance p. 65
  - Intelligence and Behavior p. 66
  - Belief Systems p. 68

- Resistance to Change p. 70
- Decision Making p. 71
- Perceived Entropy Reduction p. 73
- Summary p. 73
- Assignment p. 73
- Chapter 4 Systems Engineering Philosophy p. 75
- Holism and Emergence p. 75
- Problem Solving p. 78
- Perceptions of Connectedness p. 79
- Systems of Systems p. 80
- Bottom-up Integration p. 81
- Systems of Systems: Volume Supply p. 83
- Systems of Systems in Defense p. 84
- Systems Engineering Philosophy in Methods p. 88
- Summary p. 89
- Assignment p. 89
- Chapter 5 A Theory of Complexity p. 91
- Characterizing Complexity p. 91
- Elaboration p. 93
- Encapsulation p. 95
- Variety p. 97
- Minimum Variety p. 97
- Useful Variety p. 98
- Limited Variety p. 99
- Generation of Variety p. 100
- Energy as a Source of Variety p. 101
- Open Systems Interactions p. 101
- Summary p. 104
- Assignments p. 104
- Chapter 6 Systems Life Cycle Theory p. 107
- Introduction p. 107
- The Seven Principles of Open Systems p. 107
- The Principle of System Reactions p. 107
- The Principle of System Cohesion p. 108
- The Principle of System Adaptation p. 109
- The Principle of Connected Variety p. 109
- The Principle of Limited Variety p. 111
- The Principle of Preferred Patterns p. 111
- The Principle of Cyclic Progression p. 112
- Synthesizing the System Life Cycle p. 112
- Applying Life Cycle Theory p. 115
- Economic Systems p. 115
- Political Systems p. 116
- Business Systems p. 117

- Organizational Systems p. 117
- Changing System Behavior p. 118
- Predicting System Behavior p. 118
- Systems Engineering p. 119
- Summary p. 120
- Assignments p. 120
- Chapter 7 The Social Genotype p. 123
  - Introduction p. 123
  - Change and the Social Genotype p. 124
  - Quantifying the Social Genotype p. 125
  - Change by "Budding Off" p. 127
  - Progressive Conversion p. 127
  - Continuous Revolution p. 128
  - The Military and the Social Genotype p. 129
  - Systems Engineering and the Social Genotype p. 129
  - Summary p. 130
  - Assignment p. 130
- Part II Systems Thinking p. 131
- Chapter 8 Tools and Methods for Systems Thinking p. 133
  - About Systems Thinking p. 133
  - Facing Up to Our Real, Nonlinear, Dynamic World p. 133
  - Chaotic Perspectives p. 135
  - Minimalist Behavioral Systems Thinking p. 136
  - Causal Loop Modeling p. 137
  - Promoting Completeness with CLMs p. 140
  - Patterns in CLMs p. 142
  - N<sup>2</sup> Charts p. 143
  - The Hand-Drawn Tool p. 143
  - Encapsulation and Elaboration p. 146
  - Dynamic N<sup>2</sup> Charts p. 147
  - Automating the N<sup>2</sup> Chart p. 147
  - Interpretive Structural Modeling p. 148
  - R-Nets p. 151
  - Behavior Diagramming p. 153
  - Soft Methods p. 155
  - Soft Systems Thinking p. 155
  - The Soft Systems Methodology p. 156
  - The Rigorous Soft Method p. 157
  - The TRIAD Building System p. 161
  - The Generic Reference Model p. 163
  - Characterizing a System p. 163
  - Being p. 165
  - Doing p. 165
  - Thinking p. 169

- Synthesizing the Whole GRM from the Parts p. 171
- Using the Generic Reference Model p. 173
- Nonlinear Dynamic System Synthesis p. 175
- Summary p. 179
- Assignments p. 179
- Chapter 9 System Thinking at Work: Case Studies p. 181
  - The Doctors' Surgery p. 182
  - Hospital Waiting Time p. 185
  - Societal Power p. 187
  - National Energy Strategy p. 190
  - The Symptoms p. 192
  - Bringing the Imbalanced Implicit Systems Together p. 196
    - Assessment p. 198
    - Options for Addressing the Issue p. 200
    - Conclusion to RSM Issue Development p. 203
    - The Railway Dilemma p. 203
    - Stakeholder Analysis p. 203
    - The Railway p. 204
    - Computing Integrity p. 205
    - Crime Management p. 209
    - Crime and Punishment p. 209
    - Proactive Policing p. 211
    - Police Test Bed p. 215
    - A Different Approach to Policing p. 217
    - Defense Acquisition p. 219
    - Cold War Inheritance p. 219
    - A Changing World p. 220
    - U.K. Defense Procurement p. 222
    - COTS Procurement Behavior Diagram p. 226
    - Building Pyramids p. 227
    - Architectonics: The Study of Architecture p. 230
    - Systems Engineering: The Costs of Rework p. 236
    - Summary p. 239
    - Assignments p. 239
- Part III Systems Engineering p. 243
  - Chapter 10 System Concept and Design p. 245
    - System Solutions p. 245
    - Creating Solution Concepts p. 246
    - Developing Concepts: The TRIAD Building System p. 248
    - Developing System Concepts: The Seven-Step Continuum p. 254
    - The Far Side: Case Study p. 257
    - System Design p. 265
    - Design for Operation p. 268
    - Scenario-driven Design p. 268

- CONOPS p. 268
- Industrial Design Paradigms p. 270
- Design for Availability p. 272
- Design for Maintenance p. 274
- Designing Open, Interactive Systems p. 276
- Design Capability Ratcheting p. 279
- Operational Design Approach p. 280
- Evaluating and Optimizing Military Capability p. 282
- Advanced Design Methods p. 297
- Famine Relief p. 297
- Afghanistan p. 301
- Summary p. 307
- Assignments p. 307
- Chapter 11 Classification of Systems Engineering p. 309
- Defining Systems Engineering p. 309
- Extending System Useful Life p. 310
- Characterizing Systems Engineering p. 311
- The Five-Layer System Structure p. 312
- Level 1 Artifact Systems Engineering p. 314
- Level 2 Project Systems Engineering p. 315
- The Classic Systems Engineering Procedure p. 315
- Process-Oriented Systems Engineering p. 317
- Goal-Oriented Systems Engineering p. 321
- Unprecedented Systems Engineering p. 323
- Level 3 Business Systems Engineering p. 323
- Evolutionary Systems Engineering p. 325
- Level 4 Industry Systems Engineering p. 326
- Mass Production p. 326
- Lean Volume Supply Systems Engineering p. 328
- Comparing Mass Production and Lean Volume Supply p. 330
- Nesting at Levels 2, 3, and 4 p. 333
- Level 5 Socioeconomic Systems Engineering p. 334
- Science-based Systems Engineering p. 336
- Summary p. 339
- Assignments p. 340
- Chapter 12 From Systems Thinking to Systems in Operation p. 343
- Systems Thinking: About Systems Engineering p. 343
- Beyond Technology p. 343
- Always Two Systems: Creating and Created p. 344
- Identifying the Stream p. 347
- The Source p. 347
- Partitioning the Stream p. 349
- Confluence p. 351
- The End-to-End Life Cycle Process p. 354

- Outline Level 2/3: Conceptual Process p. 354
- The Systems Engineering Shadow-board p. 356
- System-level Elaboration and Specification p. 357
- Integration, Test, and Proving p. 358
- Focusing Developing Emergent Properties p. 359
- Systems Engineering Goals and Objectives p. 360
- Developing Structural Support p. 363
- Process Resourcing p. 363
- Understanding the Process as a System p. 364
- Calibrating the Creating System p. 367
- Tailoring the Systems Engineering Process p. 369
- Accommodating Legacy and Change p. 369
- Police Information System p. 370
- The New Interceptor p. 371
- Summary p. 373
- Assignments p. 374
- Chapter 13 Operational Systems Engineering p. 375
- Operational Systems Engineering: Levels 2-4 p. 375
- Operational Systems Engineering at Level 2 p. 375
- Operational Maintenance Systems p. 378
- Operational Systems Engineering at Level 3 p. 380
- Operational Systems Engineering at Level 4 p. 382
- Underground Railways p. 384
- Heijunka p. 386
- Market Systems Engineering p. 388
- Socioeconomic Systems Engineering: Level 5 p. 390
- Social Capital p. 392
- Historical Systems Engineering at Level 5 p. 393
- Summary p. 395
- Assignments p. 395
- Part IV Systems Management and Organization p. 397
- Chapter 14 Managing Systems p. 399
- Managing Systems Concepts p. 399
- The Need for Management p. 399
- Management by Control p. 401
- The "Control Freak" p. 402
- Management by Incentive p. 403
- Management by Competition p. 405
- Organized Management Systems p. 406
- Organized Creating Systems p. 406
- Tensions within Organizations p. 407
- Organized Military C<sup>2</sup> p. 410
- Government C<sup>2</sup> p. 411
- Systems Organization at Industry Level 4 p. 412

- Creating the Culture p. 413
- Project Management Versus Systems Engineering p. 414
- To Phase or not to Phase p. 416
- Stages and Phases p. 416
- Phased Defense Procurement p. 417
- Elicitation and Requirements p. 418
- Managing Customer Control p. 420
- Specification Trees p. 421
- Looking the Gift-Requirement in the Teeth p. 422
- Project Versus Functional Versus Matrix Organization p. 423
- Organizational Paradigms p. 423
- Dynamics of Organizational Change p. 425
- Maintaining the Edge p. 426
- Summary p. 427
- Assignments p. 427
- Chapter 15 Societal Systems Evolution p. 431
- Outcome as the Measure of Systems p. 431
- Social Engineering p. 432
- The Outlook p. 437
- Increasing Population p. 437
- Spreading Concrete p. 438
- Atmospheric Pollution p. 439
- Fresh Water Shortages p. 439
- Energy Shortages p. 440
- System Thinking: Societal Evolution p. 440
- Mountain Retreats p. 441
- Island Communities p. 442
- Littoral Enclaves p. 443
- Submersible Cities p. 445
- Pursuing the Goal p. 447
- Summary p. 448
- Assignments p. 448
- Appendix A Configuration Entropy as a Useful Measure of Systems p. 449
- Measuring  $N^2$  Charts p. 449
- Scoring  $N^2$  Charts p. 450
- Minimizing  $N^2$  Chart Entropy p. 450
- Practical Example of Entropy Measurement and Reduction p. 452
- Measuring Process Entropy p. 453
- Summary p. 457
- Appendix B Set Theoretic Proof of Method: Rigorous Soft Method p. 459
- Diagrammatic Representation p. 459
- Set Theory Proof of Rigorous Soft Method p. 460
- About the Author p. 463
- Index p. 465
