

- Series Editor's Foreword p. xiii
- Acknowledgements p. xv
- Foreword p. xvii
- Chapter 1 Introduction p. 1
- 1.1 Rationale: requirement for component quality assurance p. 1
- 1.2 Selection of optimum materials and design parameters p. 2
- 1.3 Research objective p. 3
- Chapter 2 Overview p. 5
- 2.1 Project overview p. 5
- 2.2 The KBS for P/M as a concurrent engineering tool p. 6
- 2.3 Methodologies for knowledge-based system implementation p. 7
- Chapter 3 Literature Review p. 19
- 3.1 Summary p. 19
- 3.2 Introduction p. 19
- 3.3 Outlines of P/M simulations p. 21
- 3.3.1 Powder packing p. 21
- 3.3.2 Powder compaction p. 21
- 3.3.3 Sintering p. 25
- 3.3.4 Powder Injection Moulding (PIM) p. 26
- 3.4 Application of knowledge-based techniques to powder metallurgy p. 28
- 3.4.1 Recent KBS for P/M projects p. 29
- 3.4.2 Enabling research: the application of neural networks to P/M modelling p. 31
- 3.5 Discussion and conclusions p. 31
- Chapter 4 A Knowledge-based System for Powder Metallurgy p. 33
- 4.1 Overview of KBS for P/M research p. 33
- 4.2 Design considerations p. 35
- 4.2.1 Strategies for knowledge-based generation of design advice p. 36
- 4.2.2 Application of interactive knowledge-based techniques to P/M p. 37
- 4.2.3 Design considerations: summary p. 43
- 4.3 Materials considerations p. 43
- 4.3.1 Materials selection for effective design p. 44
- 4.3.2 Limitations of previous approaches p. 45
- 4.3.3 Tensile strength and impact energy as a function of density p. 46
- 4.3.4 Tensile strength and impact energy as a function of density and carbon content p. 48
- 4.4 Production considerations p. 51
- 4.4.1 Modelling of powder packing: A new approach p. 51
- 4.4.2 Modelling of compaction: Rationale p. 70
- 4.5 Example artificial intelligence and control methods p. 77
- 4.5.1 Modelling the powder metallurgy process using neural networks p. 77
- 4.5.2 Intelligent and adaptive process control in P/M p. 83
- Chapter 5 Example Components for KBS Analysis, and Economic Industrial and Environmental Impacts p. 89
- 5.1 The design process p. 89
- 5.2 Economic and industrial factors p. 92
- 5.2.1 Economic and industrial opportunities p. 92

- 5.2.2 Economic benefits expected from the results of the research p. 93
- 5.2.3 Economic justification for the research p. 94
- 5.3 Environmental impact p. 94
- Chapter 6 Discussion and Areas for Further Work p. 97
- 6.1 Methodologies and results of implementations p. 97
- 6.1.1 Generation of design advice p. 97
- 6.1.2 Generation of materials advice p. 99
- 6.1.3 Generation of production advice p. 101
- 6.1.4 Fundamental research p. 102
- 6.2 Opportunities for using the internet for improving accessibility for the KBS for P/M p. 103
- 6.2.1 Potential functionality/advantages of web-based design consultation p. 104
- 6.2.2 Implementation of web-based design consultation p. 104
- 6.3 Proposed future research p. 107
- 6.3.1 Future fundamental research p. 107
- 6.3.2 Future knowledge elicitation p. 107
- 6.3.3 Future system development p. 108
- Chapter 7 Conclusion p. 113
- 7.1 Concluding remarks p. 113
- References p. 115
- Appendices
- Appendix 1 A selection of technical papers arising from this work p. 147
- Appendix 2 A brief history of artificial intelligence and discussion of knowledge-based systems methods and applications p. 150
- Appendix 3 A brief history of powder metallurgy p. 155
- Appendix 4 A brief history of the study of powder packing p. 157
- Appendix 5 Use of computers in powder metallurgy p. 158
- Appendix 6 Application of Taguchi methods to powder metallurgy p. 159
- Appendix 7 Application of rapid prototyping techniques to powder forming p. 161
- Appendix 8 Powder metallurgy laboratory equipment available for educational and research purposes, at the University of the West of England p. 164
- Index p. 165
