

- Preface
- Preface to Second Edition
- Acknowledgments
- 1 Introduction to Polymer Science
- Classification of Polymers
- Polymer Structure. Molecular Weight
- Chemical Structure and Thermal Transitions
- 2 Polymer Synthesis
- Step-Growth Polymerization
- Chain-Growth Polymerization
- Polymerization Techniques
- Reactions of Synthetic Polymers
- New Advances in Polymer Synthesis
- Chemical Structure Determination
- 3 Conformation, Solution Thermodynamics, and Molecular-Weight Determination
- Polymer Conformation and Chain Dimensions
- Thermodynamics of Polymer Solutions
- Measurement of Molecular Weight
- 4 Solid-State Properties
- The Amorphous State
- The Crystalline State
- Thermal Transitions and Properties
- Mechanical Properties
- 5 Viscoelasticity and Rubber Elasticity
- Introduction to Viscoelasticity
- Introduction to Rubber Elasticity
- 6 Polymer Degradation and the Environment
- Polymer Degradation and Stability
- The Management of Plastics in the Environment
- 7 Additives, Blends, and Composites
- Additives
- Polymer Blends and Interpenetrating Networks
- Introduction to Polymer Composites
- Nanocomposites
- 8 Naturally Occurring Polymers and Commodity Thermoplastics and Fibers
- Biopolymers and Naturally Occurring Polymers
- Thermoplastics
- Fibers
- 9 Elastomers and Thermosets
- Elastomers
- Thermosets
- 10 Engineering and Specialty Polymers
- Engineering Thermoplastics
- Specialty Polymers
- 11 Polymer Rheology and Processing
- Introduction to Polymer Rheology

- Analysis of Simple Flows
- Rheometry
- Basic Processing Operations
- Introduction to the Modeling of Polymer-Processing Operations
- Appendices
- 12 Specialty Applications
- Barrier Materials
- Membrane Separations of Gases, Liquids, and Vapors
- Biomedical Engineering and Biotechnology
- Applications in Electronics
- Photonic Polymers
- Drag Reduction
- Appendix A Polymer Abbreviations
- Appendix B Representative Properties of Some Important Commercial Polymers
- Appendix C Major ASTM Standards for Plastics and Rubber
- Appendix D SI Units and Physical Constants
- Appendix E Mathematical Relationships
- Appendix F Table of the Major Elements
- Index
