

## Table of contents

- Introduction to Polymer Reaction Engineering, an Integrated Approach.
- Polymer Characterization.
- Polymer thermodynamics.
- Polycondensation.
- Free Radical Polymerization: Homogeneous.
- Free Radical Polymerization: Suspension.
- Emulsion Polymerization.
- Ionic Polymerization.
- Coordination Polymerization.
- Numerical Methods.
- SCALE-UP.
- Safety in Polymerization Processes.
- Measurement and control of polymerization reactors.
- Polymer Properties.
- Polymer Mechanical Properties.
- Polymer Stabilization And Degradation.
- Modification Processes.
- Thermosets.
- Fibers.
- Removable.
- Novel polymers and Development.
- Recent Developments in Polymer Processes.
