

- **Preface**
- **List of Abbreviations**
- **List of Symbols**
- **1 Introduction to EEG**
- **1.1 History**
- **1.2 Neural Activities**
- **1.3 Action Potentials**
- **1.4 EEG Generation**
- **1.5 Brain Rhythms**
- **1.6 EEG Recording and Measurement**
- **1.6.1 Conventional Electrode Positioning**
- **1.6.2 Conditioning the Signals**
- **1.7 Abnormal EEG Patterns**
- **1.8 Ageing**
- **1.9 Mental Disorders**
- **1.9.1 Dementia**
- **1.9.2 Epileptic Seizure and Nonepileptic Attacks**
- **1.9.3 Psychiatric Disorders**
- **1.9.4 External Effects**
- **1.10 Summary and Conclusions**
- **References**
- **2 Fundamentals of EEG Signal Processing**
- **2.1 EEG Signal Modelling**
- **2.1.1 Linear Models**
- **2.1.2 Nonlinear Modelling**
- **2.1.3 Generating EEG Signals Based on Modelling the Neuronal Activities**
- **2.2 Nonlinearity of the Medium**
- **2.3 Nonstationarity**
- **2.4 Signal Segmentation**
- **2.5 Signal Transforms and Joint Time-Frequency Analysis**
- **2.5.1 Wavelet Transform**
- **2.5.2 Ambiguity Function and the Wigner-Ville Distribution**
- **2.6 Coherency, Multivariate Autoregressive (MVAR) Modelling, and Directed Transfer Function (DTF)**
- **2.7 Chaos and Dynamical Analysis**
- **2.7.1 Entropy**
- **2.7.2 Kolmogorov Entropy**
- **2.7.3 Lyapunov Exponents**
- **2.7.4 Plotting the Attractor Dimensions from the Time Series**
- **2.7.5 Estimation of Lyapunov Exponents from the Time Series**
- **2.7.6 Approximate Entropy**
- **2.7.7 Using the Prediction Order**
- **2.8 Filtering and Denoising**
- **2.9 Principal Component Analysis**
- **2.9.1 Singular-Value Decomposition**
- **2.10 Independent Component Analysis**

- **2.10.1 Instantaneous BSS**
- **2.10.2 Convulsive BSS**
- **2.10.3 Sparse Component Analysis**
- **2.10.4 Nonlinear BSS**
- **2.10.5 Constrained BSS**
- **2.11 Application of Constrained BSS: Example**
- **2.12 Signal Parameter Estimation**
- **2.13 Classification Algorithms**
- **2.13.1 Support Vector Machines**
- **2.13.2 The k-Means Algorithm**
- **2.14 Matching Pursuits**
- **2.15 Summary and Conclusions**
- **References**
- **3 Event-Related Potentials**
- **3.1 Detection, Separation, Localization, and Classification of P300 Signals**
- **3.1.1 Using ICA**
- **3.1.2 Estimating Single Brain Potential Components by Modelling ERP Waveforms**
- **3.1.3 Source Tracking**
- **3.1.4 Localization of the ERP**
- **3.1.5 Time-Frequency Domain Analysis**
- **3.1.6 Adaptive Filtering Approach**
- **3.1.7 Prony's Approach for Detection of P300 Signals**
- **3.1.8 Adaptive Time-Frequency Methods**
- **4.1 Seizure Detection**
- **3.2 Brain Activity Assessment Using ERP**
- **3.3 Application of P300 to BCI**
- **3.4 Summary and Conclusions**
- **References**
- **4 Seizure Signal Analysis**
- **4.1.1 Adult Seizure Detection**
- **4.1.2 Detection of Neonate Seizure**
- **4.2 Chaotic Behaviour of EEG Sources**
- **4.3 Predictability of Seizure from the EEGs**
- **4.4 Fusion of EEG-fMRI Data for Seizure Prediction**
- **4.5 Summary and Conclusions**
- **References**
- **5 EEG Source Localization**
- **5.1 Introduction**
- **5.1.1 General Approaches to Source Localization**
- **5.1.2 Dipole Assumption**
- **5.2 Overview of the Traditional Approaches**
- **5.2.1 ICA Method**
- **5.2.2 MUSIC Algorithm**
- **5.2.3 LORETA Algorithm**
- **5.2.4 FOCUSS Algorithm**
- **5.2.5 Standardized LORETA**

- **5.2.6 Other Weighted Minimum Norm Solutions**
- **5.2.7 Evaluation Indices**
- **5.2.8 Joint ICA-LORETA Approach**
- **5.2.9 Partially Constrained BSS Method**
- **5.3 Determination of the Number of Sources**
- **5.4 Summary and Conclusions**
- **References**
- **6 Sleep EEG**
- **6.1 Stages of Sleep**
- **6.1.1 NREM Sleep**
- **6.1.2 REM Sleep**
- **6.2 The Influence of Circadian Rhythms**
- **6.3 Sleep Deprivation**
- **6.4**
