

Contents:

- Ch. 1 Introduction
- Ch. 2 Properties of Materials
- Ch. 3 Nature of Metals and Alloys
- Ch. 4 Equilibrium Diagrams and the Iron-Carbon System
- Ch. 5 Heat Treatment
- Ch. 6 Ferrous Metals and Alloys
- Ch. 7 Nonferrous Metals and Alloys
- Ch. 8 Nonmetallic Materials: Plastics, Elastomers, Ceramics, and Composites
- Ch. 9 Material Selection
- Ch. 10 Measurement and Inspection
- Ch. 11 Nondestructive Inspection and Testing
- Ch. 12 Process Capability and Quality Control
- Ch. 13 Fundamentals of Casting
- Ch. 14 Expendable-Mold Casting Processes
- Ch. 15 Multiple-Use-Mold Casting Processes
- Ch. 16 Powder Metallurgy
- Ch. 17 Fundamentals of Metal Forming
- Ch. 18 Hot-Working Processes
- Ch. 19 Cold-Working Processes
- Ch. 20 Fabrication of Plastics, Ceramics, and Composites
- Ch. 21 Fundamentals of Chip-Type Machining Processes
- Ch. 22 Cutting Tools for Machining
- Ch. 23 Turning, Boring, and Related Processes
- Ch. 24 Drilling and Related Hole-Making Processes
- Ch. 25 Milling
- Ch. 26 Broaching, Sawing, Filing, Shaping, and Planing
- Ch. 27 Abrasive Machining Processes
- Ch. 28 Workholding Devices
- Ch. 29 Numerical Control and Machining Centers
- Ch. 30 Thread Manufacturing
- Ch. 31 Gear Manufacturing
- Ch. 32 Nontraditional Machining Processes
- Ch. 33 Gas Flame Processes: Welding, Cutting, and Straightening
- Ch. 34 Arc Processes: Welding and Cutting
- Ch. 35 Resistance Welding
- Ch. 36 Other Welding and Related Processes
- Ch. 37 Brazing and Soldering
- Ch. 38 Adhesive Bonding and Mechanical Fasteners
- Ch. 39 Manufacturing Concerns in Welding and Joining
- Ch. 40 Surface Treatments and Finishing
- Ch. 41 Manufacturing Systems and Automation
- Ch. 42 Production Systems
- Ch. 43 Lean Production: JIT Manufacturing Systems
