

## Table of Contents

Preface

Introduction

Fluids in Motion

Hydrostatics

Pressure Measurement

Stability of a Floating Body

Flow through Pipelines

Flow under a Varying Head: Time Required to Empty a Reservoir

Dimensional Analysis and Hydraulic Models

Turbines and Pumps

Flow Measurement

Hydraulic Structures

Flow in Open Channels

Introduction to Engineering Hydrology

Applications of Engineering Hydrology

Sustainable Drainage Systems

Bibliography

Appendix 2 Solutions to Self Test Questions

Appendix 3 Graph Paper

Index

Appendix 1 Derivations of Equations
