

- **Abbreviations** (p. vii)
- **Preface** (p. ix)
- **About the authors** (p. x)
- **Foreword** (p. xi)
- **How to use this book** (p. 1)
- **How this book is designed** (p. 4)
- **Statistics which describe data**
- **Percentages** (p. 7)
- **Mean** (p. 9)
- **Median** (p. 12)
- **Mode** (p. 14)
- **Standard deviation** (p. 16)
- **Statistics which test confidence**
- **Confidence intervals** (p. 20)
- **P values** (p. 24)
- **Statistics which test differences**
- **t tests and other parametric tests** (p. 28)
- **Risk ratio** (p. 37)
- **Mann-Whitney and other non-parametric tests** (p. 31)
- **Chi-squared** (p. 34)
- **Statistics which compare risk**
- **Odds ratio** (p. 40)
- **Risk reduction and numbers needed to treat** (p. 43)
- **Statistics which analyze relationships**
- **Correlation** (p. 48)
- **Regression** (p. 53)
- **Statistics which analyze survival**
- **Survival analysis: life tables and Kaplan-Meier plots** (p. 57)
- **The Cox regression model** (p. 60)
- **Statistics which analyze clinical investigations and screening**
- **Sensitivity, specificity and predictive value** (p. 62)
- **Level of agreement and Kappa** (p. 67)
- **Other concepts** (p. 69)
- **Statistics at work** (p. 73)
- **Standard deviation, relative risk, confidence intervals, chi-squared and P values** (p. 74)
- **Odds ratios and confidence intervals** (p. 78)
- **Correlation and regression** (p. 82)
- **Survival analysis and risk reduction** (p. 86)
- **Sensitivity, specificity and predictive values** (p. 90)
- **Index** (p. 113)
- **Glossary** (p. 94)
