

- Introduction--The Handbook of In-Service Inspection p. xiii
- Part 1 Essential Principles
- Chapter 1 In-Service Inspection--The Concept p. 3
 - ISI--why bother? p. 3
 - ISI and integrity management p. 4
 - In-service inspection versus construction inspection p. 5
 - In-service--predictive or defensive measure? p. 7
- Chapter 2 The Inspection Business--Who Does What? p. 11
 - The driving forces p. 11
 - The regulators p. 12
 - Accreditation bodies p. 14
 - Standards organizations p. 16
 - Classification societies p. 17
 - Insurance companies p. 19
 - Inspection organizations p. 24
 - Conclusion--the in-service inspection business p. 30
- Chapter 3 Roles and Duties of the In-Service Inspector p. 31
 - The inspector's duty of care p. 31
 - Liability--inspector versus employer p. 33
 - Inspector competence p. 35
 - The technical skills of the inspector p. 40
- Chapter 4 The Management of In-Service Inspection p. 49
 - The technical competence (TC) model p. 50
 - The procedures, paperwork and audits (PPA) model p. 51
 - TC versus PPA--decision or balancing act? p. 53
- Chapter 5 The Pressure Systems Safety Regulations (PSSRs): 2000 p. 57
 - The PSSRs--what are they? p. 57
 - Content of the PSSRs p. 60
 - Bibliography p. 91
- Chapter 6 Non-Destructive Testing (NDT) p. 93
 - How reliable is site NDT? p. 93
 - The inspector as NDT technician? p. 95
 - Visual inspection p. 100
 - In-service inspection of welds p. 103
 - Surface crack detection p. 106
 - Volumetric NDT p. 115
 - NDT standards p. 147
- Chapter 7 Risk-Based Inspection (RBI) p. 149
 - So what is RBI? p. 149
 - Before we start--some important concepts p. 150
 - RBI--the basic techniques p. 157
 - The RBI programme itself p. 158
 - RBI standards and published documents p. 178
- Chapter 8 Failure p. 185

- Failure mechanisms p. 185
- Failure statistics p. 185
- Fatigue p. 191
- Creep p. 193
- Corrosion p. 195
- Useful references p. 206
- Chapter 9 Fitness-For-Purpose/Service Assessment p. 213
- FFP assessments--what are they? p. 213
- FFP assessment standards p. 218
- Analysing fracture--the failure assessment diagram (FAD) p. 219
- Analysing fatigue p. 225
- Analysing creep p. 227
- Analysing corrosion p. 230
- API 579:1999 p. 232
- Sample BS 7910 calculation procedure p. 240
- Bibliography p. 245
- Part 2 Technical Disciplines
- Chapter 10 Pressure Testing p. 249
- Pressure testing--safety first p. 249
- Types of pressure test p. 251
- Vacuum leak testing p. 256
- Volumetric expansion testing p. 258
- Pressure tests--technical aspects p. 258
- In-service test procedures for pressure-equipment types p. 267
- Chapter 11 Pressure Vessel Inspections: API 510 p. 277
- How is API 510 used in in-service inspection? p. 277
- The content of API 510 p. 279
- In-service inspection of pressure vessels--engineering aspects p. 283
- Chapter 12 Protective Devices p. 293
- Protective device categories p. 293
- PRV types p. 294
- PRVs--principles of operation p. 296
- In-service inspection of PRVs p. 299
- PRV technical standards p. 311
- PRVs--glossary of terms p. 322
- Chapter 13 Pipework and Pipelines p. 325
- Pipework types and classifications p. 326
- Pipework in-service inspection p. 328
- High-integrity pipework p. 334
- Pipeline inspection p. 338
- Glass re-inforced plastic (GRP) re-lining p. 349
- Small-bore tubing systems p. 356
- Chapter 14 Storage Tanks p. 363
- Codes and standards p. 363

- Construction features p. 366
- Tank inspections p. 372
- Chapter 15 Heat Recovery Steam Generators (HRSGs) p. 397
- HRSG construction p. 397
- HRSG corrosion p. 400
- HRSG materials of construction p. 403
- HRSG damage mechanisms p. 405
- High-temperature HRSG headers p. 408
- HRSG steam drums p. 427
- HRSG tube banks p. 432
- Low-temperature headers p. 436
- Attemperators p. 442
- HRSG remnant life assessment p. 444
- Chapter 16 Heat Exchangers p. 457
- Shell-tube exchangers--construction features p. 458
- 'Fin-fan' coolers--construction features p. 459
- Technical codes and standards p. 465
- In-service inspection of heat exchangers p. 467
- NDT techniques p. 478
- Chapter 17 Transportable Pressure Equipment (TPE) p. 489
- TPRs--the statutory background p. 489
- In-service inspection of transportable pressure equipment p. 493
- Chapter 18 Industrial Cranes p. 505
- Introduction p. 505
- The LOLER regulations p. 505
- Crane types and construction p. 508
- Crane test, inspection, and repair p. 519
- Codes and standards: cranes p. 529
- Chapter 19 Mobile Cranes p. 533
- Mobile crane types p. 533
- Load rating p. 535
- Mobile crane tests p. 536
- Common terminology p. 547
- Mobile crane standards p. 551
- Chapter 20 Passenger and Goods Lifts p. 553
- Lift types p. 553
- Lift inspections p. 555
- Bibliography p. 556
- Motor vehicle repair equipment p. 558
- Chapter 21 Small Industrial Lifting Tackle p. 573
- Statutory requirements p. 574
- The role of the in-service inspectors p. 575
- Reference standards p. 585
- Chapter 22 Diesel Engines p. 587

- Diesel engine FFP criteria p. 587
- Appendices
- 1. The CSWIP Plant Inspector Certification Scheme p. 613
- CSWIP plant inspector certification scheme training syllabus p. 617
- 2. Websites--quick reference p. 621
- Organizations and associations p. 621
- General technical information p. 623
- Directives and legislation p. 625
- 3. Summary of in-service inspection requirements worldwide p. 627
- 4. EEMUA publications for mechanical plant and equipment p. 629
- 5. SAFeD publications and fact sheets p. 633
- 6. The European Pressure Equipment Directive (PED): summary p. 637
- Introduction--what's the PED all about? p. 637
- The driving forces behind the PED and similar European directives p. 638
- The EU 'new approaches' p. 638
- The role of technical standards p. 639
- The situation for manufacture of new pressure equipment p. 640
- Vessel 'statutory' certification p. 640
- The CE mark--what is it? p. 643
- PED--its purpose p. 643
- 7. Degradation mechanisms (refining/petrochemical applications) as defined in API RP 580 p. 653
- 8. European and American associations and organizations relevant to pressure equipment and inspection activities p. 669
- Index p. 683
