

Table of Contents

- Preface p. xii
- 1 An Overview of IBM® SPSS® Statistics p. 1
- Introduction: An Overview of IBM SPSS Statistics 26 and Subscription Classic p. 1
- 1.1 Necessary Skills p. 1
- 1.2 Scope of Coverage p. 2
- 1.3 Overview p. 3
- 1.4 This Book's Organization, Chapter by Chapter p. 3
- 1.5 An Introduction to the Example p. 4
- 1.6 Typographical and Formatting Conventions p. 5
- 2A IBM SPSS Statistics Processes for PC p. 8
- 2.1 The Mouse p. 8
- 2.2 The Taskbar and Start Menu p. 8
- 2.3 Common Buttons p. 10
- 2.4 The Data and Other Commonly Used Windows p. 10
- 2.5 The Open Data File Dialog Window p. 13
- 2.6 The Output Window p. 16
- 2.7 Modifying or Rearranging Tables p. 19
- 2.8 Printing or Exporting Output p. 22
- 2.9 The "Options ..." Option: Changing the Formats p. 24
- 2B IBM SPSS Statistics Processes for Mac p. 26
- 2.1 Selecting p. 26
- 2.2 The Desktop, Dock, and Application Folder p. 27
- 2.3 Common Buttons p. 27
- 2.4 The Data and Other Commonly Used Windows p. 28
- 2.5 The Open Data File Dialog Window p. 30
- 2.6 The Output Window p. 34
- 2.7 Modifying or Rearranging Tables p. 36
- 2.8 Printing or Exporting Output p. 39
- 2.9 The "Options ..." Option: Changing the Formats p. 41
- 3 Creating and Editing a Data File p. 43
- 3.1 Research Concerns and Structure of the Data File p. 43
- 3.2 Step by Step p. 44
- 3.3 Entering Data p. 51
- 3.4 Editing Data p. 52
- 3.5 Grades.sav: The Sample Data File p. 54
- Exercises p. 58
- 4 Managing Data p. 59
- 4.1 Step By Step: Manipulation of Data p. 60
- 4.2 The Case Summaries Procedure p. 60
- 4.3 Replacing Missing Values Procedure p. 63
- 4.4 The Compute Procedure: Creating New Variables p. 66
- 4.5 Recoding Variables p. 69
- 4.6 The Select Cases Option p. 73
- 4.7 The Sort Cases Procedure p. 75

- 4.8 Merging Files Adding Blocks of Variables or Cases p. 77
- 4.9 Printing Results p. 81
- Exercises p. 82
- 5 Graphs and Charts: Creating and Editing p. 83
- 5.1 Comparison of the Two Graphs Options p. 83
- 5.2 Types of Graphs Described p. 83
- 5.3 The Sample Graph p. 84
- 5.4 Producing Graphs and Charts p. 85
- 5.5 Bugs p. 87
- 5.6 Specific Graphs Summarized p. 88
- 5.7 Printing Results p. 99
- Exercises p. 100
- 6 Frequencies p. 101
- 6.1 Frequencies p. 101
- 6.2 Bar Charts p. 101
- 6.3 Histograms p. 101
- 6.4 Percentiles p. 102
- 6.5 Step by Step p. 102
- 6.6 Printing Results p. 108
- 6.7 Output p. 108
- Exercises p. 111
- 7 Descriptive Statistics p. 112
- 7.1 Statistical Significance p. 112
- 7.2 The Normal Distribution p. 113
- 7.3 Measures of Central Tendency p. 114
- 7.4 Measures of Variability Around the Mean p. 114
- 7.5 Measures of Deviation from Normality p. 114
- 7.6 Measures of Size of the Distribution p. 115
- 7.7 Measures of Stability: Standard Error p. 115
- 7.8 Step by Step p. 115
- 7.9 Printing Results p. 119
- 7.10 Output p. 119
- Exercises p. 120
- 8 Crosstabulation and X^2 Analyses p. 121
- 8.1 Crosstabulation p. 121
- 8.2 Chi-Square (X^2) Tests of Independence p. 121
- 8.3 Step by Step p. 123
- 8.4 Weight Cases Procedure: Simplified Data Setup p. 127
- 8.5 Printing Results p. 129
- 8.6 Output p. 129
- Exercises p. 131
- 9 The Means Procedure p. 132
- 9.1 Step by Step p. 132
- 9.2 Printing Results p. 136
- 9.3 Output p. 136
- Exercises p. 138

- 10 Bivariate Correlation p. 139
- 10.1 What is a Correlation? p. 139
- 10.2 Additional Considerations p. 141
- 10.3 Step by Step p. 142
- 10.4 Printing Results p. 146
- 10.5 Output p. 147
- Exercises p. 148
- 11 The t Test Procedure p. 149
- 11.1 Independent-Samples t Tests p. 149
- 11.2 Paired-Samples t Tests p. 149
- 11.3 One-Sample t Tests p. 150
- 11.4 Significance and Effect Size p. 150
- 11.5 Step by Step p. 151
- 11.6 Printing Results p. 155
- 11.7 Output p. 155
- Exercises p. 158
- 12 The One-Way ANOVA Procedure p. 159
- 12.1 Introduction to One-Way Analysis of Variance p. 159
- 12.2 Step by Step p. 160
- 12.3 Printing Results p. 165
- 12.4 Output p. 165
- Exercises p. 168
- 13 General Linear Model: Two-Way ANOVA p. 169
- 13.1 Statistical Power p. 169
- 13.2 Two-Way Analysis of Variance p. 170
- 13.3 Step by Step p. 171
- 13.4 Printing Results p. 174
- 13.5 Output p. 174
- Exercises p. 176
- 14 General Linear Model: Three-Way ANOVA p. 177
- 14.1 Three-Way Analysis of Variance p. 177
- 14.2 The Influence of Covariates p. 178
- 14.3 Step by Step p. 179
- 14.4 Printing Results p. 181
- 14.5 Output p. 181
- 14.6 A Three-Way ANOVA that Includes a Covariate p. 186
- Exercises p. 190
- 15 Simple Linear Regression p. 193
- 15.1 Predicted Values and the Regression Equation p. 193
- 15.2 Simple Regression and the Amount of Variance Explained p. 195
- 15.3 Testing for a Curvilinear Relationship p. 195
- 15.4 Step by Step p. 198
- 15.5 Printing Results p. 202
- 15.6 Output p. 203
- 15.7 A Regression Analysis that Tests for a Curvilinear Trend p. 204
- Exercises p. 205

- 16 Multiple Regression Analysis p. 208
- 16.1 The Regression Equation p. 208
- 16.2 Regression and R²: The Amount of Variance Explained p. 210
- 16.3 Curvilinear Trends, Model Building, and References p. 210
- 16.4 Step by Step p. 212
- 16.5 Printing Results p. 217
- 16.6 Output p. 217
- 16.7 Change of Values as Each new Variable is Added p. 218
- Exercises p. 221
- 17 Nonparametric Procedures p. 222
- 17.1 Step by Step p. 223
- 17.2 Are Observed Values Distributed Differently than a Hypothesized Distribution? p. 225
- 17.3 Is the Order of Observed Values Non-Random? p. 227
- 17.4 Is a Continuous Variable Different in Different Groups? p. 228
- 17.5 Are the Medians of a Variable Different for Different Groups? p. 230
- 17.6 Are My Within-Subjects (Dependent Samples or Repeated Measures) Measurements Different? p. 231
- 17.7 Printing Results p. 234
- 18 Reliability Analysis p. 235
- 18.1 Coefficient Alpha (α) p. 236
- 18.2 Split-Half Reliability p. 236
- 18.3 The Example p. 236
- 18.4 Step by Step p. 237
- 18.5 Printing Results p. 241
- 18.6 Output p. 241
- Exercises p. 246
- 19 Multidimensional Scaling p. 247
- 19.1 Square Asymmetrical Matrixes (The Sociogram Example) p. 248
- 19.2 Step by Step p. 249
- 19.3 Printing Results p. 255
- 19.4 Output p. 255
- 20 Factor Analysis p. 258
- 20.1 Create a Correlation Matrix p. 258
- 20.2 Factor Extraction p. 258
- 20.3 Factor Selection and Rotation p. 259
- 20.4 Interpretation p. 261
- 20.5 Step by Step p. 262
- 20.6 Output p. 268
- 21 Cluster Analysis p. 271
- 21.1 Cluster Analysis and Factor Analysis Contrasted p. 271
- 21.2 Procedures for Conducting Cluster Analysis p. 272
- 21.3 Step by Step p. 274
- 21.4 Printing Results p. 280
- 21.5 Output p. 280
- 22 Discriminant Analysis p. 285

- 22.1 The Example: Admission into a Graduate Program p. 286
- 22.2 The Steps Used in Discriminant Analysis p. 286
- 22.3 Step by Step p. 288
- 22.4 Output p. 293
- 23 General Linear Models: MANOVA and MANCOVA p. 300
- 23.1 Step by Step p. 301
- 23.2 Printing Results p. 308
- 23.3 Output p. 309
- Exercises p. 314
- 24 G.L.M.: Repeated-Measures MANOVA p. 315
- 24.1 Step by Step p. 316
- 24.2 Printing Results p. 321
- 24.3 Output p. 321
- Exercises p. 325
- 25 Logistic Regression p. 326
- 25.1 Step by Step p. 327
- 25.2 Printing Results p. 331
- 25.3 Output p. 332
- 26 Hierarchical Log-Linear Models p. 336
- 26.1 Log-Linear Models p. 336
- 26.2 The Model Selection Log-Linear Procedure p. 337
- 26.3 Step by Step p. 338
- 26.4 Printing Results p. 342
- 26.5 Output p. 342
- 27 Nonhierarchical Log-Linear Models p. 348
- 27.1 Models p. 348
- 27.2 A Few Words about Model Selection p. 349
- 27.3 Types of Models Beyond the Scope of This Chapter p. 349
- 27.4 Step by Step p. 350
- 27.5 Printing Results p. 354
- 27.6 Output p. 354
- 28 Residuals: Analyzing Left-Over Variance p. 357
- 28.1 Residuals p. 357
- 28.2 Linear Regression: A Case Study p. 358
- 28.3 General Log-Linear Models: A Case Study p. 360
- 28.4 Accessing Residuals in SPSS p. 364
- Data Files p. 367
- Glossary p. 371
- References p. 377
- Credits p. 379
- Index p. 381
