- **Acknowledgements** (p. xiii)
- **1 Planning and Investigations** (p. 1)
- **1.1 Planning and Investigations** (p. 1)
- **1.2 Stages of Investigations** (p. 2)
- **2 Topographical Survey** (p. 4)
- **2.1 Engineering Surveys** (p. 4)
- **2.2 Control Surveys** (p. 5)
- **2.3 Topographical Survey** (p. 6)
- **2.4 Ground Survey Methods** (p. 6)
- **2.5 Field Methods** (p. 7)
- **2.6 Topographic Survey Instruments** (p. 8)
- **2.7 Field Data and Preparation of Maps** (p. 9)
- **2.8 Standards for Topographic Maps** (p. 9)
- **2.9 Contour Intervals** (p. 9)
- **2.10 Photogrammetric Methods** (p. 10)
- **2.11 Aerial Photographs** (p. 13)
- **2.12 Use of Topographical Maps** (p. 14)
- **3 Geological and Geotechnical Investigations** (p. 17)
- **3.1 Geological and Geotechnical Investigations** (p. 17)
- **3.2 Surface Investigations** (p. 18)
- **3.3 Sub-surface Investigations** (p. 19)
- **3.4 Sub-surface Exploration Methods** (p. 20)
- **3.5 Geophysical Methods** (p. 27)
- **3.6 Sampling and Logging** (p. 28)
- **3.7 Testing Soil and Rock Samples** (p. 31)
- **4 Hydrological and Hydraulic Investigations** (p. 49)
- **4.1 The Hydrological Cycle** (p. 49)
- **4.2 Understanding Hydrology** (p. 50)
- **4.3 Drainage Basin, Catchment Area or Watershed** (p. 50)
- **4.4 Precipitation** (p. 51)
- **4.5 Snowfall and Snowmelt** (p. 51)
- **4.6 Rainfall** (p. 53)
- **4.7 Run-off** (p. 58)
- **4.8 Computation of Run-off** (p. 60)
- **4.9 Floods, Peak Flows or Maximum Rates of Run-off** (p. 69)
- **4.10 Sediment Measurement** (p. 79)
- **4.11 Evaporation and Transpiration** (p. 84)
- **4.12 Role of Computer Models in Hydrology** (p. 87)
- **5 Environmental Surveys** (p. 91)
- **5.1 The Objectives of Environmental Impact Assessment (EIA)** (p. 91)
- **5.2 Potential Effects of a Dam Project on Environment** (p. 91)
- **5.3 Identification of Potential Effects** (p. 94)
- **5.4 Required Information** (p. 95)
- **5.5 Sources of Information** (p. 95)

- **5.6 Systematic Approach** (p. 95)
- **5.7 Remote Sensing and Geographical Information System (GIS) Techniques** (p. 95)
- **6 Reservoir Planning** (p. 97)
- **6.1 Reservoir Planning** (p. 97)
- **6.2 Uses of Reservoir Water** (p. 97)
- **6.3 Classification of Reservoirs** (p. 99)
- **6.4 Drainage Basin, Catchment Area or Watershed** (p. 100)
- **6.5 Reservoir Catchment Yield** (p. 100)
- **6.6 Reservoir Yields** (p. 100)
- **6.7 Reservoir Site: Storage Volume** (p. 101)
- **6.8 Reservoir Capacity** (p. 101)
- **6.9 Reservoir Storage Zones** (p. 107)
- **6.10 Reservoir Sedimentation** (p. 107)
- **6.11 Wave Allowances** (p. 109)
- **6.12 Design Flood** (p. 110)
- **6.13 Reservoir Elevation** (p. 111)
- **6.14 Flood Absorption Capacity of a Reservoir** (p. 112)
- **6.15 Back Water Curve** (p. 123)
- **6.16 Economic Height of a Dam** (p. 127)
- **6.17 Economic Life of a Reservoir** (p. 128)
- **7 Types of Dams** (p. 130)
- **7.1 Classification by Functions** (p. 130)
- **7.2 Classification by Construction Material** (p. 131)
- **7.3 Classification by Special Structural Design** (p. 131)
- **7.4 Classification by Hydraulic Design** (p. 132)
- **7.5 Selection of the Type of Dam** (p. 132)
- **7.6 Location of the Dam** (p. 133)
- **8 Gravity Dams** (p. 136)
- **8.1 Types of Gravity Dams** (p. 136)
- **8.2 Section of a Dam** (p. 137)
- **8.3 Shafts and Galleries** (p. 139)
- **8.4 Forces Acting on Gravity Dams** (p. 140)
- **8.5 Load Combination** (p. 147)
- **8.6 Gravity Dams: Stability Requirements** (p. 148)
- **8.7 General Design Procedure** (p. 151)
- **8.8 Design Methods** (p. 152)
- **8.9 Design Example** (p. 153)
- **8.10 Foundation Treatment** (p. 156)
- **8.11 Drainage of Rock Foundation** (p. 159)
- **8.12 Three Gorges Dam Project, China** (p. 159)
- **9 Earth Fill Dams** (p. 161)
- **9.1 Design Criteria** (p. 161)
- **9.2 Types of Earth Fill Dams** (p. 161)
- **9.3 Causes of Failure in Earth Dams** (p. 163)
- **9.4 Design Consideration** (p. 165)
- **9.5 Control of Seepage through the Dam Section** (p. 170)

- **9.6 Amount of Seepage through a Dam** (p. 171)
- **9.7 Control of Seepage under a Dam** (p. 178)
- **9.8 Seepage under a Dam** (p. 180)
- **9.9 Stability of Slopes** (p. 182)
- **9.10 Case Description** (p. 187)
- **10 Rock Fill Dams** (p. 194)
- **10.1 Definition** (p. 194)
- **10.2 Typical Design of a Rock Fill Dam** (p. 194)
- **10.3 Case Description** (p. 197)
- **11 Miscellaneous Dams** (p. 200)
- **A Arch Dams** (p. 200)
- **11.1 Types of Arch Dams** (p. 200)
- **11.2 Overflow Arch Dams** (p. 201)
- **11.3 Case Description** (p. 201)
- **B Buttress Dams** (p. 203)
- **11.4 Types of Buttress Dams** (p. 203)
- **11.5 Advantages and Disadvantages of Buttress Dams** (p. 204)
- **12 Spillways** (p. 206)
- **12.1 Functions** (p. 206)
- **12.2 Capacity** (p. 206)
- **12.3 Shapes of a Spillway Crest** (p. 206)
- **12.4 Types of Spillways** (p. 207)
- **12.5 Causes of River Bed Erosion below Spillways** (p. 213)
- **12.6 Terminal Structures** (p. 214)
- **12.7 Crest Gates** (p. 218)
- **13 Outlet Works** (p. 220)
- **13.1 Functions** (p. 220)
- **13.2 Capacities** (p. 220)
- **13.3 Positioning** (p. 220)
- **13.4 Outlet Works for a Gravity Dam** (p. 221)
- **13.5 Outlet Works for a Fill Dam** (p. 221)
- **13.6 Components of Outlet Works** (p. 222)
- **13.7 Case Description** (p. 224)
- **14 Hydraulic Model Studies** (p. 226)
- **14.1 Advantages and Disadvantages** (p. 226)
- **14.2 Law of Similitude** (p. 226)
- **14.3 Dimensional Analysis** (p. 228)
- **14.4 River Model** (p. 228)
- **14.5 Model Scale** (p. 228)
- **14.6 Choice of Scales** (p. 229)
- **14.7 Planning a Model Study** (p. 229)
- **14.8 Subjects for Model Studies** (p. 231)
- **14.9 Case Descriptions** (p. 232)
- **15 River Diversion and Construction** (p. 239)
- **15.1 Characteristics of River Flows** (p. 239)
- **15.2 Diversion Flood** (p. 239)

- **15.3 Methods of Diversion** (p. 240)
- **15.4 Diversion Works** (p. 241)
- **15.5 Construction of a Dam** (p. 243)
- **15.6 Construction of Gravity Dams** (p. 246)
- **15.7 Properties of Concrete** (p. 255)
- **15.8 Roller Compacted Concrete (RCC)** (p. 256)
- **16 Instrumentation and Monitoring** (p. 260)
- **16.1 Purpose of Instrumentation** (p. 260)
- **16.2 Forces Acting on a Dam Structure** (p. 260)
- **16.3 Types of Instruments** (p. 261)
- **16.4 Location of Instruments** (p. 261)
- **16.5 Installation of Instruments** (p. 261)
- **16.6 Calibration and Maintenance of Instruments** (p. 261)
- **16.7 Data Collection** (p. 262)
- **16.8 Data Processing** (p. 262)
- **16.9 Data Interpretation** (p. 262)
- **16.10 Instruments for Dam Safety** (p. 262)
- **17 Watershed Management** (p. 267)
- **17.1 Watershed Management** (p. 267)
- **17.2 Objectives** (p. 268)
- **17.3 Programme** (p. 268)
- **17.4 Project Area** (p. 269)
- **17.5 Selection of Priority Areas** (p. 269)
- **17.6 Role of Remote Sensing and Use of Geo-based Information System (GIS)** (p. 269)
- **17.7 Sedimentation of Reservoirs** (p. 269)
- **17.8 Sources of Sediments** (p. 270)
- **17.9 Estimation of Sediment Flow Rates** (p. 270)
- **17.10 Controlling Sedimentation of Reservoirs** (p. 271)
- **17.11 Watershed Management Techniques** (p. 271)
- **17.12 Conservation Measures for Hill Slopes** (p. 272)
- **17.13 Stream Bank Erosion Control** (p. 274)
- **17.14 Gully Erosion and Control** (p. 275)
- **17.15 Wind Blown Sediment and Control** (p. 276)
- **17.16 Watershed Management in Indus Basin Dams** (p. 277)
- **Bibliography** (p. 278)
- **Index** (p. 281)
