

- Preface p. ix
- List of Contributors p. xi
- I Nanodevices and Nanocircuits Based on Nanowires
- Chapter 1 Nanowires as Building Blocks for Nanoscale Science and Technology Yi Cui and Xiangfeng Duan and Yu Huang and Charles M. Lieber p. 3
 - 1 Introduction p. 3
 - 2 Rational Synthesis of Single Component Nanowires p. 6
 - 3 Synthesis of Nanowire Heterostructures and Superlattices p. 17
 - 4 Fundamental Properties of Single Nanowire Structures p. 25
 - 5 Nanowire Chemical and Biological Sensors p. 40
 - 6 Assembly and Hierarchical Organization of Nanowires p. 50
 - 7 Crossed and Integrated Nanowire Devices p. 56
 - 8 Summary and Outlook p. 65
- Chapter 2 Epitaxial Quantum Wires: Growth, Properties and Applications Lars Samuelson and B. Jonas Ohlsson and Mikael T. Bjork and Hongqi Xu p. 69
 - 1 Introduction p. 69
 - 2 General Background and Introduction to the Subject p. 70
 - 3 Theory on the Band Structure of Semiconductor Nanowires p. 71
 - 4 State of the Art in Epitaxial Growth of Vertical Quantum Wires p. 75
 - 5 Processing and Studies of Nanowires as One-Dimensional Devices p. 79
 - 6 Outlook p. 87
- II Theory of Nanowires
- Chapter 3 Theoretical Study of Nanowires Hatem Mehrez and Hong Guo p. 95
 - 1 Introduction p. 95
 - 2 Phenomenology p. 98
 - 3 DFT for Nonequilibrium Transport p. 108
 - 4 Nonequilibrium Transport in Au Atomic Wire p. 114
 - 5 Summary p. 118
- Chapter 4 Modeling and Simulation of the Mechanical Response of Nanowires Wuwei Liang and Vikas Tomar and Min Zhou p. 125
 - 1 Introduction p. 126
 - 2 Mechanical Response of Nanowires p. 127
 - 3 Size and Rate Effects in Nanowires p. 145
 - 4 Discussions on Future Directions p. 152
- III Molecular Nanowires and Metallic Nanowires
- Chapter 5 Molecular and Ionic Adsorption onto Atomic-Scale Metal Wires H. X. He and S. Boussaad and B. Q. Xu and N. J. Tao p. 159
 - 1 Introduction p. 159
 - 2 Fabrication of Atomic-Scale Metal Wires p. 161
 - 3 Molecular Adsorption onto Atomic-Scale Metal Wires p. 166
 - 4 Anionic Adsorption p. 171
 - 5 Summary p. 172
- Chapter 6 Structural Study of Metal Nanowires Varlei Rodrigues and Daniel Ugarte p. 177
 - 1 Introduction p. 177
 - 2 Morphology Imaging of Metal NWs p. 178

- 3 Experimental Methods p. 181
- 4 Results and Discussion p. 185
- 5 NW Structure vs. Quantized Conductance Behavior p. 202
- 6 Conclusion p. 206
- Chapter 7 Metal Nanowires Synthesized by Solution-Phase Methods Yugang Sun and Younan Xia p. 211
 - 1 Introduction p. 211
 - 2 Scope and Objectives p. 213
 - 3 Solution-Phase Methods that Involve No Templates p. 213
 - 4 Template-Directed Synthesis p. 222
 - 5 Assembly of Metal Nanoparticles into 1D Nanostructures p. 228
 - 6 Concluding Remarks p. 229
- Chapter 8 Chemical and Biomolecular Interactions in the Assembly of Nanowires Achim Amma and Thomas E. Mallouk p. 235
 - 1 Introduction p. 235
 - 2 Phase Behavior of Nanowires p. 236
 - 3 Synthesis of Compositionally Varied Nanowires p. 238
 - 4 Molecular and Biomolecular Interactions in Nanowire Assembly p. 240
 - 5 Fluidic and Field-Driven Assembly of Nanowires p. 244
 - 6 Conclusions p. 249
- IV Semiconductor and Nitrides Nanowires
- Chapter 9 Group III- and Group IV-Nitride Nanorods and Nanowires L. C. Chen and K. H. Chen and C.-C. Chen p. 257
 - 1 Introduction p. 257
 - 2 Synthesis of Binary Group-III Nitride Nanorods and Nanowires p. 259
 - 3 Synthesis of Ternary Group-III Nitride Nanorods and Nanowires p. 279
 - 4 Synthesis of Binary and Ternary Group-IV Nitride Nanorods and Nanowires p. 279
 - 5 Structure and Bonding Characteristics p. 285
 - 6 Optical Properties p. 298
 - 7 Electrical Properties p. 305
 - 8 Summary p. 309
- Chapter 10 Template Assisted Synthesis of Semiconductor Nanowires Dongsheng Xu and Guolin Guo p. 317
 - 1 Introduction p. 317
 - 2 Templates Used p. 318
 - 3 Template Synthesis Strategies of Semiconductor Nanowires p. 320
 - 4 Structural Characterization of the Template-Synthesized SNWs p. 333
 - 5 Properties and the Future p. 336
 - 6 Conclusion p. 337
- Chapter 11 Wide Band-Gap Semiconductor Nanowires Synthesized by Vapor Phase Growth D. P. Yu p. 343
 - 1 Introduction p. 343
 - 2 Vapor Phase Evaporation p. 344
 - 3 Gallium Oxide Nanowires and Nanoribbons p. 347
 - 3 ZnO Nanowires and Nanotubes p. 355
 - 4 ZnSe Nanowires p. 374

- 5 GaN Nanowires p. 378
- 6 Oriented Silicon Oxide Nanowires and Amorphous Silicon Nanowires p. 382
- 7 Summary p. 385
- Chapter 12 Semiconducting Oxide and Nitride Nanowires Lide Zhang and Guowen Meng p. 393
 - 1 Synthesis of Oxide Nanowires p. 393
 - 2 Synthesis of Nitrides Nanowires p. 403
- Chapter 13 Silicon-Based Nanowires S. T. Lee and R. Q. Zhang and Y. Lifshitz p. 413
 - 1 Introduction p. 413
 - 2 Oxide-Assisted Growth of Nanowires p. 415
 - 3 Controlled Synthesis p. 422
 - 4 Si Hybrids and Compounds p. 432
 - 5 Characterization of SiNWs p. 438
 - 6 Modeling p. 448
 - 7 Oxide-Assisted Growth of Other (Not Containing Si) Semiconducting Nanowires p. 455
 - 8 Summary p. 458
