

Table of contents

- **Preface** (p. v)
- **1 Introduction** (p. 1)
 - **1.1 Definition and Main Groups of Corrosion - Terminology** (p. 1)
 - **1.2 Importance of Corrosion and Prevention Efforts** (p. 1)
 - **1.3 Corrosion Science and Corrosion Technology** (p. 3)
- **References** (p. 4)
- **2 Wet Corrosion: Characteristics, Prevention and Corrosion Rate** (p. 5)
 - **2.1 Description of a Wet Corrosion Process** (p. 5)
 - **2.2 Crucial Mechanisms Determining Corrosion Rates** (p. 6)
 - **2.3 Corrosion Prevention Measures** (p. 7)
 - **2.4 Expressions and Measures of Corrosion Rates** (p. 8)
 - **2.5 Basic Properties That Determine if Corrosion Is Possible and How Fast Material Can Corrode** (p. 10)
- **References** (p. 10)
- **Exercises** (p. 10)
- **3 Thermodynamics - Equilibrium Potentials** (p. 13)
 - **3.1 Introduction** (p. 13)
 - **3.2 Free Enthalpy and Cell Voltage** (p. 13)
 - **3.3 The Influence of the State of Matter on Free Enthalpy and the Change of Free Enthalpy** (p. 16)
 - **3.4 Change of Free Enthalpy in Chemical Reactions. Reversible Cell Voltage** (p. 18)
 - **3.5 Electrode Reactions and Electrode Potentials** (p. 19)
 - **3.6 Series of Standard Potentials** (p. 23)
 - **3.7 Equilibrium Potentials of Reactions with Iron at 25°C** (p. 23)
 - **3.8 Pourbaix Diagram** (p. 26)
 - **3.9 A Simplified Presentation of Equilibrium Potential and Deviation from It** (p. 29)
 - **3.10 Possible Range for Real Potentials Under Corrosion Conditions** (p. 31)
- **References** (p. 32)
- **Exercises** (p. 32)
- **4 Electrode Kinetics** (p. 35)
 - **4.1 Introduction: Anodic and Cathodic Reactions** (p. 35)
 - **4.2 Polarization and Overvoltage** (p. 36)
 - **4.3 Exchange Current Density** (p. 37)
 - **4.4 Activation Polarization** (p. 37)
 - **4.5 Concentration Polarization** (p. 38)
 - **4.6 Overvoltage Due to Concentration Polarization** (p. 42)
 - **4.7 Combined Activation and Concentration Polarization** (p. 43)
 - **4.8 Resistance (Ohmic) Polarization** (p. 44)
 - **4.9 Determination of Corrosion Potential and Corrosion Rate** (p. 44)
 - **4.10 Recording Polarization Curves with a Potentiostat** (p. 47)
 - **4.11 Conditions That Affect Polarization Curves, Overvoltage Curves and Corrosion Rates** (p. 50)

- **References** (p. 50)
- **Exercises** (p. 51)
- **5 Passivity** (p. 53)
- **5.1 Passivation and Passivity Described by Anodic Polarization and Overvoltage Curves** (p. 53)
- **5.2 Passivity - Reasons and Characteristic Features** (p. 54)
- **5.3 Breakdown of Passive Films** (p. 57)
- **5.4 Stable and Unstable Passive State** (p. 58)
- **5.5 Practical Utilization of Passivation and Passivity 61 References 62 Exercises** (p. 62)
- **6 Corrosion Types with Different Cathodic Reactions** (p. 65)
- **6.1 General** (p. 65)
- **6.2 Corrosion under Oxygen Reduction** (p. 66)
- **6.2.1 General Circumstances and Data** (p. 66)
- **6.2.2 Effect of Temperature** (p. 68)
- **6.2.3 Effect of Surface Deposits** (p. 70)
- **6.2.4 Effect of Flow Velocity** (p. 70)
- **6.2.5 Corrosion under Thin Films of Water** (p. 74)
- **6.3 Corrosion under Hydrogen Evolution** (p. 75)
- **6.4 Corrosion under Effects of Bacteria** (p. 77)
- **6.5 CO₂ Corrosion** (p. 78)
- **6.5.1 General** (p. 78)
- **6.5.2 Mechanisms** (p. 78)
- **6.5.3 Corrosion Rate** (p. 80)
- **6.6 H₂S Corrosion** (p. 82)
- **6.7 Other Cathodic Reactions** (p. 83)
- **References** (p. 84)
- **Exercises** (p. 86)
- **7 Different Forms of Corrosion Classified on the Basis of Appearance** (p. 89)
- **7.1 Introduction** (p. 89)
- **7.2 Uniform (General) Corrosion** (p. 91)
- **7.3 Galvanic Corrosion** (p. 94)
- **7.3.1 Conditions That Determine Corrosion Rates** (p. 94)
- **7.3.2 Prevention of Galvanic Corrosion** (p. 105)
- **7.3.3 Application of Galvanic Elements in Corrosion Engineering** (p. 107)
- **7.4 Thermogalvanic Corrosion** (p. 107)
- **7.5 Crevice Corrosion** (p. 108)
- **7.5.1 Occurrence, Conditions** (p. 108)
- **7.5.2 Mechanism** (p. 109)
- **7.5.3 Mathematical Models of Crevice Corrosion** (p. 113)
- **7.5.4 Crevice Corrosion Testing** (p. 115)
- **7.5.5 Practical Cases of Crevice and Deposit Corrosion** (p. 119)
- **7.5.6 Galvanic Effects on Crevice Corrosion** (p. 120)
- **7.5.7 Prevention of Crevice Corrosion** (p. 121)
- **7.6 Pitting Corrosion** (p. 122)

- **7.6.1 Conditions, Characteristic Features and Occurrence** (p. 122)
- **7.6.2 Mechanisms** (p. 124)
- **7.6.3 Influencing Factors** (p. 126)
- **7.6.4 The Time Dependence of Pitting** (p. 127)
- **7.6.5 Pitting Corrosion Testing** (p. 130)
- **7.6.6 Prevention of Pitting Corrosion** (p. 131)
- **7.7 Intergranular Corrosion** (p. 131)
- **7.7.1 General Characteristics, Causes and Occurrence** (p. 131)
- **7.7.2 Austenitic Stainless Steels** (p. 132)
- **7.7.3 Ferritic Stainless Steels** (p. 134)
- **7.7.4 Ni-based Alloys** (p. 135)
- **7.7.5 Aluminium Alloys** (p. 135)
- **7.8 Selective Corrosion (Selective Leaching)** (p. 135)
- **7.9 Erosion and Abrasion Corrosion** (p. 138)
- **7.9.1 Characteristic Features and Occurrence** (p. 138)
- **7.9.2 Types and Mechanisms** (p. 139)
- **7.9.3 Erosion and Erosion Corrosion in Liquid Flow with Solid Particles** (p. 140)
- **7.9.4 Influencing Factors and Conditions in Liquids and Liquid-Gas Mixtures** (p. 144)
- **7.9.5 Critical Velocities** (p. 146)
- **7.9.6 Abrasion and Other Wear Processes Combined with Corrosion** (p. 149)
- **7.9.7 Preventive Measures** (p. 150)
- **7.10 Cavitation Corrosion** (p. 152)
- **7.11 Fretting Corrosion (Fretting Oxidation)** (p. 154)
- **7.12 Stress Corrosion Cracking (SCC)** (p. 156)
- **7.12.1 Characteristic Features and Occurrence** (p. 156)
- **7.12.2 Mechanisms** (p. 157)
- **7.12.3 Fracture Mechanics Quantities** (p. 163)
- **7.12.4 Cracking Course and Data for Some SCC Conditions** (p. 164)
- **7.12.5 Prevention of SCC** (p. 170)
- **7.13 Corrosion Fatigue** (p. 170)
- **7.13.1 Definition, Characteristic Features and Occurrence** (p. 170)
- **7.13.2 Influencing Factors and Mechanisms** (p. 171)
- **7.13.3 Factors Most Important for Crack Initiation and Early Growth** (p. 175)
- **7.13.4 Crack Growth Rate and Factors Affecting It** (p. 176)
- **7.13.5 Calculation of Number of Cycles to Failure of Welded Steel Structures** (p. 179)
- **7.13.6 Prevention of Corrosion Fatigue** (p. 180)
- **References** (p. 181)
- **Exercises** (p. 184)
- **8 Corrosion in Different Environments** (p. 193)
- **8.1 Atmospheric Corrosion** (p. 193)
- **8.1.1 Environmental Factors and Their Effects** (p. 193)
- **8.1.2 Atmospheric Corrosion on Different Materials** (p. 196)

- **8.2 Corrosion in Fresh Water and Other Waters** (p. 198)
- **8.3 Corrosion in Seawater** (p. 203)
- **8.4 Corrosion in Soils** (p. 206)
- **8.5 Corrosion in Concrete** (p. 210)
- **8.6 Corrosion in the Petroleum Industry** (p. 212)
- **References** (p. 215)
- **Exercises** (p. 217)
- **9 Corrosion Testing, Monitoring and Inspection** (p. 219)
- **9.1 Corrosion Testing in General** (p. 219)
- **9.1.1 Objectives** (p. 219)
- **9.1.2 Test Methods** (p. 220)
- **9.1.3 Testing Procedure** (p. 221)
- **9.2 Electrochemical Testing** (p. 223)
- **9.3 Corrosion Monitoring and Inspection** (p. 226)
- **9.3.1 Monitoring of Cathodic Protection** (p. 227)
- **9.3.2 Inspection and Monitoring of Process Plants** (p. 229)
- **9.3.3 Monitoring and Testing in Other Environments** (p. 232)
- **References** (p. 233)
- **Exercise** (p. 234)
- **10 Corrosion Prevention** (p. 237)
- **10.1 Materials Selection** (p. 237)
- **10.1.1 General Considerations** (p. 237)
- **10.1.2 Some Special Aspects of Materials Selection for the Offshore Industry** (p. 240)
- **10.1.3 Unalloyed and Low-alloy Steels and Cast Irons** (p. 241)
- **10.1.4 High-alloy Cast Irons** (p. 242)
- **10.1.5 Stainless Steels** (p. 243)
- **10.1.6 Nickel Alloys** (p. 250)
- **10.1.7 Copper and Its Alloys** (p. 250)
- **10.1.8 Aluminium and Its Alloys** (p. 254)
- **10.1.9 Titanium and Its Alloys** (p. 256)
- **10.1.10 Other Metallic Materials** (p. 257)
- **10.1.11 Non-metallic Materials** (p. 258)
- **10.2 Change of Environment** (p. 259)
- **10.3 Proper Design** (p. 262)
- **10.4 Cathodic Protection** (p. 266)
- **10.4.1 Principle** (p. 266)
- **10.4.2 Protection Criteria and Specifications** (p. 269)
- **10.4.3 Cathodic Protection with Sacrificial Anodes** (p. 273)
- **10.4.4 Cathodic Protection with Impressed Current** (p. 276)
- **10.4.5 Electrolyte Resistance, Potential Variation and Current Distribution in CP Systems and Galvanic Elements** (p. 278)
- **10.5 Anodic Protection** (p. 281)
- **10.6 Corrosion Protection by Coatings** (p. 282)
- **10.6.1 Metallic Coatings** (p. 283)
- **10.6.2 Other Inorganic Coatings** (p. 292)

- **10.6.3 Paint Coatings** (p. 293)
- **10.6.4 Other Forms of Organic Coatings** (p. 299)
- **10.6.5 Pre-treatment Before Coating** (p. 300)
- **References** (p. 302)
- **Exercises** (p. 304)
- **Subject Index** (p. 309)
