

## Table of contents provided by Syndetics

- **Preface** (p. v)
- **Table of Contents** (p. ix)
- **1 Fuzzy Set Theory** (p. 1)
- **I Classical Set Theory** (p. 1)
- **II Fuzzy Set Theory** (p. 5)
- **III Interval Arithmetic** (p. 9)
- **A Some Fundamental Concepts** (p. 10)
- **B Interval Arithmetic** (p. 11)
- **C Algebraic Properties of Interval Arithmetic** (p. 14)
- **D Interval Evaluation** (p. 17)
- **IV Operations on Fuzzy Sets** (p. 21)
- **A Fuzzy Sets and  $[\alpha]$  Cuts** (p. 21)
- **B Arithmetic of Fuzzy Sets** (p. 22)
- **Problems** (p. 37)
- **2 Fuzzy Logic Theory** (p. 39)
- **I Classical Logic Theory** (p. 40)
- **A Fundamental Concepts** (p. 40)
- **B Logical Functions of the Two-Valued Logic** (p. 41)
- **II The Boolean Algebra** (p. 43)
- **A Basic Operations of the Boolean Algebra** (p. 43)
- **B Basic Properties of the Boolean Algebra** (p. 43)
- **III Multi-Valued Logic** (p. 46)
- **A The Three-Valued Logic** (p. 46)
- **B The n-Valued Logic** (p. 46)
- **IV Fuzzy Logic and Approximate Reasoning** (p. 47)
- **V Fuzzy Relations** (p. 51)
- **Problems** (p. 58)
- **3 Some Applications of Fuzzy Logic** (p. 61)
- **I Product Quality Evaluation** (p. 61)
- **II Decision Making for Investment** (p. 64)
- **III Performance Evaluation** (p. 66)
- **A Problem Formulation** (p. 66)
- **B Performance Evaluation Formula** (p. 69)
- **IV Miscellaneous Examples** (p. 73)
- **Problems** (p. 88)
- **4 Fuzzy Rule Base and Fuzzy Modeling** (p. 89)
- **I Fuzzy Rule Base** (p. 89)
- **A Fuzzy IF-THEN Rules** (p. 89)
- **B Fuzzy Logic Rule Base** (p. 91)
- **C Fuzzy IF-THEN Rule Base as a Mathematical Model** (p. 96)
- **D Evaluation of Fuzzy IF-THEN Rules** (p. 98)
- **II Fuzzy Modeling** (p. 99)
- **A Basic Concept of System Modeling** (p. 100)
- **B Modeling of Static Fuzzy Systems** (p. 101)

- **C Parameters Identification in Static Fuzzy Modeling** (p. 108)
- **D Discrete-Time Dynamic Fuzzy Systems Stability** (p. 115)
- **D.1 Dynamic Fuzzy Systems without Control** (p. 116)
- **D.2 Dynamic Fuzzy Systems with Control** (p. 119)
- **Problems** (p. 124)
- **5 Fuzzy Control Systems** (p. 125)
- **I Classical Programmable Logic Control** (p. 126)
- **II Fuzzy Logic Control: A General Model-Free Approach** (p. 138)
- **A Closed-Loop Set-Point Tracking System** (p. 138)
- **B Design Principle of Fuzzy Logic Controllers** (p. 141)
- **C Examples of Model-Free Fuzzy Controller Design** (p. 155)
- **Problems** (p. 168)
- **6 Fuzzy PID Control Systems** (p. 171)
- **I Conventional PID Controllers** (p. 171)
- **II Fuzzy PID Controllers (Type 1)** (p. 179)
- **A Discretization of PID Controllers** (p. 179)
- **B Designing Type-1 Fuzzy PID Controllers** (p. 183)
- **C Two Examples** (p. 184)
- **III Fuzzy PID Controllers (Type 2)** (p. 190)
- **A Designing Type-2 Fuzzy PD Controller** (p. 192)
- **B Designing Type-2 Fuzzy PI Controller** (p. 207)
- **C Designing Type-2 Fuzzy PI+D Controller** (p. 209)
- **IV Fuzzy PID Controllers: Stability Analysis** (p. 225)
- **A BIBO Stability and the Small Gain Theorem** (p. 226)
- **B BIBO Stability of Fuzzy PD Control Systems** (p. 230)
- **C BIBO Stability of Fuzzy PI Control Systems** (p. 233)
- **D BIBO Stability of Fuzzy PI+D Control Systems** (p. 236)
- **E Graphical Stability Analysis of Fuzzy PID Control Systems** (p. 237)
- **Problems** (p. 242)
- **7 Computational Verb Fuzzy Controllers** (p. 245)
- **I Computational Verbs and Verb Numbers** (p. 245)
- **A Fundamental Concepts** (p. 246)
- **B Computational Verb Numbers** (p. 248)
- **C Verb Similarity** (p. 249)
- **II Verb Rules and Verb Inference** (p. 250)
- **A Verb Inference with a Single Verb Rule** (p. 250)
- **B Verb Inference with a Verb Algorithm** (p. 253)
- **B From Fuzzy Control Rules to Verb-Based Control Rules** (p. 259)
- **C Deverbification: Reconstruct Computational Verbs from Similarity Functions** (p. 255)
- **III Computational Verb-Based Fuzzy PID Controllers** (p. 255)
- **A Fuzzy Gain Schedulers** (p. 257)
- **C Constructing Verb Rules for Tuning the Gain  $K_p$  from Phase Plots** (p. 262)
- **D Constructing Verb Rules for Tuning the Gain  $K_d$  from Phase Plots** (p. 266)

- **E Constructing Verb Rules for Tuning the Gain  $[\gamma]$  from Phase Plots** (p. 268)
- **F Implementing the Verb-based P-controller** (p. 268)
- **G Implementing the Verb-based P-controller for a Second-Order Plant** (p. 272)
- **Problems** (p. 286)
- **References** (p. 289)
- **Solutions** (p. 291)
- **Index** (p. 313)
