# Table of contents

- **1 Introduction** (p. 1)
- **1.1 Overall demands** (p. 1)
- **1.2 Historic remark** (p. 1)
- **1.3 Perspectives** (p. 2)
- **2 Thermodynamic Engine Cycles** (p. 3)
- **2.1 Ideal Combustion Engines** (p. 3)
- **2.1.1 Spark-ignited (SI) Engine** (p. 3)
- **2.1.2 Diesel Engine** (p. 6)
- **2.1.3 Seiliger Process** (p. 8)
- **2.1.4 Comparison of Different Engine Concepts** (p. 10)
- **2.2 Alternative Combustion Engines** (p. 13)
- **2.2.1 Gas Turbine** (p. 13)
- **2.2.2 Stirling Engine** (p. 18)
- **2.2.3 Steam Engine** (p. 20)
- **2.2.4 Potential of Different Fuels and Propulsion Systems** (p. 23)
- **3 Engine Management Systems** (p. 25)
- **3.1 Basic Engine Operation** (p. 25)
- **3.1.1 Effective Work** (p. 25)
- **3.1.2 Air-Fuel Ratio** (p. 29)
- **3.1.3 Engine Concepts** (p. 31)
- **3.1.4 Inflammation of Air-Fuel Mixtures** (p. 33)
- **3.1.5 Flame Propagation** (p. 34)
- **3.1.6 Energy Conversion** (p. 35)
- **3.2 Fuel Control** (p. 38)
- **3.2.1 Emissions of Internal Combustion Engines** (p. 38)
- **3.2.2 Fuel Measurement** (p. 40)
- **3.2.3 Intermittent Fuel Injection** (p. 42)
- **3.2.4 Injection Time Calculation** (p. 44)
- **3.2.5 Air Mass per Combustion Cycle** (p. 45)
- **3.2.6 Intake Manifold Dynamics** (p. 47)
- **3.2.7 Compensation of Wall Wetting** (p. 50)
- **3.3 Ignition Control in SI Engines** (p. 52)
- **3.3.1 Ignition Angle Control** (p. 52)
- **3.3.2 Optimisation of Engine Maps** (p. 54)
- **3.3.3 Ignition Power Amplifier** (p. 59)
- **3.3.4 Dwell Angle Control** (p. 64)
- **3.3.5 Ignition Angle Errors in Transients** (p. 65)
- **4 Engine Control Systems** (p. 69)
- **4.1 Lambda Control** (p. 69)
- **4.1.1 Stochiometric Operation of SI Engines** (p. 69)
- **4.1.2 Oxygen Sensor** (p. 73)
- **4.1.3 Engine Model for Lambda Control** (p. 76)
- **4.1.4 Lambda Control Circuit** (p. 78)
- **4.1.5 Measurement Results** (p. 81)

- **4.1.6 Adaptive Lambda Control** (p. 82)
- **4.2 Idle Speed Control** (p. 89)
- **4.2.1 Energy Conversion Model and Torque Balance** (p. 91)
- **4.2.2 State Space Control** (p. 93)
- **4.2.3 Measurement Results** (p. 96)
- **4.3 Knock Control** (p. 98)
- **4.3.1 Knocking at SI Engines** (p. 98)
- **4.3.2 Knock Sensors** (p. 101)
- **4.3.3 Signal Processing** (p. 105)
- **4.3.4 Knock Control** (p. 106)
- **4.3.5 Adaptive Knock Control** (p. 107)
- **4.4 Combustion Torque Estimation** (p. 110)
- **4.4.1 Crankshaft Moment of Inertia** (p. 110)
- **4.4.2 Crankshaft Torque Balance** (p. 115)
- **4.4.3 Transformation into Linear System Representation** (p. 115)
- **4.4.4 Kalman Filter Design** (p. 117)
- **4.4.5 Results** (p. 118)
- **4.5 Cylinder Balancing** (p. 119)
- **4.5.1 Residues at Stationary Engine Operation** (p. 120)
- **4.5.2 Residues at Engine Transients** (p. 121)
- **4.5.3 Adaptation of Injection Map** (p. 124)
- **5 Driveline Control** (p. 127)
- **5.1 Driveline Modeling** (p. 127)
- **5.1.1 Basic Driveline Equations** (p. 127)
- **5.1.2 An Illustrative Modeling Example** (p. 131)
- **5.2 Modeling of Neutral Gear** (p. 153)
- **5.2.1 Stationary Gear-Shift Experiments** (p. 153)
- **5.2.2 Dynamical Gear-Shift Experiments** (p. 154)
- **5.2.3 A Decoupled Model** (p. 156)
- **5.3 Driveline Control** (p. 158)
- **5.3.1 Background** (p. 159)
- **5.3.2 Field Trials for Problem Demonstration** (p. 160)
- **5.3.3 Goals of Driveline Control** (p. 163)
- **5.3.4 Comment on Architectures for Driveline Control** (p. 164)
- **5.3.5 State-Space Formulation** (p. 165)
- **5.3.6 Controller Formulation** (p. 167)
- **5.3.7 Some Feedback Properties** (p. 168)
- **5.3.8 Driveline Control with LQG/LTR** (p. 170)
- **5.4 Driveline Speed Control** (p. 176)
- **5.4.1 RQV Control** (p. 177)
- **5.4.2 Problem Formulation** (p. 178)
- **5.4.3 Speed Control with Active Damping and RQV Behavior** (p. 181)
- **5.4.4 Influence from Sensor Location** (p. 185)
- **5.4.5 Simulations** (p. 191)
- **5.4.6 Speed Controller Experiments** (p. 194)
- **5.4.7 Summary** (p. 195)

- **5.5 Driveline Control for Gear-Shifting** (p. 197)
- **5.5.1 Internal Driveline Torque** (p. 197)
- **5.5.2 Transmission-Torque Control Criterion** (p. 203)
- **5.5.3 Transmission-Torque Control Design** (p. 208)
- **5.5.4 Influence from Sensor Location** (p. 210)
- **5.5.5 Simulations** (p. 214)
- **5.5.6 Gear-Shift Controller Experiments** (p. 217)
- **6 Vehicle Modelling** (p. 223)
- **6.1 Introduction** (p. 223)
- **6.2 Co-ordinate Systems** (p. 224)
- **6.3 Wheel Model** (p. 226)
- **6.3.1 Wheel Ground Contact Point Velocities** (p. 226)
- **6.3.2 Wheel Slip and Tire Side Slip Angle** (p. 235)
- **6.3.3 Friction Co-efficient Calculation** (p. 241)
- **6.3.4 Calculation of Friction Forces** (p. 244)
- **6.3.5 Tire Characteristics** (p. 246)
- **6.3.6 Definition of the Wheel Radius** (p. 249)
- **6.4 The Complete Vehicle Model** (p. 250)
- **6.4.1 Chassis Translatory Motion** (p. 250)
- **6.4.2 Chassis Rotational Motion** (p. 255)
- **6.4.3 Suspension** (p. 255)
- **6.4.4 Reduced Nonlinear Two-track Model** (p. 260)
- **6.4.5 Vehicle Stability Analysis** (p. 265)
- **6.5 Validation of the Vehicle Model** (p. 268)
- **6.5.1 Validation Procedure** (p. 268)
- **6.5.2 Validation Results** (p. 270)
- **7 Vehicle Parameters and States** (p. 273)
- **7.1 Vehicle Velocity Estimation** (p. 273)
- **7.1.1 Sensor Data Pre-processing** (p. 273)
- **7.1.2 Kalman Filter Approach** (p. 274)
- **7.1.3 Short Introduction to Fuzzy Logic** (p. 276)
- **7.1.4 Fuzzy Estimator** (p. 277)
- **7.1.5 Results of Velocity Estimators** (p. 282)
- **7.2 Identification of Vehicle Parameters** (p. 283)
- **7.2.1 Friction Characteristics** (p. 283)
- **7.2.2 Mass Moments of Inertia** (p. 289)
- **7.2.3 Road Gradient** (p. 296)
- **7.2.4 Shock Absorber Characteristics** (p. 297)
- **7.3 Vehicle Body Side Slip Angle Observer** (p. 299)
- **7.3.1 Basic Theory of a Nonlinear Observer** (p. 299)
- **7.3.2 Observer Design** (p. 301)
- **7.4 Approximation of other Vehicle Parameters** (p. 305)
- **7.4.1 Calculation of Wheel Ground Contact Forces** (p. 306)
- **7.4.2 Adaptation of the Tire Side Slip Constants** (p. 308)
- **7.4.3 Approximation of Pitch and Roll Angles** (p. 310)
- **7.4.4 Approximation of Vehicle Mass** (p. 311)

- **8 Vehicle Control Systems** (p. 315)
- **8.1 ABS Control Systems** (p. 315)
- **8.1.1 Torque Balance at wheel-road contact** (p. 315)
- **8.1.2 Control Cycles of the ABS System** (p. 316)
- **8.2 Control of the Yaw Dynamics** (p. 318)
- **8.2.1 Derivation of Simplified Control Law** (p. 319)
- **8.2.2 Derivation of Reference Values** (p. 322)
- **9 Road and Driver Models** (p. 327)
- **9.1 Road Model** (p. 327)
- **9.1.1 Requirements of the Road Model** (p. 327)
- **9.1.2 Definition of the Course Path** (p. 328)
- **9.1.3 Road Surfaces and Wind Strength** (p. 331)
- **9.2 PID Driver Model** (p. 332)
- **9.3 Hybrid Driver Model** (p. 334)
- **9.3.1 Vehicle Control Tasks** (p. 334)
- **9.3.2 Characteristics of the Human as a Controller** (p. 336)
- **9.3.3 Information Handling** (p. 339)
- **9.3.4 Complete Driver Model** (p. 342)
- **9.3.5 Model of Human Information Acquisition** (p. 343)
- **9.3.6 Inter-event Arrival and Service Times** (p. 345)
- **9.3.7 Reference Value Calculation** (p. 348)
- **9.3.8 Longitudinal and Lateral Control** (p. 353)
- **A Appendix** (p. 367)
- **A.1 Introduction to Thermodynamics** (p. 367)
- **A.1.1 First Thermodynamic Law** (p. 367)
- **A.1.2 Specific Heat Constant** (p. 371)
- **A.1.3 State Changes of Ideal Gases** (p. 373)
- **A.1.4 Thermodynamic Cycles** (p. 379)
- **A.2 Jacobian Matrices/ Nonlinear Two-track Model** (p. 384)
- **A.3 Design of GPC Controllers** (p. 388)
- **A.3.1 The Process Model** (p. 388)
- **A.3.2 Recursion of the Diophantine Equation** (p. 389)
- **A.3.3 The Control Law** (p. 391)
- **A.3.4 Choice of the Controller Parameters** (p. 391)
- **A.4 Driver Model: Constants and Weighting Factors** (p. 392)
- **A.5 Least Squares Parameter Estimation** (p. 392)
- **A.5.1 Parameter Estimation Via the Least Squares Method** (p. 393)
- **A.5.2 Parameter Estimation Using Recursive Least Squares** (p. 394)
- **A.5.3 Discrete Root Filter Method in Covariant Form** (p. 395)
- **B Nomenclature** (p. 397)
- **B.1 Mathematical Definitions** (p. 397)
- **B.2 Physical variables** (p. 398)
- **B.3 Abbreviations** (p. 405)
- **B.4 Units** (p. 405)
- **Bibliography** (p. 407)
