

TABLE CONTENTS

1.	Power Train	1-114
1.1	Clutch	1
1.1.1.	Why is the Clutch Required ?	1
1.2.	Types of Clutches	2
1.2.1.	Wet Clutch	2
1.2.2.	Centrifugal Clutch	5
1.2.3.	Cone Clutch	6
1.2.4.	Dry Clutch	6
1.2.5.	Diaphragm Spring Clutch	9
1.3.	Operating Mechanisms	11
1.3.1.	Hydraulic Clutch	12
1.3.2.	Mechanical Clutch	12
1.4.	Clutch Master Cylinder	12
1.4.1.	When the Clutch Pedal is Depressed ?	13
1.4.2.	When the Clutch Pedal is Released ?	13
1.5.	Release Cylinders	13
1.5.1.	Adjustable Release Cylinder	13
1.5.2.	Self-adjusting Release Cylinder	14
1.5.3.	Release Bearing	15
1.6.	Clutch Pedal Play	15
1.7.	Terms often used to Clutch Troubles	16
1.8.	Transmission	16
1.8.1.	Why is the Transmission Required ?	16
1.8.2.	Gear Ratios	16
1.8.3.	Types of Transmission	17
1.8.4.	Selective Gear Transmission	17
1.8.4.1.	Sliding Mesh Type	17
1.8.4.2.	Constant Mesh Type	19
1.8.4.3.	Synchromesh Type	20
1.8.5.	Gear Shifting	22
1.9.	Overdrive	23
1.9.1.	Reasons why Overdrive is used ?	23
1.9.2.	Operation of Overdrive	24
1.9.3.	Construction and Operation	24
1.10.	Propeller Shaft	27
1.10.1.	Universal Joint	27
1.11.	Rear Axle	28
1.11.1.	Rear Axle Construction	28
1.11.1.1.	Rear Axle with Drive Shafts	28
1.11.2.	Drive Systems	29
1.12.	Universal Joint	30
1.12.1.	Hooke's Joint	30
1.12.2.	Change in Angular Velocity of Hooke's Joint	31
1.13.	Differential	32
1.14.	Construction and Function of Differential	33
1.14.1.	Final Gear	33
1.14.2.	Differential Gears	35
1.15.	Inspection and Adjustment	43
1.15.1.	Need for Drive Pinion Bearing Pre-load	43
1.15.2.	Need for Side Bearing Pre-load	43

1.15.3.	Need for Ring Gear to Drive Pinion Backlash	44
1.15.4.	Need for Differential Pinion to Side Gear Backlash	44
1.15.5.	Need for Ring Gear Tooth Contact Adjustment (Hypoid Gear Type)	45
1.16.	Troubleshooting	45
1.17.	Construction and Function of Limited Slip Differential (LSD)	46
1.18.	Drive Shaft	47
1.18.1.	Description	47
1.18.2.	Construction	48
1.19.	Front Axle	50
1.19.1.	Rigid Axle Type (I-beam Type)	51
1.20.	Free-Wheel Hub	51
1.20.1.	Description	51
1.20.2.	Function	52
1.21.	Automatic Transmission	53
1.21.1.	What is an Automatic Transmission ?	53
1.21.2.	Advantages of Automatic Transmission	54
1.21.3.	Types of Automatic Transmission	54
1.21.4.	Major Components and their Basic Functions	55
1.22.	Torque Converter	55
1.22.1.	Roles of Torque Converter	56
1.22.2.	Construction of Torque Converter	56
1.22.3.	Operation of Torque Converter	59
1.23.	Principle of Power Transmission	61
1.23.1.	Power Transmission	61
1.24.	Principle of Torque Multiplication	61
1.24.1.	Torque Multiplication	62
1.25.	Stator one-way Clutch Function	63
1.25.1.	When Vortex Flow is Large ?	63
1.25.2.	When Vortex Flow is Small ?	63
1.26.	Planetary Gear Unit	64
1.26.1.	Roles of Planetary Gear Unit	64
1.26.2.	Planetary Gear Set	64
1.26.3.	Operation	65
1.27.	Hydraulic Control System	66
1.27.1.	Roles of Hydraulic Control System	67
1.28.	Manual Linkage	68
1.29.	Brakes	69
1.30.	One-way Clutches (F1 and F2)	72
1.31.	Torque Converter Performance	73
1.31.1.	Torque Ratio	73
1.31.2.	Transmission Efficiency	74
1.32.	Converter Operation	76
1.33.	Lock-up Clutch Mechanism	76
1.34.	Transmission of Power	78
1.35.	"D" or "2" Range (1st Gear)	78
1.36.	"D" Range (3rd Gear)	80
1.37.	Automatic Shift System	81
1.38.	Hydraulic Control System	82
1.38.1.	Function of Main Valves	84
1.38.2.	Fluid Pressure	84
1.39.	Valve Body	85
1.40.	Manual Valve	86
1.41.	Electrically Controlled Shifting	87
1.41.1.	Accelerator Switch	87
1.41.2.	Vacuum Switches	87
1.41.3.	Shift Lever Switch	88
1.41.4.	Vehicle Speed Sensor	88
1.41.5.	Shift Solenoids	88
1.42.	Electronic Control of Torque Converter Lockup	89
1.43.	Continous Variable Transmission	90
1.44.	Clutch System Theoretical Formulae	93
●	Numerical Problems	96
2.	Steering System	115-165
2.1.	Description of Steering System	115

2.1.1.	Requirements of Steering System	116
2.2.	Manual Steering	116
2.2.1.	Steering Gear Construction	117
2.2.2.	Steering Gear Types	117
2.3.	Rack and Pinion Type	118
2.3.1.	Construction	118
2.3.2.	Variable Steering Ratio	119
2.4.	Recirculating-Ball Nut Type	119
2.4.1.	Construction	119
2.4.2.	Variable Steering Ratio	120
2.5.	Steering Column	121
2.5.1.	Description	121
2.5.2.	Steering Column Impact-Absorbing Mechanism	123
2.5.3.	Bending Bracket Type	123
2.6.	Steering Linkage	125
2.6.1.	Types of Linkage	125
2.6.2.	Linkage Components	127
2.7.	Power Steering	131
2.7.1.	Necessity for Power Steering	131
2.7.2.	Principles of the Power Steering	132
2.7.3.	Requirements for Power Steering Suitable Steering Force	134
2.7.4.	Types of Power Steering	135
2.8.	Vane Pump	137
2.9.	Gear Housing	140
2.10.	Spool Valve Type	145
2.11.	Troubleshooting	145
2.12.	Wandering	147
2.13.	Car Pulls to one side during Normal Driving	148
2.14.	Steering Wheel Shimmy	149
2.15.	Steering Kickback	150
2.16.	Excessive Steering Wheel Freeplay	150
2.17.	Progressive Power Steering (PPS)	151
2.18.	Electronically Controlled Power Steering Systems	154
2.19.	Electric/Electronic Rack and Pinion System	155
2.20.	Four-Wheel Steering System	156
2.20.1.	Mechanical 4WS	157
2.20.2.	Hydraulic 4WS	158
2.20.3.	Electro/Hydraulic 4WS	159
2.21.	Principle of Wheel Alignment	161
2.21.1.	Steering Geometry and Alignment Angles	161
2.21.2.	Road Test	161
2.21.3.	All-Wheel-Drive Systems	162
2.21.4.	Viscous Clutch	162
2.21.5.	Center Differential AWD	163
2.21.6.	Electronically-Controlled AWD	163
2.22.	Electronic Stability Program (ESP) for Motor Cars	164
2.22.1.	Vehicle Handling	165
2.22.2.	ESP Control Systems	165
2.22.3.	System Realization	167
3.	Wheel Alignment	170-196
3.1.	Description of Wheel Alignment	170
3.2.	Camber	171
3.2.1.	Role of Camber	171
3.2.2.	Positive Camber	171
3.3.	Caster	174
3.3.1.	Caster and Caster Trail	175
3.3.2.	Role of Caster	175
3.3.3.	Relationship between Positive caster and Recovery force (Directional stability)	177
3.3.4.	Loss of control due to caster	177
3.3.5.	Application of Negative caster	178
3.3.6.	Effect of Zero caster	178
3.3.7.	Excess caster	179
3.3.8.	Unequal right and left casters	180

3.4.	Kingpin Inclination	181
3.4.1.	Roles of Kingpin inclination	182
3.5.	Toe-in	183
3.6.	Turning Radius	184
3.7.	Wheel Alignment Measurement	188
3.8.	Toe-in-Measurement	190
●	Numerical Problems	191
4.	Suspension System	197-253
4.1.	Oscillation and Riding Comfort	197
4.1.1.	Sprung weight and Unsprung Weight	197
4.1.2.	Oscillation of Sprung Weight	199
4.1.3.	Oscillation of Unsprung Weight	199
4.2.	Suspension Types and Characteristics	200
4.2.1.	Rigid-axle Suspension	200
4.2.2.	Independent Suspension	204
4.3.	Macpherson Strut Type	204
4.3.1.	Construction	204
4.3.2.	Characteristics	205
4.3.3.	Camber Adjustment Mechanism (Some front-wheel drive vehicles)	206
4.4.	Double Wishbone Type with Torsion Bars	208
4.4.1.	Construction	208
4.4.2.	Camber and Caster Adjustment Mechanisms	209
4.5.	Semi-Trailing Arm Type	211
4.5.1.	Construction	211
4.5.2.	Characteristics	212
4.5.3.	Rear Toe-in Adjustment Mechanism	212
4.6.	Dual-Link Strut Type	212
4.7.	Springs	213
4.7.1.	Characteristics	213
4.8.	Types of Spring	215
4.8.1.	Leaf Springs	215
4.8.2.	Coil Springs	217
4.8.3.	Torsion bar Springs	218
4.8.4.	Rubber springs	219
4.8.5.	Air springs	219
4.9.	Shock Absorbers	223
4.9.1.	Description	223
4.9.2.	Types	225
4.9.3.	Construction and Operation	226
4.9.3.1.	Mono-Tube Type	226
4.9.3.2.	Twin-tube Type	228
4.9.3.3.	Low-pressure Gas-filled Type	230
4.9.3.4.	Handling of Gas-filled Shock Absorbers	231
4.10.	Leaf Spring	233
4.10.1.	Construction	233
4.10.2.	Characterisitics	235
4.11.	Checking the Suspension	235
4.11.1.	General	235
4.11.2.	Suspension Springs	235
4.11.3.	Shock Absorbers	238
4.11.4.	Wheel Alignment	239
4.12.	Electronically Controlled Suspensions (Hydractive Suspension)	241
4.13.	Adaptive Suspensions	241
4.13.1.	System Components	242
4.13.2.	Servicing Electronic Suspension Components	246
4.14.	Active Suspensions	247
4.15.	Sonar Road Surface Sensing	250
4.16.	Important Points	250
5.	Brake System	254-344
5.1.	Why are Brakes Required ?	254
5.2.	Principles of Brake	254
5.3.	Types of Brakes	255
5.4.	Construction of Hydraulic, Internal Expanding Brake	255

5.4.1.	Brake Unit	255
5.4.2.	Types of Drum Brakes	258
5.5.	Brake Operating Mechanism	260
5.5.1.	Mechanical brake	260
5.5.2.	Hydraulic brake	260
5.6.	Construction of Brake Actuating Mechanism	260
5.7.	Master Cylinder	260
5.7.1.	Tandem Master Cylinder	262
5.7.2.	Construction	263
5.7.3.	Operation	263
5.7.4.	Spring Retainer	264
5.7.5.	Separated Reservoir Tank	265
5.8.	Wheel Cylinder	265
5.8.1.	Operation	265
5.8.2.	Construction	266
5.9.	Brake Pipeline	266
5.10.	Brake Fluid	267
5.10.1.	Brake Fluid Inspection	267
5.10.2.	Brake Line Inspection	268
5.10.3.	Brake Pedal Inspection	268
5.11.	Disc Brake	268
5.11.1.	Advantages of the Disc Brake	268
5.11.2.	Disadvantages of Disc Brake	270
5.11.3.	Features of Disc Brakes	270
5.11.4.	Pad Wear Indicator	271
5.11.5.	Engine Braking	272
5.11.6.	Transmission of Power	272
5.11.7.	Vapour Lock	272
5.12.	Brake Booster	273
5.12.1.	Description	273
5.12.2.	Operating Principle	273
5.13.	Single Brake Booster	274
5.13.1.	Construction	274
5.13.2.	Operation	275
5.13.3.	Holding State	277
5.13.4.	Maximum Boost	277
5.13.5.	Brakes Released	278
5.13.6.	Non-vacuum Condition	279
5.14.	P. Valve (Proportioning Valve)	279
5.14.1.	Description	279
5.14.2.	Operating Principle	281
5.14.3.	P. Valve Operation	283
5.14.4.	Dual P. Valve	285
5.15.	P and BV (Proportioning and Bypass Valve)	286
5.15.1.	Description	286
5.15.2.	Operation	287
5.16.	LSPV (Load Sensing Proportioning Valve)	288
5.16.1.	Description	288
5.17.	Dual LSPV	290
5.17.1.	Description	290
5.18.	Parking Brake	291
5.19.	Exhaust Brake	292
5.20.	Air Braking System	294
5.21.	Air Brakes with Fail Safe Brake System	294
5.21.1.	Operating Principle	294
5.21.2.	Essential Features	294
5.22.	Dual Line Brake System	297
5.22.1.	Description	297
5.22.2.	Service Brake	297
5.22.3.	Spring Brakes	297
5.22.4.	Salient Features	297
5.22.5.	Do's	299
5.22.6.	Dont's	299
5.23.	Air Servo Brake System	299

5.23.1.	Description	299
5.23.2.	Component Parts and Function	300
5.23.3.	Operation	303
5.24.	Brake Performance	304
5.24.1.	Brake Performance Measurement as per Motor Vehicle Act Provision of India	305
5.25.	Troubleshooting	307
5.25.1.	Description	307
5.26.	Hydraulic -- Assist Power Brakes	310
5.27.	Hydro-Boost	311
5.28.	Testing The Hydro-Boost	311
5.29.	Powermaster Hydraulic Booster	312
5.30.	Anti-Lock Brake Systems	314
5.31.	Types of ABS Systems	316
5.32.	Integrated ABS System Components	317
5.33.	Integrated System Operation	320
5.34.	Non-Integrated ABS Systems	322
5.35.	GM Electromagnetic ABS Systems	322
5.36.	Modulator Operation	323
5.37.	Automatic Stability (Traction) Control	324
●	Numerical Problems	325
5.38.	Adaptive Cruise Control (ACC)	336
5.38.1.	Operation	336
5.38.1.	Operation	??
5.39.	Electronically Controlled Braking System (ELB for Commercial Vehicles)	339
5.39.1.	Functional Blocks	339
5.39.2.	Design	340
5.39.3.	Functional Sequences EPB	340
5.39.4.	Extended Functions	341
5.40.	Important Points	342
6.	Tyre and Disc Wheels	345-393
6.1.	Introduction	345
6.2.	Tyres	345
6.2.1.	Tyre Construction	345
6.2.2.	Tread Patterns	346
6.3.	Tyre Types	348
6.3.1.	Tubeless Tyre	349
6.3.2.	Radial Tyre	349
6.3.3.	Snow Tyres	350
6.3.4.	Spiked Tyres	351
6.3.5.	All-weather Tyres	351
6.3.6.	Sand Tyres	352
6.4.	Disc Wheels	353
6.5.	Tyre Performance	354
6.5.1.	Tyre Rolling Resistance	354
6.5.2.	Generation of Heat by Tyres	357
6.5.3.	Braking Performance	358
6.5.4.	Pattern Noise	359
6.5.5.	Standing Wave	360
6.5.6.	Hydroplaning (Aquaplaning)	360
6.5.7.	Cornering Performance	361
6.5.8.	Tyre Wear	362
6.6.	Tyre Uniformity	363
6.6.1.	Wheel Balance	364
6.6.1.1.	Static Balance	364
6.6.1.2.	Dynamic Balance	366
6.6.2.	Run-out	368
6.6.2.1.	Radial Run-out	369
6.6.2.2.	Lateral Run-out	369
6.6.3.	Uniformity	369
6.7.	Troubleshooting	370
6.7.1.	Unusual Wear	371
6.7.2.	Vibration	375
6.7.3.	Hard Riding	379

6.7.4.	Hard Steering	380
6.7.5.	Car Pulls to one Side during Normal Driving	380
6.8.	Inspection of Run-out and Wheel Balance	381
6.8.1.	Run-out	381
6.8.2.	Wheel Balance	383
6.9.	Tyre Repair	385
6.9.1.	Plug Repair	387
6.9.2.	Cold Patch Repair	387
6.9.3.	Hot Patch Repair	387
6.9.4.	Tyre/Wheel Runout	388
