

- Section I Technology
- 1 Introduction Gregor Hoogers p. 1
- 2 History Eric Chen p. 1
- 3 Thermodynamics and Electrochemical Kinetics Eric Chen p. 1
- 4 Fuel Cell Components and Their Impact on Performance Gregor Hoogers p. 1
- 5 The Fueling Problem: Fuel Cell Systems Gregor Hoogers p. 1
- 6 Catalysts for the Proton Exchange Membrane Fuel Cell David Thompsett p. 1
- 7 Prospects of the Direct Methanol Fuel Cell Martin Hogarth p. 1
- Section II Applications
- 8 Stationary Power Generation Martina Hinsberger and Gregor Hoogers p. 1
- 9 Portable Applications Gregor Hoogers p. 1
- 10 Automotive Applications Gregor Hoogers p. 1
- 11 Competing Technologies for Transportation Richard Stone p. 1
- 12 Fuel Cell Fuel Cycles David Hart and Ausilio Bauen p. 1
- 13 Outlook: The Next Five Years Gregor Hoogers p. 1
- Appendix 1 p. 5
- Appendix 2 p. 7
- Index p. 1
